Meteorological Atlas Of The 1972 73 El N:

El Nino, La Nina, and the Southern Oscillation S. George Philander, 1989-12-14 El Nino and the Southern Oscillation is by far the most striking phenomenon caused by the interplay of ocean and atmosphere It can be explained neither in strictly oceanographic nor strictly meteorological terms This volume provides a brief history of the subject summarizes the oceanographic and meteorological observations and theories and discusses the recent advances in computer modeling studies of the phenomenon Includes a comprehensive and up to date research survey Discusses in detail sophisticated computer models Provides a clear exposition of the major problems which prevent more accurate predictions of El Nino

Tropical Ocean-atmosphere Newsletter, 1980

Atmosphere—Ocean Dynamics Adrian E. Gill, 2016-06-03

Atmosphere Ocean Dynamics deals with a systematic and unified approach to the dynamics of the ocean and atmosphere The book reviews the relationship of the ocean atmosphere and how this system functions The text explains this system through radiative equilibrium models the book also considers the greenhouse effect the effects of convection and of horizontal gradients and the variability in radiative driving of the earth Equations in the book show the properties of a material element mass conservation the balance of scalar quantity such as salinity and the mathematical behavior of the ocean and atmosphere The book also addresses how the ocean atmosphere system tends to adjust to equilibrium both in the absence and presence of driving forces such as gravity The text also explains the effect of the earth's rotation on the system as well as the application of forced motions such as that produced by wind or temperature changes The book explains tropical dynamics and the effects of variation of the Coriolis parameter with latitude The text will be appreciated by meteorologists environmentalists students studying hydrology and people working in general earth sciences

Large-Scale Oceanographic

Experiments and Satellites C. Gautier, A. Fieux, 2012-12-06 An Advanced Research Workshop ARW sponsored by NATO and the California Space Institute was held in Corsica France October 3 to 7 1983 to discuss the role of satellite observations in the large scale oceanographic experiments especially those under discussion e g the World Ocean Circulation Experiment WOCE and the Tropical Ocean and Global Atmosphere TOGA This volume is based on papers presented during that meeting summaries of the discussions of the working groups and recommended necessary tasks to be accomplished in preparation for WOCE and TOGA The participants of the meeting decided that although the collection of issues discussed in the meeting was undoubtedly incomplete the summaries of the discussions and recommended tasks warranted being conveyed to the

organizers and sponsors of WOCE and TOGA Although not discussed at the workshop it was recognized that an important role of satellites is as data collection and location systems Some of the common conclusions of the different working groups discussions are that 1 Studies are needed of the sensitivity of the ocean response to errors in surface parameters wind stress heat flux SST etc in a variety of physical models These should be one of the basis for determining the accuracy requirements in WOCE and TOGA
