Method and Perspective in Anthropology. Papers in Honour of Wilson D. Wallis ,1969 [Anthropological Theory](#) David Kaplan,Robert A. Manners,2017-09-05 Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist *Yearbook of Morphology 1998* G.E. Booij,Jaap van Marle,2013-04-18 A revival of interest in morphology has occurred during recent years The Yearbook of Morphology series published since 1988 has proven to be an eminent support for this upswing of morphological research since it contains articles on topics which are central in the current theoretical debates which are frequently referred to The Yearbook of Morphology 1998 focuses on two issues the position of inflection in the grammar and the interaction of morphology with phonology in particular the problem of allomorphy In addition this volume presents a study of the relation between transposition and argument structure a declarative model of word formation applied to conversion in German an analysis of Dutch verbal compounds and a study of the semantic aspects of nominalization The relevant evidence comes from a wide variety of languages Theoretical descriptive and historical linguists morphologists phonologists and psycholinguists will find this book of interest **African Languages** Bernd Heine,Derek Nurse,2000-08-03 This book is an introduction to African languages and linguistics covering typology structure and

sociolinguistics The twelve chapters are written by a team of fifteen eminent Africanists and their topics include the four major language groupings Niger Congo Nilo Saharan Afroasiatic and Khoisan the core areas of modern theoretical linguistics phonology morphology syntax typology sociolinguistics comparative linguistics and language history and society Basic concepts and terminology are explained for undergraduates and non specialist readers but each chapter also provides an overview of the state of the art in its field and as such will be referred to also by more advanced students and general linguists The book brings this range of material together in accessible form for anyone wishing to learn more about this challenging and fascinating field

Eight Decades of General Linguistics Ferenc Kiefer, Piet van Sterkenburg, 2012-11-29 Eight Decades of General Linguistics presents the key lectures delivered at the eighteen conferences organized by the Permanent International Committee of Linguists and also a history of the Committee itself The contributions of outstanding scholars such as Otto Jespersen Louis Hjelmslev Andr Martinet Uriel Weinreich Noam Chomsky and many other linguists cannot be over estimated The majority of the papers address a radically new topic each of which became one of the central issues in subsequent linguistic research In addition to their empirical findings and or the theoretical innovations presented in their papers each contribution is still interesting and pivotal to the development of contemporary linguistics

The Living and the Dead Liz Wilson, 2012-02-01 This collection examines the social dimensions of death in South Asian religions exploring the ritualized exchanges between the living and the dead performed by Hindus Buddhists Muslims and other religious groups Using ethnographic and historical tools associated with the comparative and historical study of religion the contributors also record the voices and actions of marginalized groups such as tribal peoples women and members of lower castes who are often underrepresented in studies of South Asian deathways which typically focus on the writings and practices of elite groups For many religious people death entails a journey leading to some new condition or place As the ultimate experience of passage it is highly ceremonial and ritualized and those beliefs and practices associated with the moment of death itself death bed ceremonies funerary rites and rituals of mourning and of remembering are examined here The Living and the Dead offers historical depth ethnographic detail and conceptual clarity on a subject that is of immense importance in South Asian religious traditions

Universals of Language Today Sergio Scalise, Elisabetta Magni, Antonietta Bisetto, 2008-10-11 This book collects the contributions presented at the international congress held at the University of Bologna in January 2007 where leading scholars of different persuasions and interests offered an up to date overview of the current status of the research on linguistic universals The papers that make up the volume deal with both theoretical and empirical issues and range over various domains covering not only morphology and syntax which were the major focus of Greenberg s seminal work but also phonology and semantics as well as diachrony and second language acquisition Diverse perspectives illustrate and discuss a huge number of phenomena from a wide variety of languages not only exploring the way research on universals intersects with different subareas of linguistics but also

contributing to the ongoing debate between functional and formal approaches to explaining the universals of language This stimulating reading for scientists researchers and postgraduate students in linguistics shows how different but not irreconcilable modes of explanation can complement each other both offering fresh insights into the investigation of unity and diversity in languages and pointing to exciting areas for future research A fresh and up to date survey of the present state of research on Universals of Language in an international context with original contributions from leading specialists in the field First hand accounts of substantive findings and theoretical observations in different subareas of linguistics Huge number of linguistic phenomena and data from different languages analyzed and discussed in detail Theory in Anthropology

Robert A. Manners, David Kaplan, 2013-11-05 This is VII in a series of ten volumes on the Theory in Anthropology Originally published in 1968 this is a sourcebook that was created by the authors need for making accessible in a single volume a sample of those important pieces which are presently scattered in numerous publications some of which are difficult for the student to obtain Our second reason had to do with certain convictions they hold about the aims and methods of anthropology **Studies in Typology and Diachrony** William Croft, Keith M. Denning, Suzanne Kemmer, 1990-01-01 Joseph

H Greenberg is a towering figure in late twentieth century linguistics His major contributions in the field have been in the area of typology and universals virtually launched by his paper on word order universals and in diachronic linguistics The major thrust of Greenberg's work in the past three decades has been in the fusion of these two approaches to linguistic explanation into one diachronic typology the cross linguistic analysis of languages as dynamic systems This volume honors Greenberg on the occasion of his 75th birthday It opens with an introduction discussing Greenberg's work at length and a full bibliography of his publications It contains ten papers in typology diachronic theory and diachronic typology by some of the leading linguists working in the research tradition inspired by Greenberg's work Resources for the Teaching of

Anthropology Ethel M. Albert, David Goodman Mandelbaum, Gabriel Ward Lasker, 1963 American Anthropology, 1946-1970 Robert F. Murphy, 2002-01-01 From the early Cold War years through the social unrest and activism of the 1960s American anthropology expanded considerably in size and outreach becoming spectacularly global and cross cultural in its interests Complex societies and communities became increasingly popular subjects of inquiry the influence of sociological methods upon fieldwork and interpretation grew a reimagined cultural evolution emerged and a pervasive interest in the broader forces of culture change shaped research writing and theory throughout the quarter century A dynamic range of schools of anthropological thought flowered cultural ecology structural functionalism ethnohistory and in the last years of the era French structuralism The American Anthropological Association became a forum of political debate in the 1960s and its membership included more people of color but fewer women than previously The twenty two selections in this volume highlight the many telling achievements and enduring insights in American anthropology during the first few decades after World War II An introduction to these essays by Robert F Murphy provides a historical and critical backdrop for

understanding the changes and continuity in American anthropology during this time **Mixed Methods in Ethnographic Research** Pertti J. Peltto, 2017-03-03 *Mixed Methods in Ethnographic Research: Historical Perspectives* captures the dynamic history and development of mixed methods research in a narrative of personal discovery, growth, and experience. Distinguished ethnographer and methodologist Pertti Peltto, who first called for the integration of qualitative and quantitative research methods nearly half a century ago, establishes a direct line between the earliest examples of ethnographic research and the ongoing mixed method discussions in academic institutions throughout the world. By bringing together such distinct historical perspectives with his own reflections on mixed methods research, Peltto offers a rare and endlessly enriching account that will satisfy the ever-growing need for a better quality of practical data gathering and give researchers a foundation for promoting mixed methods in the future. Annual Report of the American Historical Association American Historical Association, 1961 **Portrait Of Linguists** Thomas A. Sebeok, 2002-08-15 *Portrait of Linguists* is the standard biographical work in the history and theory of linguistics and a resource for all scholars of 18th, 19th, and early 20th century Western linguistics. Edited by Thomas A. Sebeok, this text contains articles by eminent scholars in English, French, and German. Ninety-one biographies are featured, including Wilhelm von Humboldt, Jacob Grimm, Franz Bopp, Sir William Jones, and Max Müller. They constitute a mass of information on the leading figures in linguistics and include bibliographical information in addition to revealing the authors' thoughts on the various schools of linguistics. Arranged chronologically by subjects' year of birth, this two-volume work is also indexed at the end of volume 2 and is a valuable storehouse of information on the seminal figures in the mainstream of Western linguistics. *The Ethnographer's Magic and Other Essays in the History of Anthropology* George W. Stocking, 1992 George Stocking has been widely recognized as the premier historian of anthropology ever since the publication of his first volume of essays, *Race, Culture, and Evolution* in 1968. As editor of several publications, including the highly acclaimed *History of Anthropology* series, he has led the movement to establish the history of anthropology as a recognized research specialization. In addition to the study of Victorian Anthropology, his work includes numerous essays covering a wide range of anthropological topics. The eight essays collected in *The Ethnographer's Magic* consider the emergence of anthropology since the late nineteenth century as an academic discipline grounded in systematic fieldwork. Drawing extensively on unpublished manuscript materials, the essays focus primarily on Franz Boas and Bronislaw Malinowski, the leading figures in the American and the British academic fieldwork traditions. According to George Marcus of Rice University, the essays represent the most informative and insightful writings on Malinowski and Boas and their legacies that are yet available. Beyond their biographical material, the essays here touch upon major themes in the history of anthropology: its powerfully mythic aspect and persistent strain of romantic primitivism; the contradictions of its relationship to the larger sociopolitical sphere; its problematic integration of a variety of natural scientific and humanistic inquiries; and the tension between its scientific aspirations and its subjectively acquired data. To provide an overview against which to read

the other essays Stocking has also included a sketch of the history of anthropology from the ancient Greeks to the present For this collection Stocking has written prefatory commentaries for each of the essays as well as two more extended contextualizing pieces An introductory essay Retrospective Prescriptive Reflections places the volume in autobiographical and historiographical context the Afterword Postscriptive Prospective Reflections reconsiders major themes of the essays in relation to the recent past and present situation of academic anthropology
