maps from the period      **An historical atlas** Robert Henlopen Labberton, 1885      *Historical Atlases* Walter Goffart, 2011-04-15 Today we can walk into any well stocked bookstore or library and find an array of historical atlases The first thorough review of the source material Historical Atlases traces how these collections of maps for history maps whose sole purpose was to illustrate some historical moment or scene came into being Beginning in the sixteenth century and continuing down to the late nineteenth Walter Goffart discusses milestones in the origins of historical atlases as well as individual maps illustrating historical events in alternating paired chapters He focuses on maps of the medieval period because the development of maps for history hinged particularly on portrayals of this segment of the postclassical modern past Goffart concludes the book with a detailed catalogue of more than 700 historical maps and atlases produced from 1570 to 1870 Historical Atlases will immediately take its place as the single most important reference on its subject Historians of cartography medievalists and anyone seriously interested in the role of maps in portraying history will find it invaluable

**History and GIS** Alexander Lünen, Charles Travis, 2012-12-05 Geographical Information Systems GIS either as standard GIS or custom made Historical GIS HGIS have become quite popular in some historical sub disciplines such as Economic and Social History or Historical Geography Mainstream history however seems to be rather unaffected by this trend More generally speaking Why is it that computer applications in general have failed to make much headway in history departments despite the first steps being undertaken a good forty years ago With the spatial turn in full swing in the humanities and many historians dealing with spatial and geographical questions one would think GIS would be welcomed with open arms Yet there seems to be no general anticipation by historians of employing GIS as a research tool As mentioned HGIS are popular chiefly among Historical Geographers and Social and Economic Historians The latter disciplines seem to be predestined to use such software through the widespread quantitativemethodology these disciplines have employed traditionally Other historical sub disciplines such as Ancient History are also very open to this emerging technology since the scarcity of written sources in this field can be mitigated by inferences made from an HGIS that has archaeological data stored in it for example In most of Modern History however the use of GIS is rarely seen The intellectual benefit that a GIS may bring about seems not be apparent to scholars from this sub discipline and others This book wants to investigate and discuss this controversy Why does the wider historian community not embrace GIS more readily While one cannot deny that the methodologies linked with a GIS follow geographical paradigms rather than historical ones the potential of GIS as a killer application for digital historical scholarship should be obvious This book brings together authors from Geography and History to discuss the value of GIS for historical research The focus however will not be on the how but on the why of GIS in history      Guide to the Study of American History Edward Channing, 1896      Maps and History Jeremy Black, 2000-01-01 Explores the role development and nature of the atlas and discusses its impact on the presentation of the past
