North China Villages Sidney David Gamble,1933 **North China Villages** Sidney David Gamble,1963 Village Governance in North China Huaiyin Li,2005-03-09 This book is about village governance in China during the late nineteenth and early twentieth centuries Drawing on government archives from Huailu county Hebei province it explores local practices and official systems of social control land taxation and self government at the village level Its analysis of peasant behaviors bridges the gap between the rational choice and moral economy models by taking into account both material and symbolic dimensions of power and interest in the peasant community The author s interpretation of village state relations before 1900 transcends the state and society dichotomy and accentuates the interplay between formal and informal institutions and practices His account of state making after 1900 underscores the continuity of endogenous arrangements in the course of institutional formalization and the interpenetration between official discourse and popular notions in the new process of political legitimization In Search of the Folk Daoists of North China Stephen Jones,2016-05-23 The living practice of Daoist ritual is still only a small part of Daoist studies Most of this work focuses on the southeast with the vast area of north China often assumed to be a tabula rasa for local lay liturgical traditions This book based on fieldwork challenges this assumption With case studies on parts of Hebei Shanxi Shaanxi and Gansu provinces Stephen Jones describes ritual sequences within funerals and temple fairs offering details on occupational hereditary lay Daoists temple dwelling priests and even amateur ritual groups Stressing performance Jones observes the changing ritual scene in this poor countryside both since the 1980s and through all the tribulations of twentieth century warfare and political campaigns The whole vocabulary of north Chinese Daoists differs significantly from that of the southeast which has so far dominated our image Largely unstudied by scholars of religion folk Daoist ritual in north China has been a constant theme of music scholars within China Stephen Jones places lay Daoists within the wider context of folk religious practices including those of lay Buddhists sectarians and spirit mediums This book opens up a new field for scholars of religion ritual music and modern Chinese society *The Transformation of Governance in Rural China* An Chen,2015 Explores the economic social and financial changes that have transformed China s rural governance over the past twenty years **Chinese Families in the Post-Mao Era** Deborah Davis,Stevan Harrell,1993-10-02 This collection of essays concerns both urban and rural Chinese communities ranging from professional to working class families The contributors attempt to determine whether and to what extent the policy shifts that followed Mao Zedong s death affected Chinese families *Gender, Politics, and Democracy* ,2008 This is the first exploration of women s campaigns to gain equal rights to political participation in China The dynamic and successful struggle for suffrage rights waged by Chinese women activists through the first half of the twentieth century challenged fundamental and centuries old principles of political power By demanding a public political voice for women the activists promoted new conceptions of democratic representation for the entire political structure not simply for women Their

movement created the space in which gendered codes of virtue would be radically transformed for both men and women

The Rural Modern Kate Merkel-Hess, 2016-08-17 The Rural Modern by historian Kate Merkel Hess is the first book to discuss the importance of rural China in the nation's efforts to define itself as modern in the twentieth century. Discussions of modernization efforts in twentieth century China have usually focused on modernity's manifestations from ironworks to banking to dancehalls in China's cities. As a result, the Communist peasant revolution appears to be a historical break. But Merkel Hess shows that the countryside was crucial for reformers in Republican China much before the peasant revolution of the communist period. Reformers hoped that once the rural masses were educated enough to realize how China had been taken advantage of by imperial powers, they would act to repel foreign intervention. The Rural Reconstruction Movement's agenda was not a partisan plan for revitalization but rather a fundamentally Chinese one: a reconfiguration of traditional ways of engaging the countryside. In international Shanghai, modernity usually signaled what was foreign and new, but as Merkel Hess argues, it was the rural modern that captured the Chinese people's desire for a modernity rooted in Chinese tradition. Rural reform thus became crucial to China's self-definition. The book sheds much needed light on the tensions between foreign and traditional Chinese urban and rural tradition and reconstruction that roiled the Chinese intellectual world in the early twentieth century, tensions that informed people's actions and social relations, government policies, and subsequent efforts to create a modern nation during the communist period.

The Broken Wave Roy Hofheinz, 1977 This book is a sophisticated and deeply researched volume on Mao Tse-tung's early leadership and on the formative years of the Chinese Communist Peasant movement. It has been axiomatic in Asian studies that knowledge of the early years of Chinese communism would throw the most light on modern happenings. In this landmark volume, Hofheinz provides the much needed map for understanding. Hofheinz shows how the rural revolution began, dissects with exquisite care the mentalities of the first leaders, and assesses the early gropings of peasant revolutionaries toward class struggle. He explains why Mao and others came to believe that the huge rural population was the most powerful force in China and that warfare against any visible enemies constituted progress for the Communist cause. Yet the first Chinese Communists failed miserably both as members of the Kuomintang coalition and on their own. The reasons for the great debacle of the 1920s are set out in this book for the first time in all their complexity. As important as this history is, Hofheinz declares, the lessons Mao learned from his defeats are of even greater significance. Mao and his followers shaped every decision in later years to avoid the errors of the past. The author demonstrates how Mao used ruralism, militarization, worship of numbers and not territory, and a fierce autonomy from other political groups to gain his ends.

In Search of the Folk Daoists of North China Dr. Stephen Jones, 2013-06-28 The living practice of Daoist ritual is still only a small part of Daoist studies. Most of this work focuses on the southeast, with the vast area of north China often assumed to be a tabula rasa for local lay liturgical traditions. This book, based on fieldwork, challenges this assumption. With case studies on parts of Hebei, Shanxi, Shaanxi, and Gansu provinces, Stephen Jones describes

ritual sequences within funerals and temple fairs offering details on occupational hereditary lay Daoists temple dwelling priests and even amateur ritual groups Stressing performance Jones observes the changing ritual scene in this poor countryside both since the 1980s and through all the tribulations of twentieth century warfare and political campaigns The whole vocabulary of north Chinese Daoists differs significantly from that of the southeast which has so far dominated our image Largely unstudied by scholars of religion folk Daoist ritual in north China has been a constant theme of music scholars within China Stephen Jones places lay Daoists within the wider context of folk religious practices including those of lay Buddhists sectarians and spirit mediums This book opens up a new field for scholars of religion ritual music and modern Chinese society

Making It Count Arunabh Ghosh, 2022-01-11 Among the biggest challenges facing leaders of the newly established People's Republic of China PRC was how much they did not know In 1949 at the end of a long sequence of wars the government of one of the largest states in the world committed to fundamentally re engineering its society and economy via socialist planning while having almost no hard reliable statistical data about their own country This book is a history of attempts made to resolve this crisis in counting Drawing on a wealth of official institutional and private sources culled from China India and the United States the author explores the choices made and the effects they engendered through a series of vivid encounters with political leaders professional statisticians academics ordinary statistical workers and even literary figures Early reliance on Soviet inspired methods of enumeration became increasingly untenable in China by the middle of the 1950s A series of unprecedented and unexpected exchanges with Indian statisticians followed as the Chinese sought to learn about the then exciting new technology of random sampling These developments were in turn overtaken by the tumult of the Great Leap Forward 1958-1961 when both probabilistic and exhaustive methods were rejected and statistics was refashioned into an essentially ethnographic enterprise The author argues that this history usually narrowly described as a universal if European history cannot be understood without acknowledging Soviet and Indian influences which not only revises existing models of Cold War science but also globalizes the wider developments in the history of statistics and data For historians of China and social science and political scientists sociologists and anthropologists studying modern China

The Peasant Economy and Social Change in North China Philip Huang, 1985-06-01 The author presents a convincing new interpretation of the origins and nature of the agrarian crisis that gripped the North China Plain in the two centuries before the Revolution His extensive research included eighteenth century homicide case records a nineteenth century country government archive large quantities of 1930's Japanese ethnographic materials and his own field studies in 1980 Through a comparison of the histories of small family farms and larger scale managerial farms the author documents and illustrates the long term trends of

agricultural commercialization social stratification and mounting population pressure in the peasant economy He shows how those changes in the absence of dynamic economic growth combined over the course of several centuries to produce a majority not simply of land short peasants or of exploited tenants and agricultural laborers but of poor peasants who required both family farming and agricultural wage income to survive This interlocking of family farming with wage labor furnished a large supply of cheap labor which in turn acted as a powerful brake of capital accumulation in the economy The formation of such a poor peasantry ultimately altered both the nature of village communities and their relations with the elites and the state creating tensions that led in the end to revolution

A Call to Mission - A History of the Jesuits in China

1842-1954 David Strong, 2018-02-12 China has bulked large in the imagination of the Catholic Church for 500 years It had been central to the missionary dream of the Jesuits for almost as long However only with this book's appearance has the detailed focus of attention shifted to the substantial and neglected period of catholic and Jesuit engagement with china the almost 120 years from the second arrival of the Jesuits Matteo Ricci the polymath Ferdinand Verbeist and Adam Schall von Bell the astronomers and the exquisite painter who influenced Chinese painting beyond measure Giuseppe Castiglione have been written about made ls of and been the heart and soul of the first stage of Jesuit impact on China in the 17th and 18th Centuries They brought Western learning and art to China and took Chinese language and literature to Europe The Jesuits were the first multinational to be welcomed in China and they came with a specific method of engagement to make friends build relationships and share their gifts before anything else was transacted including conversations about Christianity It remains an unsurpassed method of engagement with a rich and ancient people But the second arrival from the 1840 s was very different It was made possible by the arrival of European governments and traders many of whom came not just for financial gain but to spread their superior religion This work by David Strong in two volumes is the first major treatment of the period from the arrival of the European and eventually American Jesuit missionaries under the protection of the so called Unequal Treaties through to their expulsion after the Communist victory in the long running civil war in 1949 Volume 1 The French Romance traces the people projects expansion and impact of those who provided the predominant Jesuit presence At the height of it's engagement with China the French Government has 19 Consulates and attendant military and navy throughout China The French Jesuits were afforded access and protection by their government and activated missions in northern and central China schools seminaries universities parishes retreat houses publications and attracted Chinese nationals to join their number

Chinese History Endymion Porter Wilkinson, 2000 Endymion Wilkinson's bestselling manual of Chinese history has long been an indispensable guide to all those interested in the civilization and history of China In this latest edition now in a bigger format its scope has been dramatically enlarged by the addition of one million words of new text Twelve years in the making the new manual introduces students to different types of transmitted excavated and artifactual sources from prehistory to the twentieth century It also examines the context in which the sources were produced
