Muskox Land Lyle Dick, 2001 Muskox Land provides a meticulously researched and richly illustrated treatment of Canada's High Arctic as it interweaves insights from historiography Native studies ecology anthropology and polar exploration *Arctic Mirage* Winton U. Solberg, 2019-10-11 In 1913 an expedition was sent to the Arctic funded by the American Museum of Natural History the American Geographical Society and the University of Illinois Its purpose was twofold to discover whether an archipelago called Crocker Land reportedly spotted by an earlier explorer in 1906 actually existed and to engage in scientific research in the Arctic When explorers discovered that Crocker Land did not exist they instead pursued their research made a number of important discoveries and documented the region's indigenous inhabitants and natural habitat Their return to America was delayed by the difficulty of engaging a relief ship and by the danger of German submarines in Arctic waters during the World War I **Crocker Land Expedition to the North Polar Regions (George Borup Memorial) Under the Auspices of the American Museum of Natural History and the American Geographical Society**, 1915 In Search of Arctic Birds Richard Vaughan, 2010-10-30 Arctic birds have long held a fascination for Richard Vaughan whose trips to the region watching and photographing birds have provided the raw material for a number of previous publications Here he focuses on the historical aspects of Arctic ornithology bringing to life not only the birds but the activities of those who have lived with them or explored in search of them A general introduction to the Arctic and the forces that shape its bird populations and their biology is followed by sections on native peoples whaling and discovery ships and the famous ornithologists who have investigated these often inhospitable habitats Conservation both of individual species and of habitats is discussed against the background of threats to the Arctic environment Since half the Arctic lies in Russia detailed consideration is naturally given to Arctic bird studies in that country as well as in North America and Greenland Purely ornithological interludes look in detail at the Gyrfalcon Knots Ross's Gull geese divers Snowy Owls and many more The book includes practical advice on how to visit the Arctic and where and when to go Richard Vaughan's own photographs and the drawings of Swedish artist Gunnar Brusewitz do real justice to the beauty of both the environment and its birds Exploring Polar Frontiers William James Mills, 2003-12-11 Covers the entire history of Arctic and Antarctic exploration from the voyage of Pytheas ca 325 B C to the present in one convenient comprehensive reference resource Exploring Polar Frontiers A Historical Encyclopedia is the only reference work that provides a comprehensive history of polar exploration from the ancient period through the present day The author is a noted polar scholar and offers dramatic accounts of all major explorers and their expeditions together with separate exploration histories for specific islands regions and uncharted waters He presents a wealth of fascinating information under a variety of subject entries including methods of transport myths achievements and record breaking activities By approaching polar exploration biographically geographically and topically Mills reveals a number of intriguing connections between the various explorers their patrons and times and the

process of discovery in all areas of the polar regions Furthermore he provides the reader with a clear understanding of the intellectual climate as well as the dominant social economic and political forces surrounding each expedition Readers will learn why the journeys were undertaken not just where when and how

The Narrow Edge Deborah Cramer,2015-04-28 Thousands of ravenous tiny shorebirds race along the water s edge of Delaware Bay feasting on pin sized horseshoe crab eggs Fueled by millions of eggs the migrating red knots fly on When they arrive at last in their arctic breeding grounds they will have completed a near miraculous 9 000 mile journey that began in Tierra del Fuego Deborah Cramer followed these knots whose numbers have declined by 75 percent on their extraordinary odyssey from one end of the earth to the other from an isolated beach at the tip of South America all the way to the icy tundra In her firsthand account she explores how diminishing a single stopover can compromise the birds entire journey and how the loss of horseshoe crabs ancient animals that come ashore but once a year threatens not only the survival of red knots but also human well being the unparalleled ability of horseshoe crab blood to detect harmful bacteria in vaccines medical devices and intravenous drugs safeguards human health Cramer offers unique insight into how on an increasingly fragile and congested shore the lives of red knots horseshoe crabs and humans are intertwined She eloquently portrays the tenacity of small birds

and the courage of many people who bird by bird and beach by beach keep red knots flying *North to the Horizon*
