North By South:

Bulletin ,1910 **The Emergence Of The Nieu Ideology** Craig Murphy,2019-07-11 This study traces the political history of the ideas underlying Third World calls for a New International Economic Order Filling a significant gap in the literature the book shows that NIEO ideology has a direct unbroken line of development extending back to World War II when a new international economic order the Bretton Woods system was created Dr Murphy maintains that NIEO ideology is not rooted only in Third World acceptance of Prebisch s views on trade rather it evolved from Third World attempts to cope with problems and opportunities that emerged as the Bretton Woods system was created operated and began to break down By the 1970s the ideology had become a complex and coherent analysis of the economic position of Third World states including a political analysis of how Third World views could be made dominant Many of Dr Murphy s conclusions challenge the conventional wisdom about the Third World position of the NIEO In addition his study offers insight into the relatively unexplored area of how changes in political and social consciousness affect international systems and provides grounds on which officials from both the South and the North can see the others views as less alien **Chinese Lexical Semantics**

AMS. , The Mills-Bakeries of Ostia Jan Theo Bakker,2023-01-16 The ruins of Ostia main harbour of Imperial Rome were uncovered in the late nineteenth and first half of the twentieth century In the present volume the remains of three buildings used for the milling of grain and baking of bread pistrina are studied according to modern archaeological standards A detailed analysis of the architecture and masonry allows a description of the installation and vicissitudes of the pistrina Subsequently the distribution of these buildings in the city and their place in the neighbourhood is studied The technical achievement of the Ostian bakers is assessed Although water power was sometimes used in Roman grain mills this was not the case in Ostia This in turn affects estimates of the output of the pistrina Nevertheless the amount of bread that was produced must have been considerably higher than that in Pompeii where many small bakeries have been preserved No remains of bakeries have ever been found in Rome or Constantinople but it may be assumed that the average bakery in these cities did not differ much from the Ostian workshops Involvement of the fisc with the Ostian bakers has already been
