North Eastern Steam In Northumbria:

North Eastern Steam in Northumbria Malcolm Dunnett, 1973 *The Pit Sinkers of Northumberland and Durham* Peter Ford Mason, 2012-08-01 Shaft sinking for the extraction of minerals has taken place for centuries and for much of this time coal mining was carried out in the North East of England Various methods of pit sinking developed from the use of shallow bell pits to the excavation of deep shafts in order to access rich seams of coal and other minerals for sale in rapidly urbanising areas such as London In the close mining communities of Northumberland and Durham those who dug the initial shafts the sinkers themselves were regarded as the mining elite This book not only tells the story of mining itself through upheaval and technological developments but also focuses on the lives of miners and their families above ground in the emerging pit towns and villages places where religion and miners' games were an integral part of life Peter Ford Mason descended from three generations of County Durham miners has written a fascinating investigation into mining society which makes a compelling read for anyone interested in the social history of the North East or the mining industry as a whole

Co,1855 **Northumbria** Robert Colls,2019-02-26 The North East is probably England's most distinctive region. A place of strong character with a very special sense of its past it is, as William Hutchinson remarked in 1778, truly historical ground. This is a book about both the ancient Anglian kingdom of Northumbria which stretched from the Humber to the Scottish border and the ways in which the idea of being a Northumbrian or a northerner or someone from the North East persisted in the area long after the early English kingdom had fallen. It examines not only the history of the region but also the successive waves of identity that that history has bestowed over a very long period of time. Successful nations write about themselves in these terms so why not regions? Northumbria existed before England began but is still with us in name and in the way we think about ourselves. A series of sections entitled Christian Kingdom, Borderland and Coalfield, New Northumbria, Cultural Region and Northumbrian Island explore the region on the grand scale from the very beginning and bring a sharp sense of history to bear on the various threads that have influenced the making of modern regional identity. The book is a work of exceptional scholarship. Never before have so many acclaimed historians addressed together the issues which have affected this special region. Clearly written and rich in ideas, chapters explore the physical origins of Northumbria and consider just how the pressing political and military claims of adjoining states shaped and tempered it. There are further chapters on art, music, mythology, dialect, history, economy, poetry, politics, religion, antiquarianism, literature and settlement. They show how Northumbrians have lived and died and looked forward and back and these accounts of the North East's past will surely help in the shaping of its future.

A Handy Book of the Fishery Laws George Colwell Oke,1903 *Lloyd's Register of Shipping 1904 Steamers* Lloyd's Register Foundation,1904-01-01 The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes which are self-propelled and sea-going regardless of classification. Before the time only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.
