**North Korea Development Report** ,2003      **The Survival of North Korea** Suk Hi Kim,,Terence Roehrig,Bernhard Seliger,2011-08-24 Since the end of the Cold War scholars and analysts have been predicting the collapse of the communist regime in North Korea Yet despite a deteriorating economy characterized by declining industrial output outdated technology and difficulty feeding its people the country has been able to persist and continues to plod along How has North Korea been able to survive and how long can it last without significant change to its economic and political structures How can we peacefully resolve the North Korean nuclear standoff through constructive dialogue This book examines North Korea s survival strategy and offers practical solutions to a 50 year nuclear standoff through a series of essays written by 15 of the world s foremost scholars and leading experts on strategy economics and international relations It is essential reading for anyone interested in peace in Northeast Asia and will be invaluable in helping policy makers diplomats politicians researchers and other North Korea watchers to understand three closely related issues about North Korea 1 why North Korea will continue to survive 2 how the United States and North Korea can build a mutual confidence and 3 why a dialogue is the only viable way to resolve the North Korea problem peacefully      **North Korea: The Politics of Regime Survival** Young Whan Kihl,Hong Nack Kim,2014-12-18 Featuring contributions by some of the leading experts in Korean studies this book examines the political content of Kim Jong Il s regime maintenance including both the domestic strategy for regime survival and North Korea s foreign relations with South Korea Russia China Japan and the United States It considers how and why the Democratic People s Republic of Korea DPRK became a hermit kingdom in the name of Juche self reliance ideology and the potential for the barriers of isolationism to endure This up to date analysis of the DPRK s domestic and external policy linkages also includes a discussion of the ongoing North Korean nuclear standoff in the region      **Korea North Telecom Laws and Regulations Handbook Volume 1 Strategic Information and Laws Affecting Telecom Sector and Foreign Investments** IBP, Inc.,2013-08 2011 Updated Reprint Updated Annually Korea North Telecom Laws and Regulations Handbook      **North Korea and the Geopolitics of Development** Kevin Gray,Jong-Woon Lee,2021-04-15 Gray and Lee focus on three geopolitical moments that have been crucial to the shaping of the North Korean system colonialism the Cold War and the rise of China to examine how the emergence and subsequent development of the North Korean political economy was fundamentally shaped by broader processes of geopolitical contestation      **The South Korean Development Experience** E. Kim,2014-06-25 This volume explores South Korea s successful transition from an underdeveloped authoritarian country to a modern industrialized democracy South Korea s experience of foreign aid gives a unique perspective on how to use foreign aid for economic development as well as how to build a strong partnership between developed and developing countries      **The Protection and Promotion of Human Security in East Asia** B. Howe,2013-10-01 Although many of the states of East Asia have achieved startling success not all have benefited from the

region's development Many of the most vulnerable sections of East Asian populations still face tremendous challenges in their daily lives have yet to enjoy the rewards of the Asian Century and may even be further imperiled as a result of the forces of development Brendan Howe examines the measurements of success in East Asian development and governance from a human centered perspective He assesses obstacles to the protection and promotion of human security and development through detailed case studies of the most challenged states in the region including Burma Timor Leste Japan and North and South Korea He looks at the roles that East Asian actors can play and have been playing in protecting and promoting human security at the theoretical and practical level *North Korean Reform* Robert L. Carlin, Joel Wit, 2013-03-07 In the past foreign policy and security concerns have trumped any efforts to reform the North Korean economy Today the linkage between security and economic policies is being reconsidered as part of a larger debate in the North Korean leadership that has already transformed the country in fundamental ways Despite renewed tensions with the United States North Korea has begun to implement important economic reforms Moreover underneath the cover of the ever present military first slogan in the controlled media a debate is taking place between reformers and conservatives over whether Pyongyang's bloated military industrial complex should be scaled back to help ensure the success of economic reform Not only do these developments reflect strong political forces in the North Korean leadership that support reform but they could also have profound implications for the future of Pyongyang's national security policy North Korea may decide that it will need a more favourable external security environment in order to secure greater access to international economic and financial assistance for its reform measures and ultimately downsizing its military Pyongyang could launch a new policy of engagement that would include greater flexibility in the Beijing Six Party Talks A second scenario is continued internal struggle over reform that could lead to an inability to act decisively on key security and foreign policy issues including at the nuclear talks Finally progress in reform may paradoxically strengthen conservatives leading to hopes in Pyongyang that it can improve the economy while simultaneously maintaining a large powerful military Whether Washington can do anything at this point to influence directly the emerging debate in Pyongyang is unclear but a renewed policy of engagement on its part could enhance the chances of success for North Korean advocates of reform **North Korea** Hazel Smith, 2015-04-06 In this historically grounded richly empirical study of social and economic transformation in North Korea Hazel Smith evaluates the marketization from below that followed the devastating famine of the early 1990s estimated to be the cause of nearly one million fatalities Smith shows how the end of the Cold War in Europe and the famine brought radical social change to all of North Korean society This major new study analyses how marketization transformed the interests expectations and values of the entire society including Party members the military women and men the young and the elderly Smith shows how the daily life of North Koreans has become alienated from the daily pronouncements of the North Korean government Challenging stereotypes of twenty five million North Koreans as mere bystanders in history Smith argues that

North Koreans are neither victims nor villains but active agents of their own destiny      *Towards a Northeast Asian Security Community* Bernhard Seliger, Werner Pascha, 2011-06-25 The Northeast Asian security environment is closely linked to Korea's growth perspectives for the future The spectacular rise of the South Korean economy in the past half century also known as Miracle on the Han River has been duly highlighted as one of the most successful cases of economic development worldwide However among the factors curbing South Korea's growth perspectives has been from the very beginning of its rise the coexistence of the difficult neighbour to the North Democratic People's Republic of Korea While in the cold war this coexistence has been taken as inevitable after the end of the cold war there were hopes to overcome this obstacle to further growth either through collapse or enhanced cooperation with the North neither of which became reality North Korea's unprecedented aggressiveness and development of long range ballistic missiles and nuclear devices made this threat truly an international question with multilateral talks coming into existence as ad hoc measures to cope with the nuclear crisis It was then that the idea of a Northeast Asian Security Community was born The contributions in this book discuss how a peaceful solution of the security problems could not only enhance stability of Korea's economy and reduce the defense burden considerably the so called peace dividend but would facilitate regional investments safer and regional solutions for common economic problems When discussing the possibilities of a security framework or in an institutionalized form security community in Northeast Asia the authors in this volume are realistic as to not fall into the trap of wishful thinking which so often has characterized approaches to North Korea resulting in disappointment The past two years again saw the rising of tensions in Northeast Asia and the masterful way in which even an impoverished and isolated country can play its cards While it seems a new ice age between the two Koreas is possible nevertheless and maybe even more than ever the search for a stable security framework for Northeast Asia as a precondition for peaceful economic cooperation and development will go on The chapters in this volume contribute to the ongoing debate to secure peace and development in Northeast Asia making this book of interest to both academics and policy makers alike      Digital Review of Asia Pacific 2007/2008 Idrc, 2008-01-07

The biennial Digital Review of Asia Pacific is a comprehensive guide to the state of practice and trends in information and communication technologies for development ICT4D in Asia Pacific This third edition 2007/2008 covers 31 countries and economies including North Korea for the first time Each country chapter presents key ICT policies applications and initiatives for national development In addition five thematic chapters provide a synthesis of some of the key issues in ICT4D in the region including mobile and wireless technologies risk communication intellectual property regimes and localization The authors are drawn from government academe industry and civil society providing a broad perspective on the use of ICTs for human development      **Famine in North Korea** Stephan Haggard, Marcus Noland, 2009-06-22 In the mid 1990s as many as one million North Koreans died in one of the worst famines of the twentieth century Stephan Haggard and Marcus Noland present the most comprehensive and penetrating account of the famine to date examining not only the origins and aftermath

of the crisis but also the regime's response to outside aid and the effect of its current policies on the country's economic future. North Korea's famine exemplified the depredations that can arise from tyrannical rule and the dilemmas such regimes pose for the humanitarian community. To reveal the state's culpability is a vital project of historical recovery especially in light of our current engagement with the North Korean question.

**North Korea: A Country Study** Robert L. Worden, 2011-04-21. NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT OVERSTOCK SALE. Significantly reduced list price. This edition of *North Korea: A Country Study* replaces the previous edition published in 1994. Like its predecessor, this study attempts to review the history and treat in a concise manner the dominant social, political, economic, and military aspects of contemporary North Korea. Sources of information included books, scholarly journals, foreign and domestic newspapers, official reports of governments and international organizations, and numerous periodicals and Web sites on Korean and East Asian affairs. A word of caution is necessary, however. Even though more information is forthcoming from and about North Korea since it became a member of the United Nations in 1991, the government of a closed society such as that of North Korea controls information for internal and external consumption, limiting both the scope of coverage and its dissemination. A chronology of major historical events is provided at the front of the book (see table A). Chapter bibliographies appear at the end of the book, and brief comments on some of the more valuable and enduring sources recommended for further reading appear at the end of each chapter. A glossary also is included. Spellings of place names in the book are in most cases those approved by the U.S. Board on Geographic Names (BGN); spellings of some of the names, however, cannot be verified as the BGN itself notes. Readers of this book are alerted that because the BGN recognizes the Sea of Japan as the formal name of the body of water to the east of the Korean Peninsula, this book also uses that term. Similarly, the Yellow Sea is identified as the West Sea. The McCune-Reischauer system of transliteration has been employed except for the names of some prominent national and historical figures. Thus, Kim Il-sŏng is rendered as Kim Il Sung, and Kim Chŏng-il is rendered as Kim Jong Il. The names of Korean authors writing in English are spelled as given in the original publication. Measurements are given in the metric system. A conversion table (see table B) is provided to assist readers who are unfamiliar with metric measurements. Other related items: Foreign Countries collection can be found here: <https://bookstore.gpo.gov/catalog/international/foreign-affairs/foreign-country-studies>. The body of the text reflects information available as of August 1, 2007. Certain other parts of the text, however, have been updated: the Chronology

and Introduction discuss significant events that have occurred since the completion of research and the Country Profile and portions of some chapters include updated information as available

**The North Korean Economy** Nicholas Eberstadt, 2017-09-04 Viewed from afar North Korea may appear bizarre or positively irrational But as Nicholas Eberstadt demonstrates in this meticulously researched volume there is a grim coherence to North Korea's political economy and a ruthless logic undergirding it one that unreservedly subordinates economic welfare to augmentation of political power Thus paradoxically even as official policies and practices consign the DPRK economy to a perilous realm between crisis and catastrophe the country's leadership maintains unchallenged domestic control and has actually managed to increase its international influence Through painstaking collection of hard to uncover data and careful analysis Eberstadt provides a quantitative tableau of North Korea's terrible failure in its economic race against South Korea its stubborn adherence to policies all but guaranteed to stifle growth and undermine economic performance and the longstanding official effort to ignore or mitigate pressures for economic reform Eberstadt is skeptical of optimistic accounts from South Korea and elsewhere suggesting that the North Korean leadership is interested in resolving the current nuclear impasse and getting on with the business of reform and development So long as Pyongyang's rulers entertain the ambition of reunifying the Korean peninsula on its own terms Eberstadt argues economic reforms worthy of the name will be subversive of state authority and vigilantly resisted by Pyongyang's rulers This authoritative volume has received widespread attention from Asian specialists well as those concerned with nuclear proliferation and world peace and international relations professionals in general
