Power and Horizontality in South-South Development Cooperation. The Case of Brazil and Mozambique Jurek Seifert , 2020-02-24 The growing importance of new actors in the global political landscape is envisaged as a phenomenon that has led to shifts in international power relations This is reflected in development cooperation Countries like China Brazil India and South Africa have enhanced their cooperation programs and present their development cooperation as South South Development cooperation SSDC which takes place between countries of the Global South Both practitioners and scholars ascribe a notion of solidarity and horizontality to South South cooperation that allegedly distinguishes it from the relationship patterns commonly associated with North South relations However power constellations between the emerging powers and most of their cooperation partners are often

asymmetrical This book asks whether the claim that South South cooperation is conducted in a horizontal manner holds in practice in spite of these asymmetries It revises the concept of South South cooperation and identifies the central characteristics that are claimed to distinguish the Southern modality from Northern cooperation It then investigates the relationship between Brazil and Mozambique during the period 2003 2014 to shed some light on the question whether South South cooperation is different from traditional development cooperation regarding the relations between cooperation partners Jurek Seifert is a development cooperation expert He holds a PhD from the University of Duisburg Essen and has worked on South South cooperation development effectiveness and private sector engagement He has conducted research at the BRICS Policy Center in Rio de Janeiro Brazil and works in international development cooperation Emerging Powers, Development Cooperation and South-South Relations Chithra Purushothaman, 2020-10-24 This book analyses the role of emerging powers as a development assistance providers and the nature of their development cooperation their behaviour motives and markedly their changing identities in international relations With their growing economic and political clout emerging powers are using economic instruments like foreign aid to ensure their position in the international system that is going through power shifts By comparing three major emerging economies of the Global South Brazil India and China this book would explore how emerging powers are changing the international aid architecture that is created and dominated by the traditional donors Innovating South-South Cooperation Hany Gamil Besada, M. Evren Tok, Leah McMillan Polonenko, 2019-08-27 With the rise of emerging powers we face an important question Is the changing global order transforming the nature of development cooperation Promoting equitable broad based growth in order to alleviate poverty calls for a new understanding of the principles of development assistance good governance transparency ownership and accountability In the ever changing arena of global development governance South South Cooperation SSC entails diverse forms of cooperation among developing countries This book presents novel approaches to further South South Cooperation SSC on a global scale The evolving aid architecture and mounting development challenges demand an urgent and critical review of existing aid modalities policy making and forums for international cooperation Published in English Brexit and the Northern Ireland Constitution Lisa Claire Whitten, 2024-03-05 Brexit and the Northern Ireland Constitution considers the intersection of two processes the complex and constitutional process of the United Kingdom's withdrawal from the European Union Brexit and the steady yet fragile development of the Northern Ireland constitution deriving primarily from the Belfast Good Friday Agreement of 1998 Interdisciplinary in approach the analysis draws on legal and political theory to develop a novel framework for assessing the progressive impact of Brexit on the Northern Ireland constitution based on systematic definitions of both This approach elucidates dynamics and implications not yet considered in the otherwise extensive debates about Brexit and its impacts on Northern Ireland Based on detailed analysis of the Brexit process it is argued that its impact on the constitution of Northern Ireland has been profound Fundamentally Brexit changed the political and legal environment

in which the Northern Ireland constitution had existed for over twenty years Embracing constructive ambiguity the 1998 Agreement recognises and accommodates the concerns of both unionists and nationalists in Northern Ireland it did not therefore solve the constitutional conflict but rather allowed it to be managed differently through an innovative system of multileveled governance within Northern Ireland power sharing devolution on the island of Ireland North South cooperation and between the islands of Great Britain and Ireland East West cooperation all underpinned by a multifaceted principle of constitutional popular and cross community consent By forcing a paradigmatic shift in the way that the systems of government established by the 1998 Agreement operate Brexit disrupted the constructively ambiguous compromise that it represents Completed two years after the legal implementation of UK withdrawal from the EU Whitten concludes by considering the potential longer term constitutional repercussions of Brexit both within and beyond Northern Ireland s recently notorious borders

North-South Knowledge Networks Towards Equitable Collaboration Between Tor Halvorsen, Jorun Nossun, 2017-02-23. Since the 1990s internationalisation has become key for institutions wishing to secure funding for higher education and research. For the academic community this strategic shift has had many consequences. Priorities have changed and been influenced by new ways of thinking about universities and of measuring their impact in relation to each other and to their social goals. Debates are ongoing and hotly contested. In this collection a mix of renowned academics and newer voices reflect on some of the realities of international research partnerships. They both question and highlight the agency of academics, donors and research institutions in the geopolitics of knowledge and power. The contributors offer fresh insights on institutional transformation, the setting of research agendas and access to research funding while highlighting the dilemmas researchers face when their institutions are vulnerable to state and donor influence. Offering a range of perspectives on why academics should collaborate and what for, this book will be useful to anyone interested in how scholars are adapting to the realities of international networking and how research institutions are finding innovative ways to make North-South partnerships and collaborations increasingly fair, sustainable and mutually beneficial.
