Northeastern Borderlands Four Centuries Of Interaction:

New England and the Maritime Provinces Stephen John Hornsby, John G. Reid, 2005 A wide reaching inter disciplinary examination of the links between New England and the Maritimes In Armageddon's Shadow Greg Marquis, 2000 The United States had important ties with Canada's Maritime Provinces that were profoundly shaken by the American Civil War Drawing extensively on newspaper reports personal papers and local histories Greg Marquis captures the drama of the times effectively putting the reader into the thick of the action In Armageddon's Shadow highlights Maritime support for the beleaguered Confederacy and the grave implications this had on race relations in Canada Marquis details the involvement of maritimers in running blockades and recounts the experiences of some of the thousands of men from Nova Scotia New Brunswick and Prince Edward Island who served in America's bloodiest conflict Book jacket **Beyond Walls:**

Re-inventing the Canada-United States Borderlands Victor Konrad, Heather Nicol, 2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa's artificial line boundaries and other global situations Disaster Citizenship Jacob A.C. Remes, 2015-12-30 A century ago governments buoyed by Progressive Era beliefs began to assume greater responsibility for protecting and rescuing citizens Yet the aftermath of two disasters in the United States Canada borderlands the Salem Fire of 1914 and the Halifax Explosion of 1917 saw working class survivors instead turn to friends neighbors coworkers and family members for succor and aid Both official and unofficial responses meanwhile showed how the United States and Canada were linked by experts workers and money In Disaster Citizenship Jacob A C Remes draws on histories of the Salem and Halifax events to explore the institutions both formal and informal that ordinary people relied upon in times of crisis He explores patterns and traditions of self help informal order and solidarity and details how people adapted these traditions when necessary Yet as he shows these methods though often quick and effective remained illegible to reformers Indeed soldiers social workers and reformers wielding extraordinary emergency powers challenged these grassroots practices to impose progressive solutions

on what they wrongly imagined to be a fractured social landscape **Loyalties in Conflict** John Irvine Little,2008-01-01 Loyalties in Conflict examines how the allegiance to British authority of the American origin population within the borders of Lower Canada was tested by the War of 1812 and the Rebellions of 1837 1838 *Gendered Passages* Yukari Takai,2008 Gendered Passages is the first full length book devoted to the gendered analysis of the lives of French Canadian migrants in early twentieth century Lowell Massachusetts It explores the ingenious and at times painful ways in which French Canadian women men and children adjusted to the challenges of moving to and settling in that industrial city Yukari Takai uncovers the multitude of cross border journeys of Lowell bound French Canadians the centrality of their family networks and the ways in which the ideology of the family wage and the socioeconomic realities in Qu bec and New England shaped migrants lives on both sides of the border Takai argues that French Canadian husbands and wives fathers and mothers sons and daughters harboured complex interpersonal dynamics whereby differing and at times conflicting interests had to be negotiated in not necessarily equal terms but in accordance with each member s power and authority within the family and by extension larger society Drawing on extensive historical research including archival records collections of oral histories newspapers and contemporary observations in both English and French Gendered Passages contributes to the re reading of French Canadian migration which constitutes a fundamental part of North American history **The Fence and the Bridge** Heather N. Nicol,2015-10-19 The Fence and the Bridge is about the development of the Canada US border security relationship as an outgrowth of the much lengthier Canada US relationship It suggests that this relationship has been both highly reflexive and hegemonic over time and that such realities are embodied in the metaphorical images and texts that describe the Canada US border over its history Nicol argues that prominent security motifs such as themes of free trade illegal immigration cross border crime terrorism and territorial sovereignty are not new nor are they limited to the post 9 11 era They have developed and evolved at different times and become part of a larger quilt whose patches are stitched together to create a new fabric and design Each of the security motifs that now characterize Canada US border perceptions and relations has a precedent in border management strategies and border relations in earlier periods In some cases these have deep historical roots that date back not just years or decades but centuries They are part of an evolving North American geopolitical logic that inscribes how borders are perceived how they function and what they mean *Canadian Books in Print. Author and Title Index* ,1975 All Things in Common Ruth Compton Brouwer,2021-06-28 The Canadian Social History Series is devoted to in depth studies of major themes in our history exploring neglected areas in the day to day existence of Canadians The emphasis of this innovative series is on increasing the general appreciation of our past and opening up new areas of study for students and scholars The editor of the series is Gregory S Kealey Professor of History University of New Brunswick A leading historian of the Canadian working class Dr Kealey was the founding editor of Labour Le Travail Book jacket **The Atlantic Provinces in Confederation** E. North of America Jeffers Lennox, 2022-01-01 How the United States was created a complex and surprising story of patriots Indigenous peoples loyalists visionaries and scoundrels The story of the Thirteen Colonies struggle for independence from Britain is well known to every American schoolchild But at the start of the Revolutionary War there were more than thirteen British colonies in North America Patriots were surrounded by Indigenous homelands and loyal provinces Independence had its limits Upper Canada Lower Canada New Brunswick Nova Scotia Newfoundland and especially the homelands that straddled colonial borders were far less foreign to the men and women who established the United States than Canada is to those who live here now These northern neighbors were far from inactive during the Revolution The participation of the loyal British provinces and Indigenous nations that largely rejected the Revolution as antagonists opponents or bystanders shaped the progress of the conflict and influenced the American nation's early development In this book historian Jeffers Lennox looks north as so many Americans at that time did and describes how Loyalists and Indigenous leaders frustrated Patriot ambitions defended their territory and acted as midwives to the birth of the United States while restricting and redirecting its continental aspirations

Navigating a Changing World Geoffrey Hale, Greg Anderson, 2021-05-05 This volume addresses the governance and evolution of Canada's international policies and the challenges facing Canada's international policy relations on multiple fronts

Fishing a Borderless Sea Brian J. Payne, 2010-02-16 Over the centuries processing and distribution of products from land and sea has stimulated the growth of a global economy In the broad sweep of world history it may be hard to imagine a place for the meager little herring baitfish Yet as Brian Payne adeptly recounts the baitfish trade was hotly contested in the Anglo American world throughout the nineteenth century Politicians called for wars navies were dispatched with guns at the ready vessels were seized at sea and violence erupted at sea Yet the battle over baitfish was not simply a diplomatic or political affair Fishermen from hundreds of villages along the coastline of Atlantic Canada and New England played essential roles in the construction of legal authority that granted or denied access to these profitable bait fisheries Fishing a Borderless Sea illustrates how everyday laborers created a complex system of environmental stewardship that enabled them to control the local resources while also allowing them access into the larger global economy

Lines Drawn upon the Water Karl S. Hele,2008-09-30 The First Nations who have lived in the Great Lakes watershed have been strongly influenced by the imposition of colonial and national boundaries there The essays in *Lines Drawn upon the Water* examine the impact of the Canadian American border on communities with reference to national efforts to enforce the boundary and the determination of local groups to pursue their interests and define themselves Although both governments regard the border as clearly defined local communities continue to contest the artificial divisions imposed by the international boundary and define spatial and human relationships in the borderlands in their own terms The debate is often cast in terms of Canada s failure to recognize the 1794 Jay Treaty s confirmation of Native rights to transport goods into Canada but ultimately the issue concerns the larger struggle of First Nations to force recognition of their people s rights to move freely across the border in search of economic and social independence

Historical Geography, GIScience and Textual Analysis Charles Travis,Francis Ludlow,Ferenc Gyuris,2020-02-29 This book illustrates how literature history and geographical analysis complement and enrich each other s disciplinary endeavors The Hun Lenox Globe constructed in 1510 contains the Latin phrase *Hic sunt dracones* Here be dragons warning sailors of the dangers of drifting into uncharted waters Nearly half a millennium earlier the practice of earth writing geographia emerged from the cloisters of the great library of Alexandria as a discipline blending the twin pursuits of Strabo s poetic impression of places and Herodotus chronicles of events and cultures Eratosthenes a librarian at Alexandria and the mathematician Ptolemy employed geometry as another language with which to pursue earth writing From this ancient East Mediterranean fount the streams of literary perception historical record and geographical analysis phenomenological and Euclidean found confluence The aim of this collection is to recover such means and seek the fount of such rich waters by exploring relations between historical geography geographic information science GIS geoscience and textual analysis The book discusses and illustrates current case studies trends and discourses in European American and Asian spheres where historical geography is practiced in concert with human and physical applications of GIS and the broader geosciences and the analysis of text broadly conceived as archival literary historical cultural climatic scientific digital cinematic and media Time as a multi scaled concept again broadly conceived is the pivot around which the interdisciplinary contributions to this volume revolve In *The Landscape of Time* 2002 the historian John Lewis Gaddis posits

What if we were to think of history as a kind of mapping He links the ancient practice of mapmaking with the three part conception of time past present and future Gaddis presents the practices of cartography and historical narrative as attempts to manage infinitely complex subjects by imposing abstract grids to frame the phenomena being examined longitude and latitude to frame landscapes and occidental and oriental temporal scales to frame timescapes Gaddis contends that if the past is a landscape and history is the way we represent it then it follows that pattern recognition constitutes a primary form of human perception one that can be parsed empirically statistically and phenomenologically In turn this volume reasons that literary historical cartographical scientific mathematical and counterfactual narratives create their own spatio temporal frames of reference Confluences between the poetic and the positivistic the empirical and the impressionistic the epic and the episodic and the chronologic and the chorologic can be identified and studied by integrating practices in historical geography GIScience geoscience and textual analysis As a result new perceptions and insights facilitating further avenues of scholarship into uncharted waters emerge The various ways in which geographical historical and textual perspectives are hermeneutically woven together in this volume illuminates the different methods with which to explore terrae incognitae of knowledge beyond the shores of their own separate disciplinary islands
