**Northern Pacific Railway: Diesel era, 1945-1970** Robert L. Frey, Lorenz P. Schrenk, 2003-01-01 This book tells the amazing story of the development and operation of the diesel electric locomotives on the Northern Pacific [North American Railroad Family Trees](#) Brian Solomon, 2013-10-20 The history of railroading in North America is as much a story of boardroom intrigue as it is a story of the brute force that stamped thousands of miles of train track across a rugged continent Today's nine U.S. and Canadian Class I railroads are the result of well over a century of convoluted bankruptcies, mergers, acquisitions, and expansions North American Railroad Family Trees marks the first time in book form that this major aspect of railroad history has been presented in a clear graphic format helping the railfan make sense of the many smaller train lines that shaped North American rail as it is today In these pages renowned rail author Brian Solomon takes a visual and chronological approach presenting 50 family trees in the style of human lineages The story begins with the railroads of the Golden Age 1890-1930 continuing through the second wave of consolidations between the World Wars the merger mania of the 1950s through the 1970s the creation of major passenger networks and the megamergers of the last three decades that have left railroading close to its current incarnation Solomon even offers a selection of maps tracing the evolution of the North American rail system and diagrams proposing what-if scenarios for the industry's future Including chapter-by-chapter narrative overviews of key eras along with a selection of rare photography and period advertising to lend historical context North American Railroad Family Trees provides an unprecedented retrospective of the continent's iconic rail network

[Seventy-five Years of Railroad History](#), 1997 **Railfan & Railroad**, 2005 **Railroad History**, 1990 **Vintage Diesel Power** Brian Solomon, 2010-11-06 This formative period of diesel locomotive evolution is examined with the help of more than 250 modern and period photos depicting passenger, freight, and switching locomotives Author Brian Solomon covers every prominent manufacturer of the period including Electro-Motive, Alco, Baldwin, and GE as well as iconic models like Geeps, E and F units, PAs and FAs, sharknoses, U-boats, and more The photographs take in the grand geographic and technological breadth of North American railroading and are accompanied by detailed captions identifying the locomotives pictured and explaining their roles in this crucial era of American railroading [Streamliners](#) Brian Solomon, 2015-10-05 An examination of the introduction of streamliners to American railroading including the technology and styling trends

**Model Railroad Craftsman**, 1990 *Great Lakes Ore Docks and Ore Cars* Patrick Dorin, 2007-09-27 The Iron Mining Industry was quite extensive throughout the area known as the Lake Superior Iron Ore District All of the iron ore was transported by rail to a wide number of lake ports on Lake Superior, Lake Michigan, and Lake Huron This book lists all of the ore docks constructed on The Great Lakes Includes photos of the ore docks and ore cars, ore car schematics, and pertinent data [Pacific Rail News](#), 1996 **Society for Industrial Archeology Newsletter**, 1988 **Publishers Directory**, 1994

*Supplement*, 1988      **Smoke Over Oklahoma** Augustus J. Veenendaal, 2017-01-17 Oklahoma was in the throes of the Great Depression when Preston George acquired a cheap Kodak folding camera and took his first photographs of steam locomotives. As depression gave way to world war George kept taking pictures now with a Graflex camera that could capture moving trains. In this first book devoted solely to George's work his black and white photographs constitute a striking visual documentary of steam driven railroading in its brief but glorious heyday in the American Southwest. The pictures also form a remarkable artistic accomplishment in their own right. Prominent among the magnificent action images collected here are the engines that were George's passion steam locomotives pulling long freights or strings of gleaming passenger cars through open country. But along with the fireworks of the heavier steam engines slogging through the mountains near the Arkansas border on the Kansas City Southern or climbing Raton Pass in New Mexico on the Santa Fe George's photographs also record humbler fare such as the short trains of the Frisco and Katy piloted by ancient light steamers and the final years of that state's interurban lines. Augustus J. Veenendaal Jr's brief history of railroads in the Sooner State puts these images into perspective as does a reminiscence by George's daughter Burnis on his life and his pursuit of railroad photography. With over 150 images and a wealth of historical and biographical information this volume makes accessible to an audience beyond the most avid railfans the extent of Preston George's extraordinary achievement.

[Rails Around the World](#) Brian Solomon, 2020 *Rails Around the World* is a visually glorious history depicting trains and locomotives at work in scenic locations throughout North America, Europe, and Asia.

**The Majesty of Big Steam** Brian Solomon, 2015-11-01 Relive the romance and power of the steam locomotive era, the product of a century of continuous research and development. In the United States the final decades of steam power were characterized by very large and capable locomotives. Beginning in the 1920s with Alco's three cylinder types and Lima's Super Power concept steam locomotive design crossed new thresholds of power and efficiency. A host of new wheel arrangements combined with innovative technology and new materials to create a final generation of refinement. Lima's Berkshire of 1925 demonstrated the value of the four wheel radial trailing truck in its ability to support a firebox large enough to supply high power and fast running. Within a few years the 2-10-4 Texas, 4-6-4 Hudson, and 4-8-4 Northern had led the way and by the late 1920s large modern articulated types were taking shape. *The Majesty of Big Steam* is full of these late era locomotives, the last generation of steam power before the diesels took over. Dramatic photos show Berkshires, Hudsons, and Northerns at work as well as massive articulateds at their finest. Witness New York Central's Great Steel Fleet being whisked along behind some of the most refined American designed engines. See Southern Pacific's cab forward oil burners crest the California Sierra and Baltimore Ohio's EM-1 war babies lift tonnage over the Appalachian mountains. Norfolk Western continued to refine 4-8-4s and articulated types even as the rest of America was buying diesels and ran these well oiled machines longer than any other line. Don't miss a single one.
