Exploring the Northern Tradition Galina Krasskova, 2005-05-15 Exploring the Northern Tradition is an introduction to the modern reconstruction of the ancient religion of the Germanic and Scandinavian peoples This religion called Heathenry is one of the fastest growing polytheistic religious movements in the United States today This book provides a thorough guide to the cosmology values ethics and rituals practiced by modern Heathens It crosses denominational lines examining practices common to all branches of Heathenry in an easily accessible format Readers will have the opportunity to explore the sacred stories of the various Heathen Gods like Odin Frigga Freya and Thor and the devotional practices of modern votaries The most common devotional rite the faining or blot is examined in rich detail with examples given for personal use Additionally readers are introduced to the concept of wyrd or fate so integral to the Heathen worldview For those new to Heathenry Pagans who wish to learn more about the Norse Deities or those simply interested in learning about this unique religion Exploring the Northern Tradition is the perfect introduction Subjects covered include The gods and goddesses Symbol The soul matrix Ethics and values of the modern heathen The history and evolution of modern Heathenry Unlike many books on Heathenry Exploring the Northern Tradition is not denomination specific nor does it seek to overwhelm the reader with unfamiliar Anglo Saxon or Norse terminology Every new concept covered is presented in a clear and easy to understand manner Readers will come away from this book with a thorough knowledge of what the Heathen community is like and what newcomers to that community can expect Experienced Heathens will find a wealth of lore and inter denominational critique that will make this book an excellent addition to their libraries The author Galina Krasskova draws on her own 12 years of experience as a Heathen priest or weofodthignen She is currently Aeweweard in Thaet Angelseaxisce Ealdriht and has studied interfaith ministry in NYC where she is registered with the state as a minister

Jeremiah in Prophetic Tradition Hetty Lalleman-de Winkel, 2000 In this study it is argued that the book of Jeremiah was influenced by the books of Amos and Hosea All three books show a similar pattern of development There is a correspondence between the reactions of those addressed and the prophetic message which changes from the preaching of repentance to a message of irreversible judgment Finally these prophets testified that only God could bring about a new future This study which originally took the form of a dissertation examines several topics common to Hosea Amos and Jeremiah Dr Lalleman demonstrates important correspondences which point to a prophetic tradition received and developed by Jeremiah in his own way The research concentrates on the themes of repentance and hope covenant and the role of the prophet in intercession as well as his personal involvement in his message The differences between these prophetic books however show that the individual characteristics of each prophet must not be neglected The assumption of one monolithic Deuteronomistic redaction responsible for the editing of all the books is therefore unlikely The prophets are best interpreted in their own historical contexts although they are connected by a common spiritual heritage a prophetic tradition

The Northern Tradition Pete Jennings, 2003-07 Written by the President of the Pagan Federation who is also a follower of the Norse or Northern Tradition so he can be classed as a bit of an authority on the subject A good

Whittaker,2012-12-06 The natural communities of the world are diverse and many schools of ecology have developed classifications of communities in partial independence of one another There is consequently a vast and widely dispersed literature on the classification of plant and animal communities comprising divergent approaches of different schools and representing a great experiment on the usefulness of different possibilities for classification The editor sought in a re view monograph of 1962 to summarize these schools and their history and in 1973 published a treatise on Ordination and Clas sification of Communities as volume 5 of the Handbook of Vegetation Science We were fortunate in preparing the latter work to have a truly international panel of authors to discuss different major ap proaches to classification This second edition of the book of 1973 is intended to make the work more widely available in a less expensive form as companion volumes on ordination and on classification of plant communities
