Not By Justification:

Agnosticism Francis Fallon, Gavin Hyman, 2020-11-04 In a time marked by prominent public clashes between theists and atheists much less attention has been given to the question of agnosticism whether in public debate or in academic literature This is all the more surprising given that so many in Western society feel unable to identify unequivocally with either theism or atheism This book brings together some leading contemporary philosophers from both the analytic and continental traditions to give a sustained and in depth treatment of the question of agnosticism Approaching the question from a variety of stances and employing different methodologies the contributors explore the various possible meanings of agnosticism today Several of them develop what they describe as a New Agnosticism where the relationship with theism or forms of religious belief is not as mutually exclusive as has often been assumed Others look for signs of agnosticism in places where it is not usually thought to be found such as in forms of continental philosophy and even in theology itself They also raise interesting methodological questions at the intersection of analytic and continental philosophy These are stimulating and innovative essays working with the most recent developments in philosophy and religious thought They open up new avenues of thought that will be of interest to philosophers theologians and other thoughtful readers whether theist atheist or agnostic

The Moral Skeptic Anita M. Superson, 2009-03-13 Anita Superson challenges the traditional picture of the skeptic who asks Why be moral While holding that the skeptic's position is important she builds an argument against it by understanding it more deeply and then shows what it would take to successfully defeat it Superson argues that we must defeat not only the action skeptic but the disposition skeptic who denies that being morally disposed is rationally required and the motive skeptic who believes that merely going through the motions in acting morally is rationally permissible We also have to address the amoralist who is not moved by moral reasons he recognizes Superson argues for expanding the skeptic's position from self interest to privilege to include morally unjustified behavior targeting disenfranchised social groups as well as revising the traditional expected utility model to exclude desires deformed by patriarchy as irrational Lastly she argues that the challenge can be answered if it can be shown that it is in an important way inconsistent and therefore irrational to privilege oneself over others The Moral Skeptic makes an important contribution to both metaethics moral theory and feminist philosophy and brings feminist thinking into the larger discussion of the skeptical challenge
