**Europe from Below** Tuuli Lähdesmäki, Katja Mäkinen, Viktorija Linda Aldona Čeginskas, Sigrid Kaasik-Krogerus, 2021-03-15 In this book Tuuli Lähdesmäki, Katja Mäkinen, Viktorija Linda Aldona Čeginskas and Sigrid Kaasik-Krogerus scrutinize how people who participate in cultural initiatives funded and governed by the European Union understand the idea of Europe. The book focuses on three cultural initiatives: the European Capital of Culture, the European Heritage Label, and a European Citizen Campus project funded through the Creative Europe programme. These initiatives are examined through field studies conducted in 12 countries between 2010 and 2018. The authors describe their approach as ethnography of Europeanization and conceptualize the attempts at Europeanization in the European Union's cultural policy as politics of belonging.

**Everybody's Autobiography** Gertrude Stein, 2013-03-13 Alice B. Toklas wrote hers and now everybody will write theirs. In 1933 Gertrude Stein's *The Autobiography of Alice B. Toklas* skyrocketed to the top of the bestseller lists and the author found herself a celebrity. *Everybody's Autobiography* is the very Steinian account of her soul-satisfying next five years in France, England, and America where she made a triumphant tour of the country. Here are Stein's devastating analyses of some of the major figures of the day whom she met among them Dashiell Hammett, Charlie Chaplin, Pablo Picasso, Marianne Moore, Mrs. Roosevelt, and Sherwood Anderson, and also of her own life and work. *Everybody's Magazine*, 1914

**Biotechnology - The Science and the Business** Derek G. Springham, Vivian Moses, Ronald E. Cape, 2020-08-18 Biotechnology has not stood still since 1991 when the first edition of *Biotechnology: The Science and the Business* was published. It was the first book to treat the science and business of technology as an integrated subject and was well received by both students and business professionals. All chapters in this second edition have been updated and revised, and some new chapters have been introduced, including one on the use of molecular genetic techniques in forensic science. Experts in the field discuss a range of biotechnologies, including pesticides, the flavor and fragrance industry, oil production, fermentation, and protein engineering. On the business side, subjects include managing, financing, and regulation of biotechnology. Some knowledge of the science behind the technologies is assumed, as well as a layperson's view of buying and selling. As with the first edition, it is expected that this book will be of interest to biotechnology undergraduates, postgraduates, and those working in the industry, along with students of business, economics, intellectual property law, and communications.

**German Reunification** Frédéric Bozo, Andreas Rödder, Mary Elise Sarotte, 2016-08-05 This book provides a multinational history of German reunification based on empirical work by leading scholars. The reunification of Germany in 1989-90 was one of the most unexpected and momentous events of the twentieth century. Embedded within the wider process of the end of the Cold War, it contributed decisively to the dramatic changes that followed the end of the division of Europe, the collapse of the Warsaw Pact, the origins of NATO's eastward expansion, and not least the creation of the European Union.

Based on the wealth of evidence that has become available from many countries involved and relying on the most recent historiography this collection takes into account the complex interaction of multinational processes that were instrumental in shaping German reunification in the pivotal years 1989-90. The volume brings together renowned international scholars whose recent works based on their research in multiple languages and sources have contributed significantly to the history of the end of the Cold War and of German reunification. The resulting volume represents an important contribution to our knowledge and understanding of a significant chapter in recent history. This book will be of much interest to students of German politics, Cold war history, international and multinational history and IR in general.

The Evolution of Law and the State in Europe Spyridon Flogaitis, 2014-11-06. Most books about public power and the state deal with their subject from the point of view of legal theory, sociology or political science. This book, without claiming to deliver a comprehensive theory of law and state, aims to inform by offering a fresh reading of history and institutions, particularly as they have developed in continental Europe and European political and legal science. Drawing on a remarkably wide range of sources from both Western and Eastern Europe, the author suggests that only by knowing the history of the state and state administration since the twelfth century can we begin to comprehend the continuing importance of the state and public powers in modern Europe. In an era of globalization when the importance of international law and institutions frequently lead to the claim that the state either no longer exists or no longer matters, the truth is in fact more complex. We now live in an era where the balance is shifting away from the struggle to build states based on democratic values towards fundamental values existing above and beyond the borders of nations and states under the watchful gaze of judges bound by the rule of law.

**The Transformation of Citizenship, Volume 2** Jürgen Mackert, Bryan S. Turner, 2017-03-16. This volume, *Boundaries of Inclusion and Exclusion*, examines the many different and newly emerging ways in which citizenship refers to spatial, symbolic and social boundaries. Today, in the context of citizenship, we face processes of inclusion and exclusion on national and supranational level but no less on the level of groups and individuals. The book addresses these different levels and discusses processes of inclusion and exclusion with regard to spatial, social and symbolic boundaries, referring to such different problems as political participation, migration or identity with regard to religion or the EU. This book will appeal to academics working in the field of political theory, political sociology and European studies.

National Action Plan highlighting the policies being pursued to improve economic growth and increase employment The Committee sets out a number of recommendations to further push forward the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal market that Member States should influence one another in the development of good practice through statistical comparison of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile
