Hugh Chisholm,James Louis Garvin,1926      **Journey to the Moon** Jules Verne,2025-06-14 How many things dismissed out  
of hand yesterday turn out to be true tomorrow Written in the first half of the career of Jules Verne the twin volumes of *From*  
*the Earth to the Moon* and *Around the Moon* tell the daring story of the Journey to the Moon aboard an American projectile  
blown into the skies by gunpowder A powerfully innovative tale it introduces such paradigm revolutions as escape velocity  
weightlessness slingshot trajectories and ocean splashdowns Through its inimitable blend of science humour and verbal  
brilliance it has fired generations of writers and astronauts into the space age This new edition translated annotated and  
presented by David Coward and William Butcher is the only one to appear as the author wished It contains a wealth of  
discoveries including Verne s sources and ideological and stylistic disagreements with his publisher ABOUT THE SERIES For  
over 100 years Oxford World s Classics has made available the widest range of literature from around the globe Each  
affordable volume reflects Oxford s commitment to scholarship providing the most accurate text plus a wealth of other  
valuable features including expert introductions by leading authorities helpful notes to clarify the text up to date

Moon Louis Proud,2013-12-01 The Moon is not a cold dead rock but a rich fascinating world just as alive as Earth  
Investigates the Moon as the home of an alien intelligence who controls humanity Examines several of NASA s Apollo  
missions and the findings they concealed Reveals the many holes in the Giant Impact theory about the Moon s origins and the  
evidence for a hollow artificial Moon Explores the deep influence of the Moon on the collective mind of humanity and occult  
teachings about the Moon from the Qabbalah tarot and other sources Despite being the most prominent celestial body after  
the Sun the Moon has many qualities that science has yet to explain Lunar rock samples reveal the Moon once had a  
magnetic field like the Earth and seismic experiments by NASA suggest the Moon is at least partially hollow For centuries  
people have observed lights moving clouds and shadows and even the disappearance of entire craters via telescope Apollo  
astronauts repeatedly felt the presence of a non human intelligence during their Moon visits and many indigenous traditions  
speak of malevolent visitors from the Moon A growing body of astrophysical and geological evidence shows the Moon is not  
an entirely natural world that someone or something altered it long ago Louis Proud explores the phases and movements of  
the Moon along with its ancient and mysterious features its craters maria rilles tunnels and domes He examines several of  
NASA s Apollo missions showing not that NASA faked the Moon expeditions but that they concealed what the astronauts  
found there He explains the many holes in the commonly accepted Giant Impact theory of the Moon s origins and reveals the

evidence for a hollow artificial Moon placed in orbit eons ago to observe Earth Examining the deep influence of the Moon on the collective mind of humanity Proud looks at what the Qabbalah the tarot and other occult traditions say about the Moon and interprets G I Gurdjieff's teachings that we are food for the Moon He investigates the Moon as a gateway to another realm as the Purgatory of Christianity and as the home of an alien intelligence who controls and exploits humanity Examining the Moon from both scientific and esoteric perspectives Proud shows the Moon is not a cold dead rock but a rich fascinating world just as alive as Earth
