**The License Giver**

**Business Concept of Technological Innovation** Lex A. van Gunsteren, Arnold G. Vlas, 2022-03-04 Innovation is one of the avenues in which companies can move up the value chain and has become a popular demand from stock markets and governments. Many of its proponents though lack insight as to what it takes to be an innovator and instead hype and impel innovation based on a romanticized view that with enough willpower and support from a board, investors or government every company can pursue innovation. This book offers a theoretical framework, the License Giver Business concept that clarifies the core characteristics of a truly innovating company and differentiates it from three other company archetypes with differing core business identities. It describes key aspects and pitfalls in the practical application of the License Giver Business concept and provides cases from the marine industry and computer industry.

**Journey to Improvement** Alicia Grunow, Sandra Park, Brandon Bennett, 2024-04-24 The challenges we face in education, health care and social welfare are multifaceted, reflecting the complex systems in which we live. Out of urgency and often the best of intentions, organizations implement new policies, technologies and other innovations to tackle these issues and hope for the best. However, addressing these challenges requires more than heroic individuals with silver bullet solutions. We need teams with diverse expertise that know how to learn together and use their collective knowledge to redesign our social systems for the improved well-being of our communities. Journey to Improvement serves as a road map for teams that are ready to follow a different path to better outcomes. Drawing on their decades of on-the-ground experience, the authors walk teams through the phases of an improvement journey from launching the team to trying ideas in practice to spreading those that work. This book highlights the personal, relational and technical aspects of taking an improvement science approach and illustrates these ideas through real-world examples from across the social sector and around the world.
