No Study Without Struggle Leigh Patel, 2021-07-20 Examines how student protest against structural inequalities on campus pushes academic institutions to reckon with their legacy built on slavery and stolen Indigenous lands Using campus social justice movements as an entry point Leigh Patel shows how the struggles in higher education often directly challenged the tension between narratives of education as a pathway to improvement and the structural reality of settler colonialism that creates and protects wealth for a select few Through original research and interviews with activists and organizers from Black Lives Matter The Black Panther party the Student Nonviolent Coordinating Committee the Combahee River Collective and the Young Lords Patel argues that the struggle on campuses reflect a starting point for higher education to confront settler strategies She reveals how blurring the histories of slavery and Indigenous removal only traps us in history and perpetuates race class and gender inequalities By acknowledging and challenging settler colonialism Patel outlines the importance of understanding the relationship between the struggle and study and how this understanding is vital for societal improvement

Way Up North in Louisville Luther Adams, 2010-11-29 Luther Adams demonstrates that in the wake of World War II when roughly half the black population left the South seeking greater opportunity and freedom in the North and West the same desire often anchored African Americans to the South Way Up North in Louisville explores the forces that led blacks to move to urban centers in the South to make their homes Adams defines home as a commitment to life in the South that fueled the emergence of a more cohesive sense of urban community and enabled southern blacks to maintain their ties to the South as a place of personal identity family and community This commitment to the South energized the rise of a more militant movement for full citizenship rights and respect for the humanity of black people Way Up North in Louisville offers a powerful reinterpretation of the modern civil rights movement and of the transformations in black urban life within the interrelated contexts of migration work and urban renewal which spurred the fight against residential segregation and economic inequality While acknowledging the destructive downside of emerging postindustrialism for African Americans in the Jim Crow South Adams concludes that persistent patterns of economic and racial inequality did not rob black people of their capacity to act in their own interests
