Not So New Labour:

New Labour's State of Health Calum Paton, 2017-05-15 In this timely and unique work Calum Paton assesses the political economy and politics of current health policy in order to explain the underlying causes of problems in the National Health Service Debates from political theory political economy and public administration are used to examine health policy made and implemented by New Labour since their election victory in 1997 The author argues that the fundamental nature of health policy is dependent upon the prevailing regime in political economy and also that policy overload contradictions and confusion have rendered the task of coherent implementation very difficult Although there is implicit comparison the primary focus is England within the UK post devolution and the book provides a detailed examination of contemporary health policy Written by an established scholar in the field it will particularly interest academics post graduate students and professionals in health policy social policy and politics

Understanding Disability Policy Alan Roulstone, Simon Prideaux, 2012-01-18 In an era of scarce social resources the question of the changing social policy constructions and responses to disabled people has become increasingly important Paradoxically some disabled people are realising new freedoms and choices never before envisioned whilst others are prey to major retractions in public services and aggressive attempts to redefine who counts as genuinely disabled Understanding disability policy locates disability policy into broader social policy and welfare policy writings and goes beyond narrow statutory evaluations of welfare to embrace a range of indicators of disabled people s welfare The book critically explores the roles of social security social support poverty socio economic status community safety official discourses and spatial change in shaping disabled people s opportunities It

also situates welfare and disability policy in the broader conceptual shifts to the social model of disability and its critics Finally it explores the possible connection between changing official and academic constructions of disability and their implications for social policy in the 21st century The book is supported by a companion website containing additional materials for both students and lecturers using the book which is available from the link above

Education and Race from Empire to Brexit Sally Tomlinson, 2019-03-27 Covering the period from the height of Empire to Brexit and beyond this book shows how the vote to leave the European Union increased hostilities towards racial and ethnic minorities and migrants Concentrating on the education system it asks whether populist views that there should be a British identity or a Scottish Irish or Welsh one will prevail Alternatively arguments based on equality human rights and economic needs may prove more powerful It covers events in politics and education that have left most white British people ignorant of the Empire the often brutal de colonisation and the arrival of immigrants from post colonial and European countries It discusses politics and practices in education race religion and migration that have left schools and universities failing to engage with a multiracial and multicultural society

Education Policy and Social Reproduction John Fitz, Brian Davies, John Evans, 2005-11-16 This book takes a theoretically informed look at British education policy over the last sixty years when secondary schooling for all children became an established fact for the first time Comprehensive schools largely replaced a system based on academic selection Now under choice and competition policies all schools are subject to the rigours of local education markets What impact did each of these successive policy frameworks have on structures of opportunities for families and their children How and to what extent was the experience of secondary school students shaped and what influenced the qualifications they obtained and their life chances after schooling The authors locate their work within two broad strands in the sociology of education Basil Bernstein s work on the realisation of power and control in and through pedagogic discourse and social reproduction provides a theoretical framework for exploring the character of and continuities and change in education and training policies The book is an important contribution to debates about the extent to which education is a force for change in class divided societies The authors also set out to re establish social class at the centre of educational analysis at a time when emphasis has been on identity and identity formation arguing for their interdependence This book will be an important resource for students policy analysts and policymakers wishing to think through and understand the longer term impact of programmes that have shaped secondary schooling in Britain and elsewhere

one of the world's leading progressive political philosophers Ted Honderich examines ideology and reality in British and American politics in order to establish the true distinctions of conservatism. Conservatives often claim to believe in reform but not change to rely on instinct rather than abstract theories. So what is the conservative rationale? Does conservatism have a philosophical founding principle that unifies it? Ted Honderich's search for the fundamental principle of conservatism is an enlightening one. He examines influential thinkers in the conservative tradition from Edmund Burke and Adam Smith to Michael Oakeshott and Robert Nozick. He brings rigorous analytic philosophy to bear on the Republican party in the United States and the Conservative party and the New Labour party in Britain. **Community Resilience** Katy Wright, 2021-11-29

This book provides an alternative perspective on community resilience drawing on critical sociological and social policy insights about how people individually and collectively cope with different kinds of adversity. Based on the idea that resilience is more than simply an invention of neoliberal governments, this book explores diverse expressions of resilience and considers what supports and undermines people's resilience in different contexts. Focusing on the United Kingdom, it examines the contradictions and limitations of neoliberal resilience policies and the role of policy in shaping how vulnerabilities are distributed and how resilience is manifested. The book explores different types of resilience including planning, response, recovery, adaptation and transformation which are examined in relation to different types of threat such as financial hardship, disasters and climate change. It argues that resilience cannot act as an antidote to vulnerability and aims to demonstrate the importance of shared institutions in underpinning resilience and in preventing socially created vulnerabilities. It will be of interest to academics, students and well-informed practitioners working with the concept of resilience within the subject areas of Sociology, Social Policy, Human Geography, Environmental Humanities and International Development. *The*
