Ralph L. Dietl,2018-08-15 The Nuclear and Space Talks revolutionized arms control The Cold War endgame commenced with the umbrella negotiations that linked START and INF negotiations to a regulation on the weaponization of space This volume reveals a US grand strategy to replace deterrence with a collective security order An entente of the superpowers was needed to transform bipolarity The US planned the replacement of mutually assured destruction by mutually assured security A global astrodome was to protect a nuclear disarmed world The Franco German special relationship in European affairs had to be amended by a US SU special relationship to replace classic bloc politics The Reagan Administration planned a global zero agenda a joint development of a global protective system and a creation of a Common House of Europe In brief the superpowers prepared the velvet revolution that eliminated the Cold War structures Neither containment nor convergence offers a valid explanation of the Cold War endgame Co creation is the key to decipher the end of the Cold War NATO Europe challenged the transformation of bipolarity The European NWS resisted to a multilateralization of strategic arms control In Europe the classic Cold War thinking survived the fall of the Iron Curtain European conservatism contributed to the geopolitical catastrophe of the first order the downfall of the Soviet Union The Reagan Administration developed a Grand Strategy to end the Cold War The US SU co creation of an astrodome was meant to ease a global zero agenda A global collective security structure under the United Nations was to replace deterrence The superpower project collapsed due to the penetration of US decision making by NATO Allies The European NWS totally objected to a multilateralization of strategic arms control to preserve their relative position in the international system

*Concrete Critical Theory: Althusser's Marxism*

William S. Lewis,2021-12-06 Taking an analytic and historical approach this work develops and defends Althusserian critical theory This theory it is argued produces knowledge of how a particular class of people in a particular time in a particular place is dominated oppressed or exploited Moreover without relying on a general notion of human emancipation concrete critical theory can suggest political means for the alleviation of these conditions Because it puts Althusser's ideas in dialogue with contemporary social science and philosophy the book as a whole makes contributions to Althusser studies to Anglo American political philosophy and to current debates in the philosophy of the social sciences

[State Succession and Commercial Obligations](#) Tai-Heng Cheng, 2006-07-19 State Succession and Commercial Obligations sets out to answer once and for all the age old question Do commercial obligations survive state succession Tai Heng Cheng accomplishes this goal via careful analyses of efforts by the United Nations to codify the law of state succession as well as of recent state successions involving East Timor Hong Kong Macau Yugoslavia Czechoslovakia and the Soviet Union The insightful text identifies a common thread running through these seemingly disparate events Because of globalization and

our interdependence transnational decision makers have collectively shaped international law to protect the international infrastructure from being disrupted by state succession and to protect entities from being debilitated by post succession obligations State Succession and Commercial Obligations makes another major breakthrough by showing that the policy considerations and decision making processes are similar in both state and government successions Unlike prior theories that were bound by technical distinctions between state and government succession this book s approach helps decision makers bring order to both state and government successions that continue to be problematic today such as the regime changes in Iraq Afghanistan and Kosovo State Succession and Commercial Obligations is the only major treatise in fifty years to appraise the global development of the law of state succession and commercial obligations This treatise is indispensable to legal scholars seeking to understand contemporary international law judges and arbitrators adjudicating succession disputes and transactional and trial lawyers representing financial institutions corporations and states when succession is imminent or has occurred Because this book distills complex legal concepts into elegant ideas it is also fascinating reading for a general audience that has an interest in global affairs and the transformative successions since the end of the Cold War Published under the Transnational Publishers imprint
