A Bibliography of Paleozoic Crustacea from 1698 to 1889, Including a List of North American Species and a Systematic Arrangement of Genera Anthony Wayne Vogdes, 1890 *Paleozoic Perspectives: a Paleontological Tribute to G. Arthur Cooper* J. Thomas Dutro, 1971 This collection of papers was solicited from colleagues and students of G Arthur Cooper as a Festschrift in recognition of his profound influence on the study of brachiopods and their biostratigraphic application to geologic problems especially in the Paleozoic Era Dr Cooper initiated a period of growth in both the research staff and the National Collections of Fossils that guided the Smithsonian Institution to its present position of leadership in paleontological research His own superb studies of fossil and living brachiopods are unsurpassed in breadth and paleontological significance Mainly through his efforts the Smithsonian has acquired an outstanding reference collection of invertebrate fossils that is the envy of the scientific community The Toarcian Oceanic Anoxic Event in the South Iberian Palaeomargin Matías Reolid, José Miguel Molina, Luis Miguel Nieto, Francisco Javier Rodríguez-Tovar, 2017-09-05 This book presents the first overview of the Toarcian Oceanic Anoxic Event in the southern Iberian paleomargin in the western Tethys The study of catastrophic events that affected the ecosystems in the past is of great interest because it offers the possibility of establishing models that can be applied to current and future environmental changes The book provides comprehensive information on the changes in marine ecosystems in connection with a global massive extinction the Early Toarcian and with the deposition of black shales global warming and a disruption of the carbon cycle In addition the book describes the incidence of this event in this part of the Tethys close to the connection with the Protoatlantic the Hispanic Corridor Special attention is paid to sedimentological and ichnological aspects fossil content macroscopic and microscopic and geochemistry It also presents the facies changes related to fragmentation of the shelf and the evolution to hemipelagic troughs and swells in this paleomargin Lastly it characterizes this anoxic event in under researched outcrops from southern Spain and compares the findings with those in well known sections from northern and central Europe This book offers a unique resource for all researchers interested in the Toarcian Oceanic Anoxic Event but also in oceanic anoxic events that occurred during the Mesozoic in general because of their similarity to recent climatic changes **Geological Survey Professional Papers**, 1968 Geological Survey Professional Paper Geological Survey (U.S.), 1960 Index of the Journal of Paleontology Richard D. sea fauna biogeography palaeobiogeography biostratigraphy and exploration all concerning Ostracoda The last decade has witnessed a spectacular renewal of interest in the study of Ostracoda particularly in the evolutionary biology of Ostracoda including speciation Ostracoda are unique ranging in age from the Cambrian period to modern times with carapaces ready to be preserved as fossils providing various lines of invaluable evidence regarding evolutionary processes More than 120 participants from 20 countries assembled at the Ninth International Symposium on Ostracoda and this book is a collection of all the papers presented at the Symposium plus selected papers submitted by non attending members It presents an outstanding record of much pioneering research and will be of interest to specialists in Ostracoda as well as all earth and life scientists concerned with evolution Its value is further enhanced by easy to use indexes of authors localities and taxa
