Early Modern Poetics in Melville and Poe William E. Engel, 2016-04-29 Bringing to bear his expertise in the early modern emblem tradition William E Engel traces a series of self reflective organizational schemes associated with baroque artifice in the work of Herman Melville and Edgar Allan Poe While other scholars have remarked on the influence of seventeenth century literature on Melville and Poe this is the first book to explore how their close readings of early modern texts influenced their decisions about compositional practice especially as it relates to public performance and the exigencies of publication Engel's discussion of the narrative structure and emblematic aspects of Melville's *Piazza Tales* and Poe's *The Raven* serve as case studies that demonstrate the authors debt to the past Focusing principally on the overlapping rhetorical and iconic assumptions of the Art of Memory and its relation to chiasmus Engel avoids engaging in a

simple account of what these authors read and incorporated into their own writings Instead through an examination of their predisposition toward an earlier model of pattern recognition he offers fresh insight into the writers understandings of mourning and loss their use of allegory and what they gained from their use of pseudonyms **Venice** Dennis Romano,2023-12-21 Venice one of the world s most storied cities has a long and remarkable history told here in its full scope from its founding in the early Middle Ages to the present day A place whose fortunes and livelihoods have been shaped to a large degree by its relationship with water Venice is seen in Dennis Romano s account as a terrestrial and maritime power whose religious social architectural economic and political histories have been determined by its unique geography **The Classical Tradition** Michael Silk,Ingo Gildenhard,Rosemary Barrow,2017-11-06 Reorganizes the field and challenges our preconceptions in both familiar areas and in disciplines that are not usually treated in studies on the classical tradition A must read Craig Kallendorf Texas A the role of translation the intricate relationship of pagan and Christian the ideological implications of the classical tradition the interplay between the classical tradition and the histories of scholarship and education the relation between high and low culture and the myriad complex relationships comparative contrastive and interactive between art literature and thought themselves Authoritative and accessible The Classical Tradition Art Literature Thought offers new insights into the powerful legacy of the ancient world from the Middle Ages and the Renaissance to the present day *Widowhood and Visual Culture in Early Modern Europe* Allison Levy,2017-07-28 Whereas recent studies of early modern widowhood by social economic and cultural historians have called attention to the often ambiguous yet also often empowering experience and position of widows within society Widowhood and Visual Culture in Early Modern Europe is the first book to consider the distinct and important relationship between ritual and representation The fifteen new interdisciplinary essays assembled here read widowhood as a catalyst for the production of a significant body of visual material representations of for and by widows whether through traditional media such as painting sculpture and architecture or through the so called minor arts including popular print culture medals religious and secular furnishings and ornament costume and gift objects in early modern Austria England France Germany Italy and Spain Arranged thematically this unique collection allows the reader to recognize and appreciate the complexity and contradiction iconicity and mutability and timelessness and timeliness of widowhood and representation Science and the Arts Jacob Oppen,1973 Deals with the philosophical implications of natural science in the various humanistic disciplines during the 17th 18th and 19th centuries Remarkable in combining and relating numerous disparate disciplines in the arts and sciences Tales from the Buzzard Leighton Buzzard Writers,2010-09-26 Local writers share stories and poems inspired by Leighton Buzzard This unique book showcases local writing talent and culture history and nature in this Bedfordshire market town *A Superficial Reading of Henry James* Thomas J. Otten,2006 Do the surfaces matter In this provocative book A Superficial Reading of Henry James Preoccupations with the Material World Thomas J Otten demonstrates that surfaces matter profoundly Taking seriously the

accessories of Henry James's fiction the china and bric a brac the antique cabinets and tapestries the ribbons and hats this book argues that James's famous ambiguity is a material state an indeterminate zone where the difference between essence and ornament disappears Ranging between fictions as well known as *The Portrait of a Lady* whose heroine is celebrated for her psychological complexity and ones as understudied as *Rose Agathe* whose heroine is a hairdresser's manikin Otten suggests that the distinction between what counts as thematic depth and what counts as physical surface is for James impossible to maintain Achieving a superficial reading of Henry James means demonstrating the persistence of the material within the novelist's most conceptual formations of meaning an argument with important consequences for literary theory as Otten shows in his concluding chapters Eloquently written and guided by a perverse love for the superfluous detail this book makes an important contribution to a fast growing area of the humanities one newly committed to the serious study of material culture the concrete experiences of everyday life and the history of the physical senses Book jacket

A City's Architecture William Alvis Brogden, 2016-12-05 When considering the successful design of cities the focus tends to be on famous examples such as Paris or Rome with equally successful but smaller and more remote examples being ignored In addition the more diffuse patterns of settlement of the north and western parts of Europe are hardly considered at all in comparison to the tightly formed urban centres of the Mediterranean However the diffuse town region is typical of our time whatever the location By analysing the development of a successful small city of ancient foundation which grew from a diffuse long settled and dense landscape then demonstrated a slow growth as a tight urban form before an early adoption of the designed landscape as town lessons can be learned These lessons may be useful in addressing the nature and growth of any city or city region The story of Aberdeen is just such an example Not only are the materials for its long history present its relations and concerns with the wider world are also well attested and many of the ideas which directed or significantly impinged on the design of cities were tested there or had their origin there As its form accumulated and developed over such a long time Aberdeen also suggests the idea of an architecture of the city This book examines the development and design of a city from three inescapable aspects its location and character of the landscape its own particular history of development and its cultural responses to various waves of thought

Architectural Design and Regulation Rob Imrie, Emma

Street,2011-01-21 From the earliest periods of architecture and building architects actions have been conditioned by rules regulations standards and governance practices These range from socio cultural and religious codes seeking to influence the formal structure of settlement patterns to prescriptive building regulations specifying detailed elements of design in relation to the safety of building structures In Architectural Design and Regulation the authors argue that the rule and regulatory basis of architecture is part of a broader field of socio institutional and political interventions in the design and development process that serve to delimit and define the scope of the activities of architects The book explores how the practices of architects are embedded in complex systems of rules and regulations The authors develop the understanding that the rules and regulations of building form and performance ought not to be counterpoised as external to creative processes and practices but as integral to the creation of well designed places The contribution of Architectural Design and Regulation is to show that far from the rule and regulatory basis of architecture undermining the capacities of architects to design they are the basis for new and challenging activities that open up possibilities for reinventing the actions of architects

Inspections and Reports on Dwellings: Assessing Age Philip Santo,2013-06-26 Identifying the age of a property is a fundamental step in understanding its form of construction and in being prepared to differentiate between the characteristic defects of that age of property and defects which are more unusual and may warrant particular care in investigation and assessment This second edition of Inspections and Reports on Dwellings Assessing Age updates the market context within which surveyors and valuers are now operating In particular it has a new section on post 2000 properties reflecting the profound impact of Government policies and environmental concerns on the modern urban landscape The book is divided into thirteen age bands with over seventy color photographs of dwellings for each period A commentary on each age band outlines the social environmental and technical influences on properties being built at the time helping to explain why they look as they do A broad range of dwellings is covered large and small private and public sector old and new and particular features which help to place a dwelling within one of the defined periods are highlighted in comments on the photographs This book is intended for all those engaged in inspecting dwellings whether experienced newly qualified or studying for appropriate qualifications to become members of professional institutions
