### **Palm And The Pleiades Initiation And Cosmology In Northwest Amazonia:**

The Palm and the Pleiades Stephen Hugh-Jones, 1988-03-31 When it was first published in 1979 this book together with its companion volume *From the Milk River* by Christine Hugh Jones was hailed as setting a new standard for South American ethnographers one to be emulated *Third World Quarterly* Both are now available for the first time in paperback The book is an extended study in English of Amazonian ritual Through an analysis of a secret men s cult widespread throughout Northwest Amazonia Hugh Jones builds up a general picture of a South American Indian society and of a religious and cosmological system that is common to a large area of Northwest Amazonia The book is also an exercise in the anthropological interpretation of ritual myth and religious symbolism from a structuralist point of view **Amerindian**

**Socio-Cosmologies between the Andes, Amazonia and Mesoamerica** Ernst Halbmayer, 2020-01-10 This book offers a new anthropological understanding of the socio cosmological and ontological characteristics of the Isthmo Colombian Area beyond established theories for Amazonia the Andes and Mesoamerica It focuses on a core region that has been largely neglected by comparative anthropology in recent decades Centering on relations between Chibchan groups and their neighbors the contributions consider prevailing socio cosmological principles and their relationship to Amazonian animism and Mesoamerican and Andean analogism Classical notions of area homogeneity are reconsidered and the book formulates an overarching proposal for how to make sense of the heterogeneity of the region s indigenous groups Drawing on original fieldwork and comparative analysis the volume provides a valuable anthropological addition to archaeological and linguistic knowledge of the Isthmo Colombian Area *Amazonian Indigenous Cultures in Art and Anthropological Exhibitions* Cinthya

Lana, 2022-07-05 The book discusses the representation of Amazonian indigenous cultures in art and anthropological exhibitions through the analysis of a series of case studies of temporary exhibitions taking place in museums and biennials in Brazil Europe and the United States spanning a period of 25 years from the mid 1980s The book puts forward the concept of minor curating as a strategy to amplify access to collections of historical relevance for indigenous peoples and to enable them to develop projects that are politically historically and culturally meaningful for their own societies through curatorial authorship **The Anthropology of Numbers** Thomas Crump, 1992-10-15 Numbers are an important feature of almost all

known cultures In this detailed anthropological study Thomas Crump examines how people from a wide range of diverse cultures and from different historical backgrounds use and understand numbers By looking at the logical psychological and linguistic implications he analyses how numbers operate within different contexts The author goes on to consider the relationship of numbers to specific themes such as ethnohistory politics measurement time money music games and architecture *The Anthropology of Numbers* is an original contribution to scholarship written in a clear and accessible style It will be of interest to anthropologists who study cognition symbolism primitive thought and classification and to those in adjacent disciplines of psychology cognitive science and mathematical social science **Welsh Mythology** Jonathan

Miles-Watson, 2009 A little known lecture by L vi Strauss is the inspiration for this work In this lecture he intuitively suggested that in medieval Europe there once existed a set of myths centred on the grail which are structurally the opposite of the goatsucker myths that he famously analyzed in his mythologiques series This work uses L vi Strauss inspirational lecture as a launchpad for an exploration of a group of related medieval Welsh myths two of which have been briefly considered previously by L vi Strauss himself The root of the methodological approach this book employs throughout is the Structuralism of Claude L vi Strauss however it has been modified to incorporate the suggestions of later neo Structuralists This analysis tool is applied to a group of myths which have become conveniently if somewhat erroneously known as the Mabinogion The name Mabinogion appears as part of a colophon at the end of one of the myth of Pwyll and it was later adopted first by Pugh 1835 and then by Lady Charlotte Guest 1838 as a title for their now famous translations of Welsh mythology Consequently the title has stuck to describe the material that is contained within their translations and while it is a somewhat inaccurate way to describe the myths it has the virtues of being both a succinct and widely recognised signifier The term has come to signify eight myths or perhaps more accurately eight groups of myths which are all present in the late fourteenth century manuscript Llyfr Coch Hergest The Red Book of Hergest and all but one of which can be found in the slightly earlier Llyfr Gwyn Rhydderch The White Book of Rhydderch As such the Mabinogion is the key collection of medieval Welsh mythology and an important source for early Arthurian material Although Structuralism and the Mabinogion have attracted a good deal of attention from the academic world there has been never been a sustained attempt to follow Levi Strauss intuitive insights with a methodical Structuralist analysis of this material In the year of L vi Strauss centenary celebrations this work is the first sustained attempt to follow his intuitive suggestions about several Mabinogion myths with a detailed Structuralist analysis of the Mabinogion This work is therefore a unique anthropological presentation and analysis of the Mabinogion which argues for a radical new interpretation of these myths in light of the existence of a central system of interlocking symbols that has the Grail at its heart Through the analysis the book reveals a logical organizational principle that underlies a body of material that has previously been viewed as disparate and confusing This underlying structure is demonstrated to be as L vi Strauss suggested it may the opposite of that which L vi Strauss himself uncovered in the Americas The revelation of this new form of underlying structure leads to a rethinking of some important aspects of Structuralism including the Canonical formula at the same time as acting as a tribute to the farsightedness of L vi Strauss This book makes important contributions to the fields of Arthurian studies anthropology Celtic studies cultural studies medieval studies mythology and religious studies

**Anthropological Practice** Judith Okely, 2013-05-09 Anthropologists are increasingly pressurised to formulate field methods for teaching Unlike many hypothesis driven ethnographic texts this book is designed with the specific needs of the anthropology student and field researcher in mind with particular emphasis on the core anthropological method long term participant observation Anthropological Practice explores fieldwork

experiences unique to anthropology and provides the context by which to explain and develop practice based and open ended methodology It draws on dialogues with over twenty established and younger anthropologists whose fieldwork spans the late 1960s to the present day taking place in locations as diverse as Europe India Malaysia Indonesia Africa Iran Afghanistan North and South America Revealing first hand and hitherto unrecorded aspects of fieldwork Anthropological Practice provides critical systematic ways to enhance anthropological and alternative knowledge It is an essential text for anthropology students and researchers and for all disciplines concerned with ethnography Interviewees include Paul Clough Roy Gigengack Louise de la Gorgendi re Suzette Heald Michael Herzfeld Signe Howell Felicia Hughes Freeland Ignacy Marek Kaminski Margaret Kenna Raquel Alonso Lopez Malcolm Mcleod Brian Morris H l ne Neveu Kringelbach Akira Okazaki Joanna Overing Jonathan Parry Carol Silverman Mohammad Talib Nancy Lindisfarne Tapper Sue Wright Helena Wulff Joseba Zulaika

*Amazonian Indians from Prehistory to the Present* Anna Roosevelt, 2022-05-10 Amazonia has long been a focus of debate about the impact of the tropical rain forest environment on indigenous cultural development This edited volume draws on the subdisciplines of anthropology to present an integrated perspective of Amazonian studies The contributors address transformations of native societies as a result of their interaction with Western civilization from initial contact to the present day demonstrating that the pre and postcontact characteristics of these societies display differences that until now have been little recognized

Ladislav Holý,1986 Analyzes the changes in the kinship patterns of the Toka of South Zambia as they shifted their form of production from hoe agriculture to ox drawn plowing Confronts several theoretical issues of current anthropology including the nature of descent and the distinction and relationship between descent groups and categories **A Reference**

**Grammar of Kotiria (Wanano)** Kristine Stenzel,2013-07-01 Published through the Recovering Languages and Literacies of the Americas initiative supported by the Andrew W Mellon Foundation This volume is the first descriptive grammar of Kotiria Wanano a member of the eastern Tukanoan language family spoken in the Vaupes River basin of Colombia and Brazil in the northwest Amazon rain forest The Kotirias who have lived in this remote region for more than seven hundred years participate in the complex Vaup s social system characterized by long standing linguistic and cultural interaction The Kotirias remained relatively isolated from the dominant societies until the early part of the twentieth century when increasing outside influence in the region triggered rapid social and linguistic change Today the Kotirias number only about sixteen hundred people and their language though still used in traditional communities is in risk of becoming endangered Kristine Stenzel draws on eight years of intensive work with the Kotirias to promote record and revitalize their language Working with dozens of native speakers and drawing on numerous oral narratives and written texts this book is the first comprehensive study of this endangered language and one of the few reference grammars of this language family *From Primitive to Postcolonial*

*in Melanesia and Anthropology* Bruce M. Knauff,1999 A prominent scholar surveys the special place of Melanesia in our understanding of human cultural variation **Sex and Violence** Penelope Harvey,Peter Gow,2013-12-02 First published in 1994 Routledge is an imprint of Taylor Francis an informa company **Conceptualizing Society** Adam Kuper,2002-03-11 The social anthropologists represented in this volume share the view that together ethnography and theoretically informed comparison constitute a single plausible enterprise and they reject both the postmodernist criticism of ethnography as epistemologically problematic and the opposing view that no theory could possibly do justice to the insights and complex descriptions of ethnography In this volume the first papers taken from the first conference of the newly formed European Association of Social Anthropologists the contributors discuss the various models at the disposal of the modern ethnographer Their concerns range through structuralism postmodernism and world systems theory and the volume as a whole offers a lively account of the state of general theory in social anthropology today **Nature: Thinking the natural** David

Inglis,John Bone,Rhoda Wilkie,2005 Amazon Fruits: An Ethnobotanical Journey Nigel Smith,2023-09-26 This is the first comprehensive listing of Amazon fruits from an ethnobotanical perspective This detailed book covers 50 botanical families 207 species in the Amazon including how the people of each region use them It is lavishly illustrated with high quality photographs taken by the author an extensive list of references and Dr Smith s latest meticulous research This book should be a foundational work for scholars working in the plant sciences researchers in ethnobotanical studies and general interest scholars seeking more detailed information on the latest research by a leading scientist in the Amazon Language in

Strange and Familiar Places Alexandra Y. Aikhenvald, Anne Storch, Viveka Velupillai, 2025-06-02 Language and place are intimately connected depending on where we are what the context is and what our aims are we will adjust our language accordingly Yet linguistics defines itself by a framework that determines which kind of language is worth investigating Within that framework linguistics constructs both language and place in multiple ways language as a sequestered thing belongs to the field site or the classroom language as fluid practice is associated with the street language as reconstruction belongs to migration corridors What about the places that tend to fall between the cracks This volume explores language in strange and familiar places from Europe to Africa Amazonia Australia and the Pacific in order to shed light on them **Star Stories**

Anthony Aveni, 2019-10-22 Follow an epic animal race a quest for a disembodied hand and an emu egg hunt in constellation stories from diverse cultures We can see love betrayal and friendship in the heavens if we know where to look A world expert on cultural understandings of cosmology Anthony Aveni provides an unconventional atlas of the night sky introducing readers to tales beloved for generations The constellations included are not only your typical Greek and Roman myths but star patterns conceived by a host of cultures non Western and indigenous ancient and contemporary The sky has long served as a template for telling stories about the meaning of life People have looked for likenesses between the domains of heaven and earth to help marry the unfamiliar above to the quotidian below Perfect reading for all sky watchers and storytellers this book is an essential complement to Western mythologies showing how the confluence of the natural world and culture of heavenly observers can produce a variety of tales about the shapes in the sky Plants, Health and Healing Elisabeth

Hsu, Stephen Harris, 2012 Plants have cultural histories and their culturally known applications change through time and across contexts This pattern is seen in all types of uses that humans make of plants from trees used for construction through species used for perfume through to food plants However it is medicinal plants that have attracted considerable attention recently whether as a justification of plant conservation efforts or through the perception that direct use of medicinal plants may offer something that is not delivered by orthodox medicine This volume s two central aims are to demonstrate that plant knowledge is not paradigmatic positive knowledge but situational and arises in relationships and to show that modern medicinal plant discovery can be viewed as the epitome of a long history of borrowing stealing and exchanging plants

*Made from Bone* Jonathan D. Hill, 2010-10-01 *Made from Bone* is the first work to provide a complete set of English translations of narratives about the mythic past and its transformations from the indigenous Arawak speaking people of South America Among the Arawak speaking Waku nai of southernmost Venezuela storytellers refer to these narratives as words from the primordial times and they are set in an unfinished space time before there were any clear distinctions between humans and animals men and women day and night old and young and powerful and powerless The central character throughout these primordial times and the ensuing developments that open up the world of distinct peoples species and places is a trickster creator *Made from Bone* who survives a prolonged series of life threatening attacks and

ultimately defeats all his adversaries Carefully recorded and transcribed by Jonathan D Hill these narratives offer scholars of South America and other areas the only ethnographically generated cosmogony of contemporary or ancient native peoples of South America Hill includes translations of key mythic narratives along with interpretive and ethnographic discussion that expands on the myths surrounding this fascinating and enigmatic character with broad appeal throughout various folkloric traditions     The Occult Life of Things Fernando Santos-Granero,2013-02 Combining linguistic ethnological and historical perspectives the contributors to this volume draw on a wealth of information gathered from ten Amerindian peoples belonging to seven different linguistic families to identify the basic tenets of what might be called a native Amazonian theory of materiality and personhood     Scoping the Amazon Stephen Nugent,2016-07-01 The Amazon Indian is an icon that straddles the world between the professional anthropologist and the popular media Presented alternately as the noble primitive the savior of the environment and as a savage dissolute cannibalistic half human it is an image well worth examining Stephen Nugent does just that critiquing the claims of authoritativeness inherent in visual images presented by anthropologists of Amazon life in the early 20th century and comparing them with the images found in popular books movies and posters The book depicts the field of anthropology as its own form of culture industry and contrasts it to other similar industries past and present For visual anthropologists ethnographers Amazon specialists and popular culture researchers Nugent s book will be enlightening entertaining reading
