Pan Du Desert:

Pan du désert André Bernand, 2023-08-21 *The Epigraphy of Ptolemaic Egypt* Alan K. Bowman, Charles Crowther, 2020 This collection of detailed studies of the epigraphical landscape of Ptolemaic Egypt explores the historical and cultural contexts of the surviving Greek and Greek Egyptian bilingual and trilingual inscriptions as a complement to the Corpus of Ptolemaic Inscriptions edition in which the texts will be presented together for the first time Rome in Egypt's Eastern Desert Hélène Cuvigny, 2021-08-21 A detailed archaeological study of life in Egypt's Eastern desert during the Roman period by a leading scholar Rome in Egypt's Eastern Desert is a two volume set collecting Hélène Cuvigny's most important articles on Egypt's Eastern Desert during the Roman period The excavations she directed uncovered a wealth of material including tens of thousands of texts written on pottery fragments ostraca Some are administrative texts but many more are correspondence both official and private written by and to the people mostly but not all men who lived and worked in these remote and harsh environments supported by an elaborate network of defense administration and supply that tied the entire region together The contents of Rome in Egypt's Eastern Desert have all been published earlier in peer reviewed venues but most appear here for the first time in English All of the contributions have been checked or translated by the editor and brought up to date with respect to bibliography and some have been significantly rewritten by the author in order to take account of the enormous amount of new material discovered since the original publications A full index makes this body of work far more accessible than it was before This book assembles into one collection thirty years of detailed study of this material conjuring in vivid detail the lived experience of those who inhabited these forts often through their own expressive language and the realia of desert geography military life sex religion quarry operations and imperial administration in the Roman world **Decoding the Osirian Myth** Panagiota Sarischouli, 2024-09-23 The earliest written references to the Osirian myth complex appeared already in the Pyramid Text spells c 2400-2300 BCE The most complete exposition of this ancient Egyptian myth is however found in the Greek treatise On Isis and Osiris in which the 2nd century CE Platonist Plutarch utilises Egyptian mythology to advocate his philosophical ideas concerning the divine and the nature of the cosmos This book aims at decoding Plutarch's narrative of the Osirian myth linking his claims to the existing Egyptian and Greek parallels It thus analyses a multitude of mythic and religious traditions from a transcultural perspective exploring the relation of the Pharaonic features of the Osirian divinities to the features they had acquired in Ptolemaic and Roman times interpreting the Egyptian myth within the overall framework of parallel mythologies from other cultures and examining whether the brief mythic stories historiolae recited in Late Egyptian ritual texts can be deployed to enrich the context of certain obscure episodes in Plutarch's account of the myth The book will be of great interest not only to scholars and students of Plutarch and later Middle Platonism but also to Egyptologists Due to its thematic variety and scope this publication will also appeal to a wider array of readers specialists and non specialists alike interested in religious syncretism

interreligious connections and the challenge of multiculturalism from Hellenistic times until Late Antiquity

Land and Taxes in Ptolemaic Egypt, 2017-10-12 This book provides the first edition with an extensive introduction and full commentary of a unique land survey written on papyrus in Greek which derives from that area of southern Upper Egypt known as the Apollonopolite or Edfu nome and is now preserved in Copenhagen Dating from the late second century BC this survey provides a new picture of both landholding and taxation in the area which differs significantly from that currently accepted The introduction sets this new evidence in its contemporary context drawing particular attention to what it reveals about the nature of the relations of the Ptolemaic royal administration with local grandees Egyptian temples and the army No student of Hellenistic Egypt can afford to ignore this text which importantly extends our knowledge of Upper Egypt under the Ptolemaic kings and involves some modification to the prevailing picture of landholding in Hellenistic Egypt

The Indo-Roman Pepper Trade and the Muziris Papyrus Federico De Romanis, 2020 Through an innovative analysis of a pair of unique second century AD documents this volume offers an updated perspective on the Roman Empire's trade with South India drawing on recent archaeological and historical insights and using as a backdrop the longue dure history of the South Indian pepper trade from antiquity to early modernity

Rome, the Greek World, and the East Fergus Millar, 2003-01-14 Fergus Millar is one of the most influential contemporary historians of the ancient world His essays and books including *The Emperor in the Roman World* and *The Roman Near East* have enriched our understanding of the Greco Roman world in fundamental ways In his writings Millar has made the inhabitants of the Roman Empire central to our conception of how the empire functioned He also has shown how and why Rabbinic Judaism Christianity and Islam evolved from within the wider cultural context of the Greco Roman world Opening this collection of sixteen essays is a new contribution by Millar in which he defends the continuing significance of the study of Classics and argues for expanding the definition of what constitutes that field In this volume he also questions the dominant scholarly interpretation of politics in the Roman Republic arguing that the Roman people not the Senate were the sovereign power in Republican Rome In so doing he sheds new light on the establishment of a new regime by the first Roman emperor Caesar Augustus

The Red Land Steven E. Sidebotham, Martin Hense, Hendrikje M. Nouwens, 2008-07-01 For thousands of years Egypt has crowded the Nile Valley and Delta The Eastern Desert however has also played a crucial though until now little understood role in Egyptian history Ancient inhabitants of the Nile Valley

feared the desert which they referred to as the Red Land and were reluctant to venture there yet they exploited the extensive mineral wealth of this region They also profited from the valuable wares conveyed across the desert between the Nile and the Red Sea ports which originated from Arabia Africa India and elsewhere in the east Based on twenty years of archaeological fieldwork conducted in the Eastern Desert The Red Land reveals the cultural and historical richness of this little known and seldom visited area of Egypt A range of important archaeological sites dating from Prehistoric to Byzantine times is explored here in text and illustrations Among these ancient treasures are petroglyphs cemeteries fortified wells gold and emerald mines hard stone quarries roads forts ports and temples With 250 photographs and fascinating artistic reconstructions based on the evidence on the ground along with the latest research and accounts from ancient sources and modern travelers the authors lead the reader into the remotest corners of the hauntingly beautiful Eastern Desert to discover the full story of the area s human history

A Lexicon of Greek Personal Names T. Corsten, 2010-03-04 *A Lexicon of Greek Personal Names* offers scholars a comprehensive listing of all named individuals from the ancient Greek speaking world The information needed has been compiled from all written sources literary epigraphical papyrological and numismatic within a chronological range from the eighth century BC to approximately 600 AD the geographical limits match the use of the Greek language in antiquity from Asia Minor to the Western Mediterranean the Black Sea to North Africa With the present volume LGPN moves into Asia Minor modern Turkey to the areas of Pontos Bithynia Mysia the Troad Aiolis Ionia and Lydia Asia Minor is particularly interesting since it differs from most other regions covered so far in its ethnic and cultural diversity Personal names are known in abundance from almost all cultures to be found in this area and they therefore play a prominent role in the study of ethnicity and acculturation

Roads in the Deserts of Roman Egypt Maciej Paprocki, 2019-07-19 Egypt under the Romans 30 BCE 3rd century CE was a period when local deserts experienced an unprecedented flurry of activity In the Eastern Desert a marked increase in desert traffic came from imperial prospecting quarrying activities and caravans transporting wares to and from the Red Sea ports In the Western Desert resilient camels slowly became primary beasts of burden in desert travel enabling caravaneers to lengthen daily marching distances across previously inhospitable dunes Desert road archaeology has used satellite imaging landscape studies and network analysis to plot desert trail networks with greater accuracy however it is often difficult to date roadside installations and thus assess how these networks evolved in scope and density in reaction to climatic social and technological change *Roads in the Deserts of Roman Egypt* examines evidence for desert roads in Roman Egypt and assesses Roman influence on the road density in two select desert areas the central and southern section of the Eastern Desert and the central Marmarican Plateau and discusses geographical and social factors influencing road use in the period demonstrating that Roman overseers of these lands adapted remarkably well to local desert conditions improving roads and developing the trail network Crucially the author reconceptualises desert trails as linear corridor structures that follow expedient routes in the desert landscape passing through at least two

functional nodes attracting human traffic be those water sources farmlands mines quarries trade hubs military installations or actual settlements The route of least resistance across the desert varied from period to period according to the available road infrastructure and beasts of burden employed Roman administration in Egypt not only increased the density of local desert node networks but also facilitated internodal connections with camel caravans and transformed the Sahara by establishing new or embellishing existing nodes effectively funnelling desert traffic into discernible corridors Significantly not all desert areas of Egypt are equally suited for anthropogenic development but almost all have been optimised in one way or another with road installations built for added comfort and safety of travellers Accordingly the study of how Romans successfully adapted to desert travel is of wider significance to the study of deserts and ongoing expansion due to global warming

Berenike 1999/2000 Steven E. Sidebotham, Willeke Wendrich, 2007-12-31 Excavations at Berenike a Greco Roman harbor on the Egyptian Red Sea coast have provided extensive evidence for trade with India South Arabia and sub Saharan Africa The results of the 1999 and 2000 excavations by the joint mission of the University of Delaware Leiden University and UCLA have been published in a comprehensive report with specialists analyses of different object groups and an overview of evidence for the trade route from the Indian perspective The book is lavishly illustrated with photographs drawings plans and a large foldout map of Berenike and Sikait Imperial Mines and Quarries in the Roman World Alfred Michael Hirt, 2010-03-25 The control over marble and metal resources was of major importance to the Roman Empire Alfred Hirt s comprehensive study defines the organizational outlines and the internal structures of the mining and quarrying ventures under imperial control The Economics of the Roman Stone Trade Ben Russell, 2013 Russell provides an examination of the production distribution and use of carved stone objects in the Roman world Focusing on the market for stone and its supply he offers an assessment of the practicalities of stone transport and how the relationship between producer and customer functioned even over considerable distances *Protecting the Roman Empire* Matthew Symonds, 2018 The fortlet a previously overlooked military installation type reveals how Rome built secured and lost its Empire

Les portes du désert André Bernand, 1985-01-01 T00:00:00+01:00 L entreprise du Corpus des inscriptions grecques d Egypte a t commenc en 1953 L ouvrage pr sent en constitue le 15e volume Copyright Electre *Soldier and Society in Roman Egypt* Richard Alston, 2002-09-11 The province of Egypt provides unique archaeological and documentary evidence for the study of the Roman army In this fascinating social history Richard Alston examines the economic cultural social and legal aspects of a military career illuminating the life and role of the individual soldier in the army *Soldier and Society in Roman Egypt* provides a complete reassessment of the impact of the Roman army on local societies and convincingly challenges the orthodox picture The soldiers are seen not as an isolated elite living in fear of the local populations but as relatively well integrated into local communities The unsuspected scale of the army s involvement in these communities offers a new insight into both Roman rule in Egypt and Roman imperialism more generally Archaeology and

Geology of Ancient Egyptian Stones James A. Harrell, 2024-05-02 This book seeks to identify and describe all the rocks and minerals employed by the ancient Egyptians using proper geological nomenclature and to give an account of their sources in so far as they are known The various uses of the stones are described as well as the technologies employed to extract transport carve and thermally treat them *Pan Du Désert* André Bernand, 1977 **Bilingualism and the Latin**

Language J. N. Adams, 2003-01-09 Since the 1980s bilingualism has become one of the main themes of sociolinguistics but there are as yet few large scale treatments of the subject specific to the ancient world This book is the first work to deal systematically with bilingualism during a period of antiquity the Roman period down to about the fourth century AD in the light of sociolinguistic discussions of bilingual issues The general theme of the work is the nature of the contact between Latin and numerous other languages spoken in the Roman world Among the many issues discussed three are prominent code switching the practice of switching between two languages in the course of a single utterance and its motivation language contact as a cause of change in one or both of the languages in contact and the part played by language choice and language switching in the establishment of personal and group identities
