A Companion to Popular Culture Gary Burns, 2016-03-08 *A Companion to Popular Culture* is a landmark survey of contemporary research in popular culture studies that offers a comprehensive and engaging introduction to the field Includes over two dozen essays covering the spectrum of popular culture studies from food to folklore and from TV to technology Features contributions from established and up and coming scholars from a range of disciplines Offers a detailed history of the study of popular culture Balances new perspectives on the politics of culture with in depth analysis of topics at the forefront of popular culture studies [Controversial Therapies for Developmental Disabilities](#) John W. Jacobson, Richard M. Foxx, James A. Mulick, 2005-01-15 One of the largest and most complex human services systems in Western nations has evolved to address the needs of people with developmental disabilities In the U S for example school budgets are stretched thin by legally mandated special education and billions of Medicaid dollars annually are consumed by residential and professional services to this population The temptation of a quick fix is strong Many parents desperately seek the latest ideas and place pressure on program administrators who often are not trained to think critically about the evidence base for intervention efforts The problems of people with developmental disabilities have historically been targeted by a wide range of professionals who rely on clinical experience and intuition and do not submit their claims to the tests of scientific research Professional entrepreneurs have energetically promoted their treatments to a public perhaps too trustful of those with credentials Thus families and their children are buffeted by reforms founded on belief and ideologically driven management Services fluctuate with the currents of social movements and rapidly shifting philosophies of care as policymakers and

providers strive for increased responsiveness and individualization. These forces affect not only where and how but how well people are served. Too often services are less effective than they could be or worse damaging to personal growth and quality of life. Many treatments are based on poorly understood or even disproven approaches. What approaches to early intervention, education, therapy, and remediation really help those with mental retardation and developmental disabilities improve their functioning and adaptation? And what approaches represent wastes of time, effort, and resources? This book brings together leading behavioral scientists and practitioners to focus light on the major controversies surrounding these questions. The authors review the origins, perpetuation, and resistance to scrutiny of questionable practices and offer a clear rationale for appraising the quality of services. In an era of increasing accountability, no one with a professional stake in services to individuals with mental retardation and developmental disabilities can afford not to read this book.

Condon, 2004-04-30 The function of print resources as instructional guides and descriptors of popular music pedagogy are addressed in this concise volume. Kathleen E.R. Smith, 2014-10-17 After Pearl Harbor Tin Pan Alley songwriters rushed to write the Great American War Song an Over There for World War II The most popular songs however continued to be romantic ballads escapist tunes or novelty songs To remedy the situation the federal government created the National Wartime Music Committee an advisory group of the Office of War Information OWI which outlined proper war songs along with tips on how and what to write The music business also formed its own Music War Committee to promote war songs Neither group succeeded The OWI hoped that Tin Pan Alley could be converted from manufacturing love songs to manufacturing war songs just as automobile plants had retooled to assemble planes and tanks But the OWI failed to comprehend the large extent by which the war effort would be defined by advertisers and merchandisers Selling merchandise was the first priority of Tin Pan Alley and the OWI never swayed them from this course Kathleen E R Smith concludes the government's fears of faltering morale did not materialize Americans did not need such war songs as Goodbye Mama I'm Off To Yokohama There Are No Wings On a Foxhole or even The Sun Will Soon Be Setting On The Land Of The Rising Sun to convince them to support the war The crusade for a proper war song was misguided from the beginning and the music business then and now continues to make huge profits selling love not war songs *Civil War America, 1850 To 1875* Richard F. social scientists physicians labor unions and even artists to be both a cause of and a solution to society's most entrenched ills. Of all the problems that faced America in the 1930s only leisure seemed to offer a panacea for the rest. The problem centered on divided opinions over what constituted proper versus improper use of leisure time. On the one hand sociologists and reformers excoriated as improper such leisure activities as gambling loafing and drinking. On the other the Works Progress Administration and the newly professionalized recreation experts promoted proper leisure activities such as reading sports and arts and crafts. Such attention gave rise to new ideas about how Americans should spend their free time to better themselves and their nation. These ideas were propagated in social science publications and proliferated into the wider cultural sphere. Films fiction and radio also engaged with new ideas about leisure more extensively than has previously been recognized. In examining this wide spectrum of opinion Currell offers the first full scale account of the fears and hopes surrounding leisure in the 1930s one that will be an important addition to the cultural history of the period. Innovation, Strategy and Risk in Construction Martin Loosemore, 2013-12-04 Innovation Strategy and Risk in Construction integrates insights from business and government leaders with contemporary research to help built environment professionals turn serendipity to their own advantage by building greater innovative and adaptive capacity into their operations. Accessible and full of practical examples the book argues that traditional business strategies which seek to systematise innovation and eliminate uncertainty need to be balanced with more flexible approaches which acknowledge and harness uncertainty. The missing key to innovation it is argued is to turn serendipity into capability. The author proposes a simple model which allows managers to tap into the increasingly dynamic and interconnected nature of the construction industry. Innovation does not occur in isolation within individual firms but through collaboration. Each stakeholder in the construction industry has a responsibility to drive innovation and this book will be key reading for consultants contractors subcontractors suppliers and clients as well as policy makers and all serious students of construction management.
