Institution of Engineers (India),1972 **AB Bookman's Weekly** ,1993 **Optical Information Systems Update/library & Information Center Applications** ,1994 **Baltimore and Ohio Employees Magazine** ,1951 The Engineer ,1884 End of the Line Barry C. Lynn,2006-08-08 In September 1999 an earthquake devastated much of Taiwan toppling buildings knocking out electricity and killing 2 500 people Within days factories as far away as California and Texas began to close Cut off from their supplies of semiconductor chips companies like Dell and Hewlett Packard began to shutter assembly lines and send workers home A disaster that only a decade earlier would have been mainly local in nature almost cascaded into a grave global crisis The quake in an instant illustrated just how closely

connected the world had become and just how radically different are the risks we all now face *End of the Line* is the first real anatomy of globalization It is the story of how American corporations created a global production system by exploding the traditional factory and casting the pieces to dozens of points around the world It is the story of how free trade has made American citizens come to depend on the good will of people in very different nations in very different regions of the world It is a story of how executives and entrepreneurs at such companies as General Electric Cisco Dell Microsoft and Flextronics adapted their companies to a world in which America's international policies were driven ever more by ideology rather than a focus on the long term security and well being of society Politicians have long claimed that free trade creates wealth and fosters global stability Yet Lynn argues that the exact opposite may increasingly be true as the resulting global system becomes ever more vulnerable to terrorism war and the vagaries of nature From a lucid explanation of outsourcing's true impact on American workers to an eye opening analysis of the ideologies that shape free market competition Lynn charts a path between the extremes of left and right He shows that globalization can be a great force for spreading prosperity and promoting peace but only if we master its complexities and approach it in a way that protects and advances our national interest
