Pandoras Legions:

Pandora's Legions Christopher Anvil, 2002-02-01 IS IT TOO LATE TO NEGOTIATE A SURRENDER The Centran Empire was both benevolent and complacent Benevolent even as it overwhelmed every new inhabited planet it encountered with its military might but once the planet was pacified its inhabitants were uplifted to Centran standards of living and the benefits of membership in the Empire Complacent because the Empire had long been expanding without encountering more than minor obstacles And then they came across Pandora's Planet that is Earth In spite of the Centran superiority in technology the conquest of Earth took over three months when the invaders were used to wrapping things up in less than two weeks But conquest might be too optimistic a term to use since the locals were still waging guerrilla warfare and sabotage and the Centrants were hanging on by their equivalent of fingernails And then the Centran scientists tested a group of humans and found that the humans were more intelligent than the Centrants One Centran leader had an idea that might save the Centrants from being ignominiously kicked off the planet again Since the humans were good at war why not put together teams of humans to go out to the fringes of Centran space and handle planets that were proving difficult The teams performed magnificently but back in the heart of the Empire humans and their weird new ideas were spreading like wildfire and if something weren't done soon the humans would end up running the former Centran Empire At the publisher's request this title is sold without DRM Digital Rights Management

Pandora's Legions Christopher Anvil, 2003-04 Complacently expanding for centuries without major obstacles the benevolent Centran Empire comes across Earth In spite of the Centran superiority in technology the conquest is a nightmare As a result a Centran leader has an idea since humans are so good at fighting why not send teams of them to planets proving difficult for the Centran Empire

The Pandora ..., 1910 Interstellar Patrol Christopher Anvil, 2004-09-01 The crew of the ship were marooned on a planet with no ship repair facilities where the well meaning schemes of social engineers had created a nightmare of battling gangs They had their own invention with them an emotional amplifier which could cause anyone to feel a heightened emotion but this wasn't useful at first If they heightened the locals sense of pride they took pride in becoming better criminals So they pretended to be the Royal Legions sent by a distant star kingdom in pursuit of an all powerful villain who was hiding on the planet Things were going better than they could have hoped and the planet was rapidly becoming civilized and then the real Royal flagship showed up They thought they were doomed but instead they were told they had shown just the type of initiative and intelligence that the new arrivals were looking for So they were inducted into the Interstellar Patrol And that was just the beginning

Pandora's Baby Robin Marantz Henig, 2006 On a September morning in 1973 a hospital administrator in New York City learned of a rogue experiment in progress at his institution and ordered the destruction of a test tube containing a frothy mixture of human eggs and sperm Had the experiment been allowed to continue it might have resulted in the first human fetus created through in vitro fertilization A ward winning journalist Robin Marantz Henig takes us back to the early days of IVF when the procedure was viewed as crackpot science and its pioneers as outsiders in the medical world Henig lays out the ethical and political battlefield of the 1970s a battlefield that is recreated with each new technology and traces the sea change that has occurred in the public perception of test tube babies That it was the first step down the slippery slope toward genetic engineering designer babies and human clones and a compelling story from the not so distant past which brilliantly presents the scientific and ethical dilemmas we confront ever more starkly as germ line engineering and human cloning become possible Provided by publisher

Pandora's Daughters Jane Robinson, 2002 This enthralling history full of anecdotes and first hand accounts centres on women through the ages who have sidestepped restraint and raised the eyebrows of their contemporaries by choosing to make their own often highly idiosyncratic way of life The pedigree of the modern career woman is not generally supposed to be long reaching back only as far as those late Victorian pioneers who stormed the bastions of male professions Jane Robinson looks back over some 25 centuries and proves that theory quite wrong The 100 or so women portrayed here were busy behind the scenes of recorded history in the cause of earning an honest or perhaps not independent living Their enterprise and flair led them to careers as diverse as they are improbable ranging from engineers plumbers and surgeons to a naval commander in the Persian Wars a Dark Age Pope a successful Orcadian wind seller some pirates a Royal Marine and a stockbroker who ran for President of the United States The author considers such achievements against their place and time and the result is a tribute to an inspirational body of women whose significance has too long been ignored as well as a

wonderfully entertaining read *Pandora's Locks* Jeff Alexander, 2009-05-07 The St Lawrence Seaway was considered one of the world's greatest engineering achievements when it opened in 1959. The 1 billion project, a series of locks, canals, and dams that tamed the ferocious St Lawrence River, opened the Great Lakes to the global shipping industry. Linking ports on lakes Superior, Michigan, Huron, Erie, and Ontario to shipping hubs on the world's seven seas increased global trade in the Great Lakes region. But it came at an extraordinarily high price. Foreign species that immigrated into the lakes in ocean freighters' ballast water tanks unleashed a biological shift that reconfigured the world's largest freshwater ecosystems. *Pandora's Locks* is the story of politicians and engineers who, driven by hubris and handicapped by ignorance, demanded that the Seaway be built at any cost. It is the tragic tale of government agencies that could have prevented ocean freighters from laying waste to the Great Lakes ecosystems but failed to act until it was too late. Blending science with compelling personal accounts, this book is the first comprehensive account of how inviting transoceanic freighters into North America's freshwater seas transformed these wondrous lakes.
