## **Panzer II:**

**Panzer II vs 7TP** David R. Higgins,2015-05-20 Hitler's lightning invasion of Poland in 1939 marked the beginning of World War II in Europe. This was the period when armoured warfare inscribed itself into global consciousness as the Poles desperately sought to stave off the Blitzkrieg. At the heart of the fighting on the ground, large numbers of Nazi Germany's PzKpfw II battled against Poland's better armed but much less numerous 7TP tank. The two types both possessed unique strengths and weaknesses: unlike the 7TP, the PzKpfw II was always equipped with radio, which proved critical for command and control purposes in the heat of combat. But the German tank was blighted by thin armour which could not withstand Polish gunfire at combat ranges. This fully illustrated, detailed work evaluates the qualities and idiosyncrasies of each tank, giving a stark and arresting crewman's eye view of the brutal armoured combat at the height of the invasion of Poland.

*Panzer I and II* Anthony Tucker-Jones,2018-09-30 While the Panzer I and II are not as famous as the German tanks produced later in the Second World War, they played a vital role in Hitler's early blitzkrieg campaigns and in the Nazi rearmament program pursued at first in secret by the Nazi regime during the 1930s. Anthony Tucker-Jones's photographic history of their design, development and wartime service is an ideal introduction to them. Both Panzers saw combat during the invasions of Poland and France, the Low Countries and Scandinavia during 1939-40. Although by the time the Wehrmacht invaded the Soviet Union in 1941, the Panzer I had been virtually phased out of service in the form of self-propelled guns, they continued to see combat well into 1943. The Panzer II was also phased out with the panzer regiments in late 1943, yet it remained in action on secondary fronts and as the self-propelled Marder II antitank gun and Wespe artillery variant. It saw active service with the panzer and panzer grenadier divisions until the end of the war. The Panzer I and II were the precursors of the formidable range of medium and heavy tanks that followed: the Panzer III and IV and the Panther and Tiger. And this book is a fascinating record of them.

**Panzers I & II** Bob Carruthers,2013-05-17 The first vehicle to be produced in any numbers for the Panzerwaffe was the tiny Panzer I, known as the MG Panzerwagen. Almost from the outset, the limitations of the design for the Panzer I were obvious. It was essentially a training vehicle which was only pressed into service as a last resort. It was to be succeeded by the Panzer II, which could at least engage armoured cars and combat against tanks with approximately the same armour as itself. Together, these two tanks formed the bulk of the armour which, between 1939 and 1941, conquered half of Europe. This comprehensive overview of the light Panzers in action was compiled by Emmy Award-winning historian Bob Carruthers. It draws heavily on war-time intelligence reports to produce a fascinating insight into the development and combat history of the light Panzers at the tactical and operational level. Also featured are rare developments such as the Panzer II flame-thrower variant, alongside unpublished photographs and illustrations which provide an absorbing study from an array of primary sources of the world of the light Panzer and their crews from contemporary Allied sources.

*Panzer Divisions* Pier Paolo Battistelli,2013-01-20 ALSO AVAILABLE AS AN E-BOOK On 22

June 1941 Germany attacked the Soviet Union and her Panzer divisions were to play a major role in this titanic struggle. Although overwhelmed by Soviet numbers the superior skill and capability of the German Panzer divisions meant that in three months the Germans had advanced deep into Soviet territory. However after these initial successes the German offensive began to falter culminating in the disastrous defeat at Kursk. This book describes the organisational history of the Panzer divisions from the early successes of 1941 through to the introduction of revised Blitzkrieg tactics as the war progressed.

**German Self-Propelled Artillery Guns of the Second World War** Craig Moore, 2019-03-19 One of the few books that explores the design and deployment of German artillery self propelled guns SPGs to support tanks and infantry during the Second World War. A great reference book for military modellers, historians and tank wargamers interested in German SPGs. A comprehensive guide to German SPGs between 1939 and 1945 in one volume for the very first time including previously unpublished information on the little known Hummel Wespe proving that at least twelve units were built. Authentic camouflage suggestions for military modellers. A single towed artillery gun required a team of six horses and nine men. During the Second World War German engineers mounted an artillery gun on top of a tank chassis, this new technology reduced the amount of valuable war resources as self propelled guns only required a four or five man crew. They could also be made ready to fire more rapidly. German Self Propelled Artillery Guns of the Second World War covers the development and use of this new weapon between 1939 and 1945. One type was successfully deployed in the invasion of France in 1940 and more were used on the Eastern Front against Soviet forces from 1941 until the end of the war. The Desert Fox Ewin Rommel demanded artillery guns that could keep up with his panzers in North Africa. He was sent 15 cm howitzers mounted on top of Panzer II tank chassis and captured French Army Lorraine 37L tracked armoured supply vehicles. Rommel's forces in northern France were equipped with a variety of new self propelled guns which were used against the Allies on the beaches of Normandy during D Day in 1944. Includes 81 colour photographs.

**Panzer III—German Army Light Tank** Dennis Oliver, 2020-08-31 Concentrates on the Panzer III as operated during the invasion of the Soviet Union, a mixture of history, camouflage and models well done. ModelingMadness.com The PzKpfw III tank was the mainstay of the Panzer divisions during the Blitzkrieg era which could fairly be said to have ended with the Germans' failure to take Moscow in the winter of 1941. Although less heavily armored than many of its opponents and somewhat outgunned by the latest Soviet types, the PzKpfw III was at the forefront of the advances made over almost impossible distances during the summer and autumn and provided the core of the armored reserve that fought the defensive battles of the winter months. In Dennis Oliver's latest volume in the TankCraft series, he uses archive photos and extensively researched color illustrations to examine the PzKpfw III and the units that operated this deservedly famous armored vehicle along a 1 000 mile front during the battles of Operation Barbarossa, the German invasion of the Soviet Union. A key section of his book displays available model kits and after market products complemented by a gallery of beautifully constructed and painted models in various scales. Technical

details as well as modifications introduced during production and in the field are also examined providing everything the modeler needs to recreate an accurate representation of these historic tanks This book will prove invaluable for model makers and military historians interested in this often overlooked but important AFV This is another great addition to the TankCraft series and is highly recommended to all Miniature Armoured Fighting Vehicles Association **The Boardgamer**
