Panzer I II:

Panzer I and II Anthony Tucker-Jones, 2018-09-30 While the Panzer I and II are not as famous as the German tanks produced later in the Second World War they played a vital role in Hitler's early blitzkrieg campaigns and in the Nazi rearmament program pursued at first in secret by the Nazi regime during the 1930s Anthony Tucker Jones's photographic history of their design development and wartime service is an ideal introduction to them Both Panzers saw combat during the invasions of Poland and France the Low Countries and Scandinavia during 1939-40 Although by the time the Wehrmacht invaded the Soviet Union in 1941 the Panzer I had been virtually phased out of service in the form of self-propelled guns they continued to see combat well into 1943 The Panzer II was also phased out with the panzer regiments in late 1943 yet it remained in action on secondary fronts and as the self-propelled Marder II antitank gun and Wespe artillery variant it saw active service with the panzer and panzer grenadier divisions until the end of the war The Panzer I and II were the precursors of the formidable range of medium and heavy tanks that followed the Panzer III and IV and the Panther and Tiger and this book is a fascinating record of them

Panzers I & II Bob Carruthers, 2013-05-17 The first vehicle to be produced in any numbers for the Panzerwaffe was the tiny Panzer I known as the MG Panzerwagen Almost from the outset the limitations of the design for the Panzer I were obvious It was essentially a training vehicle which was only pressed into service as a last resort It was to be succeeded by the Panzer II which could at least engage armoured cars and combat against tanks with approximately the same armour as itself Together these two tanks formed the bulk of the armour which between 1939 and 1941 conquered half of Europe This comprehensive overview of the light Panzers in action was compiled by Emmy Award winning historian Bob Carruthers It draws heavily on war time intelligence reports to produce a fascinating insight into the development and combat history of the light Panzers at the tactical and operational level Also featured are rare developments such as the Panzer II flame thrower variant alongside unpublished photographs and illustrations which provide an absorbing study from an array of primary sources of the world of the light Panzer and their crews from contemporary Allied sources

Panzer I & II Robert Jackson, 2020-01-31 The Panzer I and II played a significant part in the blitzkrieg campaigns that brought Germany such extraordinary success in the early years of the Second World War and this highly illustrated volume in the TankCraft series is the ideal introduction to them The Treaty of Versailles forbade Germany to manufacture tanks so the Panzer I had to be developed in strict secrecy but by the time of the invasion of Poland the Wehrmacht had over 1400 of these light tanks The Panzer II was an interim design bridging the gap between the Panzer I and subsequent far more viable armoured fighting vehicles like the Panzer III and IV As well as tracing the history of the Panzer I and II Robert Jackson's book is an excellent source of reference for the modeler providing details of available kits together with artworks showing the color schemes applied to these tanks Each section of the book is supported by a wealth of wartime photographs as well as diagrams showing the technical changes that were made to these tanks in the course of

their careers **German Panzer II** David Doyle,2016-03-15 Panzers I & II Bob Carruthers,2013 The first vehicle to be produced in any numbers for the Panzerwaffe was the tiny Panzer I known as the MG Panzerwagen Almost from the outset the limitations of the design for the Panzer I were obvious It was essentially a training vehicle which was only pressed into service as a last resort It was to be succeeded by the Panzer II which could at least engage armored cars and combat against tanks with approximately the same armor as itself Together these two tanks formed the bulk of the armor which between 1939 and 1941 conquered half of Europe Emmy Award winning historian Bob Carruthers compiled this comprehensive overview of the light Panzers in action It draws heavily on wartime intelligence reports to produce a fascinating insight into the development and combat history of the light Panzers at the tactical and operational level Also featured are rare developments such as the Panzer II flamethrower variant alongside unpublished photographs and illustrations which provide an absorbing study from an array of primary sources of the world of the light Panzer and their crews from contemporary Allied sources Leibstandarte panzers 1940-1945 Massimiliano Afiero,2025-06-06 The Leibstandarte Adolf Hitler was the first major unit of the Waffen SS and received Armored vehicles as early as 1940 deploying them in the Balkans 1941 and during Operation Barbarossa Reorganized as a Panzer division in 1942 it was equipped with Panzer IIIs IVs and Tiger Is fighting at Kharkov and Kursk Transferred to Italy in 1943 to disarm the Italian army it later returned to the Eastern Front where it received Panther tanks After fierce battles it was moved to Belgium 1944 to counter the Allied landings fighting in Normandy and the Falaise Pocket It took part in the Ardennes Offensive with Kampfgruppe Peiper and in 1945 fought in the final battles in Hungary before retreating to Austria **Panzers at War 1939-1942** , Sd.kfz. 121 Panzer II. All Versions Luchs Samir Karmieh,2017-03-19 In July of 1934 the Waffenamt Ordnance Department ordered the development of an armored vehicle 10 tons in weight and armed with 20mm automatic cannon In early 1935 number of manufacturers including Krupp AG MAN chassis only Henschel und Sohn AG chassis only and Daimler Benz AG provided their prototypes of Landwirtschaftlicher Schlepper 100 LaS 100 agricultural tractor for evaluation by the army The new vehicle was also known as 2 cm MG Panzerwagen and as VK 622 Versuchskraftfahrzeug 622 New light tank Panzerkampfwagen II was to supplement new Panzerkampfwagen I light tank as a vehicle with heavier armament capable of firing armor piercing and high explosive rounds *ABT760 - TANKS OF THE WEHRMACHT* , *German Self-Propelled Artillery Guns of the Second World War* Craig Moore,2019-03-19 One of the few books that explores the design and deployment of German artillery self propelled guns SPGs to support tanks and infantry during the Second World War A great reference book for military modellers historians and tank wargamers interested in German SPGs A comprehensive guide to German SPGs between 1939 and 1945 in one volume for the very first time including previously unpublished information on the little known Hummel Wespe proving that at least twelve units were built Authentic camouflage suggestions for military modellers A single towed artillery gun required a team of six horses and nine men During the Second World War German engineers mounted an artillery gun on top

of a tank chassis this new technology reduced the amount of valuable war resources as self propelled guns only required a four or five man crew They could also be made ready to fire more rapidly German Self Propelled Artillery Guns of the Second World War covers the development and use of this new weapon between 1939 and 1945 One type was successfully deployed in the invasion of France in 1940 and more were used on the Eastern Front against Soviet forces from 1941 until the end of the war The Desert Fox Ewin Rommel demanded artillery guns that could keep up with his panzers in North Africa He was sent 15 cm howitzers mounted on top of Panzer II tank chassis and captured French Army Lorraine 37L tracked armoured supply vehicles Rommel s forces in northern France were equipped with a variety of new self propelled guns which were used against the Allies on the beaches of Normandy during D Day in 1944 Includes 81 colour photographs **Hitler's**

Panzers Anthony Tucker-Jones,2020-02-05 Anthony Tucker Jones traces the evolution of the panzers from their modest beginnings to the most powerful German tanks used in World War II Often it is assumed that Hitler s panzers stormed into action perfectly formed driving through the armies of the Poles in 1939 and the French in 1940 and defeating them The dramatic blitzkrieg victories won by the Wehrmacht early in the Second World War in which the panzers played a leading role tend to confirm this impression But as Anthony Tucker Jones demonstrates in this illustrated comprehensive and revealing history of the panzers this is far from the truth As armored fighting vehicles the early panzers were no better than sometimes inferior to those of their opponents but their tactics rather than their technology gave them an advantage Later on German tank designers developed technically superior tanks but these could not be built fast enough or in sufficient numbers For all their excellence they were overwhelmed by the American Shermans and Soviet T 34s that were produced in their tens of thousands This is the story Anthony Tucker Jones relates as he traces the evolution of the panzers from the modest beginnings in the 1930s to the Panzer IVs Panthers and Tigers which were the most formidable German tanks of the war Not only does he cover their design and production history he also assesses their combat performance and gives a fascinating insight into the decision making at the highest level which directed German tank design **Hitler** Rupert

Matthews,2018-07-03 A comprehensive examination of Hitler s military strategies As F hrer of the Third Reich Hitler was responsible for deciding the German war aims in 1939 As head of the Armed Forces from February 4th 1938 he was also responsible for the overall Wehrmacht strategy intended to achieve these aims Hitler Military Commander examines with impeccable detail Hitler s key military decisions during the Second World War and assesses how far these decisions were militarily justified in the light of the intelligence available at the time Perhaps most importantly it tackles the larger questions of how a non German former corporal albeit the holder of the Iron Cross First Class managed to take personal control of an army with the Prussian traditions of the German army to appoint sack and sentence to death its generals at will to lead it into a World War it was not prepared for and to ultimately destroy it Featuring black and white photographs maps biographical context tactical analysis and more this new edition of Hitler Military Commander will give readers the comprehensive

overview of Hitler's military decisions and downfall

Panzer II vs 7TP

David R. Higgins, 2015-05-20 Hitler's lightning invasion of Poland in 1939 marked the

beginning of World War II in Europe This was the period when armoured warfare inscribed itself into global consciousness as

the Poles desperately sought to stave off the Blitzkrieg At the heart of the fighting on the ground large numbers of Nazi

Germany's PzKpfw II battled against Poland's better armed but much less numerous 7TP tank The two types both possessed unique strengths and weaknesses unlike the 7TP the PzKpfw II was always equipped with radio which proved critical for

command and control purposes in the heat of combat But the German tank was blighted by thin armour which could not

withstand Polish gunfire at combat ranges This fully illustrated detailed work evaluates the qualities and idiosyncrasies of each tank giving a stark and arresting crewman's eye view of the brutal armoured combat at the height of the invasion of

Poland
