the locations of place names reservations and the complete language family      *Walking to Magdalena* Seth Schermerhorn, 2019 In *Walking to Magdalena* Seth Schermerhorn explores a question that is central to the interface of religious studies and Native American and indigenous studies What have Native peoples made of Christianity By focusing on the annual pilgrimage of the Tohono O odham to Magdalena in Sonora Mexico Schermerhorn examines how these indigenous people of southern Arizona have made Christianity their own This walk serves as the entry point for larger questions about what the Tohono O odham have made of Christianity With scholarly rigor and passionate empathy Schermerhorn offers a deep understanding of Tohono O odham Christian traditions as practiced in everyday life and in the words of the O odham themselves The author's rich ethnographic description and analyses are also drawn from his experiences accompanying a group of O odham walkers on their pilgrimage to Saint Francis in Magdalena For many years scholars have agreed that the journey to Magdalena is the largest and most significant event in the annual cycle of Tohono O odham Christianity Never before however has it been the subject of sustained scholarly inquiry *Walking to Magdalena* offers insight into religious life and expressive culture relying on extensive field study videotaped and transcribed oral histories of the O odham and archival research The book illuminates indigenous theories of personhood and place in the everyday life narratives songs and material culture of the Tohono O odham      **Morphosyntax** William Croft, 2022-08-04 Taking a functional approach this book provides a thorough overview of Morphosyntax and sets out a framework for syntactic constructions      **What is Morphology?** Mark Aronoff, Kirsten Fudeman, 2011-07-11 What is Morphology is a concise and critical introduction to the central ideas of morphology which has been revised and expanded to include additional material on morphological productivity and the mental lexicon experimental and computational methods and new teaching material Introduces the fundamental aspects of morphology to students with minimal background in linguistics Includes additional material on morphological productivity and the mental lexicon and experimental and computational methods Features new and revised exercises as well as suggestions for further reading at the end of each chapter Equips students with the skills to analyze a wide breadth of classic morphological issues through engaging examples Uses cross linguistic data throughout to illustrate concepts specifically referencing Kujamaat Joola a Senegalese language Includes a new answer key available for instructors online at <http://www.wiley.com/go/aronoff>      The Linguistic Cycle : Language Change and the Language Faculty Department of English Arizona State University Elly van Gelderen Regents' Professor, 2011-04-08 Elly van Gelderen provides examples of linguistic cycles from a number of languages and language families along with an account of the linguistic cycle in terms of minimalist economy principles A cycle involves grammaticalization from lexical to functional category followed by renewal Some well known cycles involve negatives where full negative phrases are reanalyzed as words and affixes and are then renewed by full phrases again Verbal agreement is another example full pronouns are reanalyzed as agreement markers and are renewed again Each chapter provides data on a separate cycle from a myriad of languages Van Gelderen argues that the

cross linguistic similarities can be seen as Economy Principles present in the initial cognitive system or Universal Grammar She further claims that some of the cycles can be used to classify a language as analytic or synthetic and she provides insight into the shape of the earliest human language and how it evolved [American Indian languages and American linguistics](#)

**Structure from Top to Toe** Peter Svenonius, 2014-09-26 This volume consists of nine original chapters on central issues in theoretical syntax all written by distinguished authors who have made major contributions to generative syntax plus an introductory chapter by the editor Dedicated to Tarald Taraldsen the collection reflects the diverse energies that have pushed the cartographic program forward over the last decade The first three papers deal with subject extraction the que qui alternation and relative clause formation Luigi Rizzi presents arguments that subjects are criterial and that subject extraction is highly restricted Hilda Koopman and Dominique Sportiche concur suggesting that what appears to be subject extraction in French has been misanalyzed and involves a relative structure Adriana Belletti shows that children avoid using object relatives preferring subject relatives even when it requires passivization The fourth paper by Ian Roberts analyzes the loss of pro drop in the history of French and Brazilian Portuguese The papers by M Rita Manzini and Richard S Kayne both present novel analyses of complementizers suggesting that they are essentially nominal rather than verbal The final three papers address the relationship of morphology to syntax The first two argue for a syntactic approach to word formation Guglielmo Cinque s in a typological context and Anders Holmberg s within an analysis of Finnish focus constructions The final paper by Edwin Williams presents an argument for the limitations of the syntactic approach to word formation

**Universals in Comparative Morphology** Jonathan David Bobaljik, 2012-10-05 An argument for and account of linguistic universals in the morphology of comparison combining empirical breadth and theoretical rigor This groundbreaking study of the morphology of comparison yields a surprising result that even in suppletion the wholesale replacement of one stem by a phonologically unrelated stem as in good better best there emerge strikingly robust patterns virtually exceptionless generalizations across languages Jonathan David Bobaljik describes the systematicity in suppletion and argues that at least five generalizations are solid contenders for the status of linguistic universals The major topics discussed include suppletion comparative and superlative formation deadjectival verbs and lexical decomposition Bobaljik s primary focus is on morphological theory but his argument also aims to integrate evidence from a variety of subfields into a coherent whole In the course of his analysis Bobaljik argues that the assumptions needed bear on choices among theoretical frameworks and that the framework of Distributed Morphology has the right architecture to support the account In addition to the theoretical

implications of the generalizations Bobaljik suggests that the striking patterns of regularity in what otherwise appears to be the most irregular of linguistic domains provide compelling evidence for Universal Grammar The book strikes a unique balance between empirical breadth and theoretical detail The phenomenon that is the main focus of the argument suppletion in adjectival gradation is rare enough that Bobaljik is able to present an essentially comprehensive description of the facts at the same time it is common enough to offer sufficient variation to explore the question of universals over a significant dataset of more than three hundred languages Auxiliary Verb Constructions Gregory D.S. Anderson, 2006-06-08 This is the most comprehensive survey ever published of auxiliary verb constructions as in he could have been going to drink it and she does eat cheese Drawing on a database of over 800 languages Dr Anderson examines their morphosyntactic forms and semantic roles He investigates and explains the historical changes leading to the cross linguistic diversity of inflectional patterns and he presents his results within a new typological framework The book's impressive range includes data on variation within and across languages and language families In addition to examining languages in Africa Europe and Asia the author presents analyses of languages in Australasia and the Pacific and in North South and Meso America In doing so he reveals much that is new about the language families of the world and makes an important contribution to the understanding of their nature and evolution His book will interest scholars and researchers in language typology historical and comparative linguistics syntax and morphology

**Highly complex syllable structure: A typological and diachronic study** Shelece Easterday, 2019-11-13 The syllable is a natural unit of organization in spoken language whose strongest cross linguistic patterns are often explained in terms of a universal preference for the CV structure Syllable patterns involving long sequences of consonants are both typologically rare and theoretically marginalized with few approaches treating these as natural or unproblematic structures This book is an investigation of the properties of languages with highly complex syllable patterns The two aims are i to establish whether these languages share other linguistic features in common such that they constitute a distinct linguistic type and ii to identify possible diachronic paths and natural mechanisms by which these patterns come about in the history of a language These issues are investigated in a diversified sample of 100 languages 25 of which have highly complex syllable patterns Languages with highly complex syllable structure are characterized by a number of phonetic phonological and morphological features which serve to set them apart from languages with simpler syllable patterns These include specific segmental and suprasegmental properties a higher prevalence of vowel reduction processes with extreme outcomes and higher average morpheme word ratios The results suggest that highly complex syllable structure is a linguistic type distinct from but sharing some characteristics with other proposed holistic phonological types including stress timed and consonantal languages The results point to word stress and specific patterns of gestural organization as playing important roles in the diachronic development of these patterns out of simpler syllable structures
