Mathematics, Art, Technology and Cinema

MIRELLA MANARESI, 2003-07-21 This book is about mathematics But also about art technology and images And above all about cinema which in the past years together with theater has discovered mathematics and mathematicians It was conceived as a contribution to the World Year on Mathematics The authors argue that the discussion about the differences between the so called two cultures of science and humanism is a thing of the past They hold that both cultures are truly linked through ideas and creativity not only through technology In doing so they succeed in reaching out to non mathematicians and those who are not particularly fond of mathematics An insightful book for mathematicians film lovers those who feel passionate about images and those with a questioning mind

"Art, Technology and Nature "

Camilla Skovbjerg Paldam, 2017-07-05 Since 1900 the connections between art and technology with nature have become increasingly inextricable Through a selection of innovative readings by international scholars this book presents the first investigation of the intersections between art technology and nature in post medieval times Transdisciplinary in approach this volume s 14 essays explore art technology and nature s shifting constellations that are discernible at the micro level and as part of a larger chronological pattern Included are subjects ranging from Renaissance wooden dolls science in the Italian art academies and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the Wunderkammer eighteenth century plant printing the climate and its artistic presentations from Constable to Olafur Eliasson and the hermeneutics of bioart In their comprehensive introduction editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature suggesting this was a transient chapter in history Thus they argue the present renegotiation between art technology and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods the Latin *ars* the Greek *techne* an area moreover supposed to imitate the creative forces of nature

Revisualizing Visual Culture
