Paper Tigers And Minotaurs The Politics Of Venezuelas Economic Reforms:

Paper Tigers and Minotaurs Moises Naim, 2013-01-25 Political and economic reform is at the top of national agendas around the world This book based on Moises Naim s participation in the Venezuelan reform experience and as executive director at the World Bank raises questions and explores problems crucial to achieving national reform strategies Naim s lucid analysis grapples with the problems of dealing with entrenched interests bent on derailing reform allaying the corrosive effects of corruption and public outcry over inequitable burdens coping with the political instability brought on by decimated public institutions managing the impact of reforms on the military establishment and mobilizing public support for measures as essential as they are painful The heady days of revolution are gone and these and other dilemmas now confront besieged reform governments everywhere The problem of managing these in the real world is the subject this book tackles

Politicians and Economic Reform in New Democracies Kent Eaton, 2010-11 As economic reform in developing countries has shifted from macroeconomic stabilization to liberalization opportunities for legislators to influence the process and outcome of reform have increased and their role has become more important This book focuses attention on differences in institutional structure in political parties and electoral rules to show how they create incentives that can explain the varying ways in which legislators respond to policy initiatives from the executive branch In Argentina and the Philippines presidents proposed similar fiscal reforms in the 1990s expanding tax bases strengthening tax administration and redesigning tax revenue sharing with subnational governments Drawing on archival research and interviews with policy makers Kent Eaton follows the path of legislation in these three areas from initial proposal to final law to reveal how it was shaped by the legislators participating in the process Obstacles to the adoption of reform he demonstrates are greater in candidate centered systems like the Philippines where the cultivation of personal reputations is paramount than in party centered systems like Argentina s where loyalty to party leaders is emphasized To test his argument further Eaton looks finally at other kinds of reform ventured in these two countries and at tax reforms attempted in some other countries

Beyond Tradeoffs Nancy Birdsall, Carol L. Graham, Richard H. Sabot, 1998-09-01 Latin American income distribution is among the most unequal in the world Both the poor and the wealthy have paid a price for this inequality which is in part responsible for the region s low growth rates The essays in this book propose new ways of reducing inequality not by growth inhibiting transfers and regulations but by enhancing efficiency eliminating consumption subsidies for the wealthy increasing the productivity of the poor and shifting to a more labor and skill demanding growth path In *Beyond Tradeoffs* Latin American experts demonstrate how market friendly measures in key policy areas can simultaneously promote greater equity and greater efficiency By identifying win win strategies the authors challenge the conventional wisdom that there is always a tradeoff between these two objectives Extensive macroeconomic reforms in the region have provided opportunities to implement such strategies across many sectors The volume aims at building a Latin consensus on a second round of reforms

reforms that address the urgent issue of inequality without undermining efficient growth Contributors include Jonathan Coles Rene Cortazar Ricardo Hausmann Juan Luis Londo o Nora Lustig Moises Na m and Joseph Stiglitz Copublished with the Inter American Development Bank

Venezuelan Politics in the Chávez Era Steve Ellner, Daniel Hellinger, 2004 The radical alteration of the political landscape in Venezuela following the electoral triumph of the controversial Hugo Chavez calls for a fresh look at the country s institutions and policies In response this title offers a revisionist view of Venezuela s recent political history and a fresh appraisal of the Chavez administration

Party-System Collapse Jason Seawright, 2012-10-24 Most party systems are relatively stable over time Yet in the 1980s and 1990s established party systems in Peru and Venezuela broke down leading to the elections of outsider Alberto Fujimori and anti party populist Hugo Chavez Focusing on these two cases this book explores the causes of systemic collapse To date scholars have pointed to economic crises the rise of the informal economy and the charisma and political brilliance of Fujimori and Chavez to explain the changes in Peru and Venezuela This book uses economic data surveys and experiments to show that these explanations are incomplete Political scientist Jason Seawright argues that party system collapse is motivated fundamentally by voter anger at the traditional political parties which is produced by corruption scandals and failures of representation Integrating economic organizational and individual considerations Seawright provides a new explanation and compelling new evidence to present a fuller picture of voters decisions and actions in bringing about party system collapse and the rise of important outsider political leaders in South America

Challenging the State Merilee S. Grindle, 1996-02-23 The 1980s and 1990s posed great challenges to governments in Latin America and Africa Deep economic crises and significantly heightened pressure for political reform severely taxed their capacity to manage economic and political tasks These crises pointed to an intense need to reform the state and redefine its relationship to the market and civic society This book examines the paradox of states that have been weakened by crisis just as their capacity to encourage economic development and provide for effective governance most needs to be strengthened Case studies of Mexico and Kenya allow the author to analyse the opportunities available for political leadership in moments of crisis and the constraints on action provided by leadership goals and existing political and economic structures She argues that while leaders and political structures are often part of the problem they can also be part of the solution in building more efficient effective and responsive states

The Impact of Emerging Economies on Global Energy and the Environment Bruce M. Bagley, Hanna Samir Kassab, Dina Moulioukova, 2015-11-09 Changing patterns of energy production and consumption are transforming the geopolitics of the global system The BRICS countries Brazil Russia India China and South Africa not discussed in this volume a loose conglomeration of emerging powers are part of the change as are Western powers Variations in the energy policies of the Americas especially the United States and Canada are altering existing dynamics Both states are increasing energy production and are projected to become energy independent in the very near future The BRICS themselves wield much energy power as well Specifically Russia s oil policy

and China's coal policy are creating for the world a new infrastructure within which middle and weaker countries may consider as the future. This edited volume summarizes our analysis with particular emphasis on the rapidly changing role of the BRICS in the world's energy system. In this collection energy experts and international relations analysts examine production and consumption of states, the exportation and importation of energy and alternative strategies for maintaining the international order or changing the international order.

Monetary Policy and Currency Boards: Latin America and Caribbean Countries Examples Vol.2 Steve Hanke, Bilal Kargı, 2023-03-01. It is possible to present a brief summary of the subjects that the chapters in this book focus on. Ch 1 The Hanke Krus World Hyperinflation Table first appeared in the authoritative Routledge Handbook of Major Events in Economic History which was published in 2013. The table contained every country that had ever experienced a hyperinflation, all 56 of them. With this paper we amend the Table and add a 57th entry, Venezuela. On December 3, 2016, Venezuela's inflation met all the criteria required to qualify as a hyperinflation. Specifically, Venezuela's monthly inflation rate exceeded 50 percent per month for 30 consecutive days.

Towards Universal Health Care in Emerging Economies Ilcheong Yi, 2017-02-28. This book explores how political, social, economic, and institutional factors in eight emerging economies have combined to generate diverse outcomes in their move towards universal health care. Structured in three parts, the book begins by framing social policy as an integral system in its own right. The following two parts go on to discuss the opportunities and challenges of achieving universal health care in Thailand, Brazil, and China, and survey the obstacles facing India, Indonesia, Russia, South Africa, and Venezuela in the reform of their health care systems. The evolution of social policy systems and the cases in this volume together demonstrate that universalism in health care is continuously redefined by the interactions between diverse political forces and through specific policy processes. At a time when international and national level discourse around health systems has once again brought universalism to the fore, this edited collection offers a timely contribution to the field in its thorough analysis of health care reform in emerging economies.

Populism in Venezuela Ryan Brading, 2013. Populism in Venezuela analyses the emergence, formation, reproduction, and resistance to a left-wing populist project in a major world oil producer. For readers who seek to understand the historical, economical, and sociological contexts that gave rise to a 38-year-old mestizo mulatto Lieutenant Colonel who stormed the presidential palace in a bloody coup d'état in 1992, subsequently returned to the same palace in 1998 but this time as a democratically elected President, and has been in power since, this book is the right place to start. Clague, 2016-07-08 Economics like most other social sciences is not a pure discipline Indeed it has been enhanced by the fact that there is so much overlap between it and the related fields of business industrial relations political science social psychology and sociology This book is the first attempt to explain how work in economics has influenced and benefited from a merging of economic analysis with the research practices of these related fields of study With contributions from leading economists from around the world it demonstrates how economics is leading the way toward a more unified social science **Global Change, Regional Response** Barbara Stallings, 1995-09-29 This book offers a new perspective in studying development in the post cold war world **Fast Forward** Scott B. MacDonald, 2018-01-18 Latin America is developing rapidly As the authors see the region a small group of countries has found a fast forward button In these countries change is exciting occurring at such a rapid pace that a major breakthrough hi economic growth appears within grasp After an almost decade long period of recession and stagnation many Latin American economies now have elected governments With a few exceptions most have also improved their socioeconomic conditions beyond meeting basic human needs Yet few North Americans or Europeans are aware of these advances How does Latin America fit into the changing world in the 1990s and why should someone living in the United States Europe or developed parts of the Pacific Basin care Fast Forward shows that Latin America s economic renaissance clearly has implications for a post Cold War world order Latin America is starting to make important contributions particularly in the areas of international diplomacy economics and culture Collectively Latin Americans now demonstrate a coherent collective will about where they wish to take themselves This does not mean that U S influence in the Americas will soon disappear but that new challenges in the international system will force greater equity in Western Hemisphere relationships While Latin America in the 1990s offers much to be excited about the authors caution that there are dangers in being too enthusiastic The always present potential for top down authoritarian approaches must temper enthusiasm about a better Latin American future Despite this the authors see a well defined departure from past economic modes occurring and the potential for a higher level of development for some countries This book is for economists sociologists and political scientists interested in economic and political development and researchers interested in Latin America in particular **Cracking the Highest Glass Ceiling** Rainbow

Murray,2010-07-01 This examination of the role of gender stereotyping in media coverage of executive elections uses nine case studies from around the world to provide a unique comparative perspective In recent years more and more high profile women candidates have been running for executive office in democracies all around the world Cracking the Highest Glass Ceiling A Global Comparison of Women s Campaigns for Executive Office is the first study to undertake an international comparison of women s campaigns for highest office and to identify the commonalities among them For example women candidates often begin as front runners as the idea of a woman president captures the public imagination followed by a decline in popularity as stereotypes and gendered media coverage kick in to erode the woman s perceived credibility as a national leader On the basis of nine international case studies of recent campaigns written by thirteen country specialists the volume develops an overarching framework which explores how gender stereotypes shape the course and outcome of women s campaigns in the male dominated worlds of executive elections in North America South America Europe Africa and Australasia This comparative approach allows the authors to discriminate between the contingent effects of a particular candidate or national culture and the universal operation of gender stereotyping Case studies include the campaigns for executive office of Hillary Rodham Clinton United States 2008 Sarah Palin United States 2008 Angela Merkel Germany 2005 and 2009 S gol ne Royal France 2007 Helen Clark New Zealand 1996 2008 Cristina Fern ndez de Kirchner Argentina 2007 Michelle Bachelet Chile 2006 Ellen Johnson Sirleaf Liberia 2005 and Irene S ez Venezuela 1998 **Neoliberalism,**

Globalization, and Inequalities Vicente Navarro,2020-05-06 Since U S President Reagan and U K Prime Minister Thatcher a major ideology under the name of economic science has been expanded worldwide that claims that the best policies to stimulate human development are those that reduce the role of the state in economic and social lives privatizing public services and public enterprises deregulating the mobility of capital and labor eliminating protectionism and reducing public social protection This ideology called neoliberalism has guided the globalization of economic activity and become the conventional wisdom in international agencies and institutions such as the IMF World Bank World Trade Organization and the technical agencies of the United Nations including the WHO Reproduced in the Washington consensus in the United States and the Brussels consensus in the European Union this ideology has guided policies widely accepted as the only ones possible and advisable This book assembles a series of articles that challenge that ideology Written by well known scholars these articles question each of the tenets of neoliberal doctrine showing how the policies guided by this ideology have adversely affected human development in the countries where they have been implemented *Democracy Challenged*

Marina Ottaway,2013-01-25 During the 1990s international democracy promotion efforts led to the establishment of numerous regimes that cannot be easily classified as either authoritarian or democratic They display characteristics of each in short they are semi authoritarian regimes These regimes pose a considerable challenge to U S policymakers because the superficial stability of many semi authoritarian regimes usually masks severe problems that need to be solved lest they lead

to a future crisis Additionally these regimes call into question some of the ideas about democratic transitions that underpin the democracy promotion strategies of the United States and other Western countries Despite their growing importance semi authoritarian regimes have not received systematic attention Marina Ottaway examines five countries Egypt Azerbaijan Venezuela Croatia and Senegal which highlight the distinctive features of semi authoritarianism and the special challenge each poses to policymakers She explains why the dominant approach to democracy promotion isn't effective in these countries and concludes by suggesting alternative policies Marina Ottaway is senior associate and codirector of the Democracy and Rule of Law Project at the Carnegie Endowment
