Methods in Bilingual Reading Comprehension Research Roberto R. Heredia, Jeanette Altarriba, Anna B. Cieřlicka, 2015-10-17 The collected essays in this volume present an overview and state of the field of

traditional and recently developed methodological approaches to the study of bilingual reading comprehension. It critically reviews and examines major findings from classical behavioral approaches such as the visual moving window, rapid serial visual presentation, RSVP, and eye tracking, as well as newly developing neuropsycholinguistic methodologies such as Event Related Potentials (ERPs) and Functional Magnetic Resonance Imaging (fMRI). Written to address a timely topic, *Methods in Bilingual Reading Comprehension Research* updates the field of bilingual reading by critically examining the contributions of the various behavioral and technologically based reading techniques used to understand psychological processes underlying written language comprehension. Each topic is covered first from a theoretical and then from an experimental viewpoint. Moreover, the volume contributes to the development and establishment of Bilingual Reading as a subfield of bilingual sentence processing and fills a significant gap in the literature on bilingual language processing and thought. Significantly, *Methods in Bilingual Reading Comprehension Research* presents an overall view of some of the typical psycholinguistic techniques and approaches, as well as proposing other possible tasks that may prove viable in investigating such theoretical issues as bilingual lexical ambiguity resolution or how bilingual speakers might resolve multiple sources of potentially conflicting information as they comprehend sentences and discourse during the communicative process. In addition to aid reader comprehension and encourage readers to acquire hands-on experience in the creation and development of experiments in the realm of bilingual reading research, each chapter includes a list of key words, suggested student research projects, and questions to both help the reader review the chapter and expand upon the reading. With its comprehensive coverage of a crucial subfield of psycholinguistics and language processing, *Methods in Bilingual Reading Comprehension Research* is an invaluable and informative resource for all students and researchers in bilingualism, neurolinguistics, bilingual cognition, and other related fields.

Varghese, 2004-01-01 *Bilingualism and Language Pedagogy* brings an understanding of language as a social practice and bilingualism as the study of bidirectional transitioning to the examination of bilingual settings in the US, Europe, and the developing countries. Focusing both on bilingual linguistic competence and educational politics and practice, the volume provides valuable practical proposals and models for developing sociocultural and linguistic competencies among bilingual practitioners and students.

Multilingua, 1995 **The Romance-Speaking Balkans**, 2021-03-22 The relationship between language and identity is a complex topic everywhere in the world, but maybe it is even more crucial for those people living in the Balkans who speak a Romance variety. This volume is the result of a project started by the Balkan History Association and brings together scholars trained in social sciences and humanities to offer the reader a thorough sociolinguistic and anthropological account of this region. It constitutes a contribution to a reformulation of methodological and analytical issues, providing a better insight in the linguistic and geopolitical processes taking place in the area. Contributors are Michael Studemund, Halvy C. T. Lin, Mamali Anna, Christine Weirich, Ewa Nowicka, Daniela, Carmen Stoica.
