

The relatively small scale of the Lairg operations makes it possible to draw some tentative statistical conclusions. In 1811, there were in the parish a total of fifty-eight named tenants (in fifty-seven tenancies): in 1814, there were seventy (in sixty-five tenancies). The variation in size of tenancy was much increased, muir settlers paying little or no rent, while one or two of the new farms approached £50. It should be noted that at least forty of the 1811 tenants can be traced in 1814, and that of the eleven tenants holding the new small farms at least eight had been tenants in 1811. Young's plans in Lairg meant, on the one hand, a loss of status – though not of security, for muir settlers were given nineteen-year leases¹ – for a large number of tenants. On the other hand, they went some distance towards creating a new class of medium farmers. In this parish at least, the influence of what Young had seen in Moray and Speyside showed itself.

ROGART

Young had envisaged at first a complete reorganisation of Rogart on the Speyside pattern, and Sellar actually drew up regulations for this purpose.² In the end, however, Young discarded this, together with ideas for new sheep-farms, with the exception of Rhian, which he set to Dugald Gilchrist of Ospisdale with entry at Whitsunday 1812.³ He was able the more easily to do this as the wadset of Muie was now redeemed, and Robert Gordon of Rhian and his subtenants could be accommodated in part of the Muie lands. The greater part of Muie was reorganised for the sitting tenants.

Young's general Rogart operations, though aimed at raising rents and consolidating holdings, did not lead to many changes of tenancy. Such reorganisation as took place was mainly round Rogart kirk, with an increase in the number of tenants on the middle reaches of the Fleet. Young told the schoolmaster of Rogart, Alexander Gunn, that he had precise instructions to accommodate the existing

¹ There is some uncertainty as to the actual length; in the 1815 rental the tenants are entered as having fifteen-year leases.

Scottish Romanticism and Collective

Memory in the British Atlantic McNeil Kenneth McNeil, 2020-09-04 Charts Scottish Romanticism's significant contribution to the making of collective memory in the transatlantic world. Offers an in-depth examination of Scottish Romantic literary ideas on memory and their influence among various cultures in the British Atlantic broken down into distinct writing modes: memorials, travel memoir, slave narrative, colonial policy paper, emigrant fiction, and contexts pre and post Revolution America. French Canadian cultural nationalism, the slavery debate, immigration and colonial settlement. Looks at familiar Scottish writers Walter Scott, John Galt in new ways while introducing less familiar ones Anne Grant, Thomas Pringle. Brings Scottish Romantic literary studies into new engagements with other fields such as transatlantic and memory studies. Opens up new dialogues between Scottish literature and culture and other literatures and cultures for example French Canadian Black Diaspora, Indigenous Scots who were at the vanguard of British colonial expansion in North America in the Romantic period, believed that their own nation had undergone an unprecedented transformation in only a short span of time. Scottish writers became preoccupied with collective memory, its powerful role in shaping group identity as well as its delicate fragility. McNeil reveals why we must add collective memory to the list of significant contributions Scots made to a culture of modernity.

Bumsted, 2008-11-01 Thomas Douglas, the Fifth Earl of Selkirk, 1770-1820, was a complex man of his times whose passions left an indelible mark on Canadian history. A product of the Scottish Enlightenment and witness to the French Revolution, he dedicated his fortune and energy to the vision of a new colony at the centre of North America. His final legacy, the Red River Settlement, led to the eventual end of the dominance of the fur trade and began the demographic and social transformation of western Canada. The product of three decades of research, this is the definitive biography of Lord Selkirk. Bumsted's passionate prose and thoughtful analysis illuminate not only the man but also the political and economic realities of the

British empire at the turn of the nineteenth century He analyzes Selkirk's position within these realities showing how his paternalistic attitudes informed his social experiments in colonization and translated into unpredictable and often tragic outcomes Bumsted also provides extensive detail on the complexities of colonization the Scottish Enlightenment Scottish peerage the fur trade the Red River settlement and early British Canadian politics **The Gunns; History, Myths and Genealogy** Alastair Gunn, 2020-02-15 Here is a radical academically based text which demolishes the myths currently masquerading as Gunn history Gunns are best thought of as the original non related inhabitants of northern mainland Scotland They do not have an Orkney Islands origin Gunns should not be viewed as a clan as they had no founding ancestor There was never an historic Clan Gunn Chief The first Gunn known to history was Coroner Gunn of Caithness who died around 1450 His eldest son started the MacHamish Gunns of Killernan line many descendants from that line exist all around the world Major detail on this MacHamish line is included This book is an important addition to Scottish Highland history

White People, Indians, and Highlanders Colin G. Calloway,2008-07-03 In nineteenth century paintings the proud Indian warrior and the Scottish Highland chief appear in similar ways colorful and wild righteous and warlike the last of their kind Earlier accounts depict both as barbarians lacking in culture and in need of civilization By the nineteenth century intermarriage and cultural contact between the two described during the Seven Years War as cousins was such that Cree Mohawk Cherokee and Salish were often spoken with Gaelic accents In this imaginative work of imperial and tribal history Colin Calloway examines why these two seemingly wildly disparate groups appear to have so much in common Both Highland clans and Native American societies underwent parallel experiences on the peripheries of Britain s empire and often encountered one another on the

frontier Indeed Highlanders and American Indians fought traded and lived together Both groups were treated as tribal peoples remnants of a barbaric past and eventually forced from their ancestral lands as their traditional food sources cattle in the Highlands and bison on the Great Plains were decimated to make way for livestock farming In a familiar pattern the cultures that conquered them would later romanticize the very ways of life they had destroyed White People Indians and Highlanders illustrates how these groups alternately resisted and accommodated the cultural and economic assault of colonialism before their eventual dispossession during the Highland Clearances and Indian Removals What emerges is a finely drawn portrait of how indigenous peoples with their own rich identities experienced cultural change economic transformation and demographic dislocation amidst the growing power of the British and American empires *The Origins of Scottish Nationhood* Neil Davidson, 2000-04-20 The traditional view of the Scottish nation holds that it first arose during the Wars of Independence from England in the thirteenth and fourteenth centuries Although Scotland was absorbed into Britain in 1707 with the Treaty of Union Scottish identity is supposed to have remained alive in the new state through separate institutions of religion the Church of Scotland education and the legal system Neil Davidson argues otherwise The Scottish nation did not exist before 1707 The Scottish national consciousness we know today was not preserved by institutions carried over from the pre Union period but arose after and as a result of the Union for only then were the material obstacles to nationhood most importantly the Highland Lowland divide overcome This Scottish nation was constructed simultaneously with and as part of the British nation and the eighteenth century Scottish bourgeoisie were at the forefront of constructing both The majority of Scots entered the Industrial Revolution with a dual national consciousness but only one nationalism which was British The Scottish nationalism which arose in Scotland during the twentieth century is therefore not a revival of a pre Union nationalism after 300 years but an entirely new formation Davidson provides a revisionist history of the origins of Scottish and British national consciousness that sheds light on many of the contemporary debates about nationalism *The Georgian Triumph, 1700-1830* Michael Reed, 2024-11-01 In *The Georgian Triumph* 1700 1830 originally published in 1983 Michael Reed re creates the ambience of eighteenth century Britain a period of astonishing change and paradoxically of massive stability Both the change and the stability were reflected in the landscape Dr Reed explores the visual impact on the landscape of the adoption of new ideas and practices These range from the acceptance of the Palladian style of architecture and its gradual replacement by a taste for Gothic Picturesque or Chinese designs to the practical exploration of the power of atmospheric pressure and improvements in road making techniques and the design of water wheels He describes the feel of what it must have been like to live through the years which saw the beginning of the end for the old medieval society and the birth of a modern industrial nation Traditional ways of life were slowly abandoned as ancient open fields were enclosed and divided up by straight roads and hedgerows Changes in the moral climate led to the gradual disappearance of village feasts and the suppression of cockfighting and bull running while other more acceptable

pastimes such as horse racing and cricket acquired rules and institutions The book shows that these changes were brought about by people at work and at play going about their everyday affairs they wrote and re wrote upon the landscape the autobiography of the society of which they formed a part reflecting its aspirations ideals and achievements *The Making of the Scottish Countryside* M. L. Parry,T. R. Slater,2021-10-12 Originally published in 1980 this book examines the evolution of the Scottish landscape from pre historic times to the mid nineteenth century It considers the way in which the structural base of agriculture and the changing farming system came to alter the Scottish rural landscape This book with its focus on the underlying landscape processes gives a developmental view of landscape change It therefore considers the crucial question of the rate and pace of landscape change and argues that the Scottish landscape was not the product of a few brief phases of quite rapid development but rather the result of a continual and gradual process of change It also looks at the regional variation of landscape change and establishes the importance of regional linkages in the diffusion of ideas especially in new technology
