Editors Note: In the essay below, Ronald Akers provides an expansive primer on the history of the treatment of religion in criminological theory and research. He points to the integral role that faith plays in rehabilitation and restorative justice responses to both juvenile and adult offending. However, religion does not always promote a pro-social, anti-criminal impact on crime; Akers highlights the upcoming ASC Presidential Panel presentations on the distortion or radicalization of religion to justify criminal acts. Thanks to Ron Akers for offering this thorough overview of the religion and crime.

RELIGION AND CRIME

Ronald L. Akers, University of Florida

Religion is a set or system of transcendent beliefs, faith, practices, customs, and institutions that has both collective and individual expressions. The notion that religion is wholly private and therefore should not intrude into the public arena mistakes the private spiritual dimensions of faith with the institutional and very legitimate public expression of that faith which overlaps with and is intertwined with other social institutions of education, economy, family, and government. Common sense observations indicate that religious traditions, affiliations, expressions, and beliefs always have played and continue to play an important role in society, although varying from society to society and culture to culture. While religious extremism (as is true for extremism of any type), can provide motivation and support for deviant actions, crime, and violence (Miller, 2006), and religious groups and beliefs can develop in direct opposition to the established and prevailing society and culture, the expectation is that religion generally provides institutional support for conformity to conventional culture. That is, religious beliefs, worship, doctrines, commitment, and activities work against violating the laws and norms of good and civil behavior in society. Certain Christian doctrines, for instance, teach respect and obedience to both government and religious authorities, and if one truly believes such doctrines as "do unto others as you would have them do unto you," and "love your neighbor as yourself," it is difficult to bring oneself to cheat, defraud, or do violence against others.

The social sciences from their very inception have included religion as a sociological, psychological, or social psychological variable that is studied both as a dependent and independent variable in society along with other social behavior and institutions. In criminology religion has been treated primarily as an independent variable with variations in delinquency, crime, and deviance as the dependent variables. Typically the expectation is that religious faith and participation in religious worship, prayer, fellowship, Bible study, and other activities will have an anti-delinquent effect constraining initial law violation and restraining repetition if it occurs. There are both theoretical and empirical foundations for this expectation. In my view, the "core" social psychological theories of criminal and delinquent behavior in criminology, control, social learning, and strain theories (Cullen et al., 2006; Cullen and Agnew, 2011), as well as other mainstream criminological theories, would hypothesize (or have tenets consistent with a hypothesis of) a negative, direct or indirect, relationship between non-extremist religion and law violation. It seems it took criminology a while to get to this theoretical point, however. If the overview by George B. Vold (1958) in the first book devoted entirely to reviewing all of theoretical criminology is any indication, extant theory at the mid-point of the twentieth century did not pay much attention to the effects of religion on criminal behavior. The only focused discussion by Vold on religion was his brief portrayal of "demonological explanations," as non-scientific, religiously based accounting of behavior relying on unseen supernatural forces with which he con-

Interpersonal Criminology K. Jaishankar, 2016-08-05 Based on peer reviewed articles from the Second International Conference of the South Asian Society of Criminology and Victimology Interpersonal Criminology investigates the roots of crime and victimization rather than dissecting criminal behavior after the fact The book divides crime by type covering crimes against women crimes against children and youths culture conflict and victimization of groups and interpersonal cybercrimes Perfect for criminal justice practitioners and advanced human rights criminology and victimology students

Interpersonal Criminology explores the complexities of crime and interpersonal events in both established and emerging fields of criminology including those concerning women and minorities SNI National Criminal Justice Reference Service (U.S.), National Criminal Justice Reference Service (U.S.), 1980 *Criminal Sentencing as Practical Wisdom* Graeme Brown, 2017-06-01 How do judges sentence In particular how important is judicial discretion in sentencing Sentencing guidelines are often said to promote consistency but is consistency in sentencing achievable or even desirable Whilst the passing of a sentence is arguably the most public stage of the criminal justice process there have been few attempts to examine judicial perceptions of and attitudes towards the sentencing process Through interviews with Scottish judges and by presenting a comprehensive review and analysis of recent scholarship on sentencing including a comparative study of UK Irish and Commonwealth sentencing jurisprudence this book explores these issues to present a systematic theory of sentencing Through an integration of the concept of equity as particularised justice the Aristotelian concept of phronesis or practical wisdom the concept of value pluralism and the focus of appellate courts throughout the Commonwealth on sentencing by way of instinctive synthesis it is argued that judicial sentencing methodology is best viewed in terms of a phronetic synthesis of the relevant facts and circumstances of the particular case The author concludes that sentencing is best conceptualised as a form of case orientated concrete and intuitive decision making one that seeks individualisation through judicial recognition of the profoundly contextualised nature of the process Criminology Research Focus Karen T. Froeling, 2007 Criminology is the scientific study of crime as an individual and social phenomenon Criminological research areas include the incidence and forms of crime as well as its causes and consequences They also include social and governmental regulations and reactions to crime Criminology is an interdisciplinary field in the behavioural sciences drawing especially on the research of sociologists and psychologists as well as on writings in law This book presents leading research from around the world *The Official History of Criminal Justice in England and Wales* Paul Rock, 2019-04-30 Volume II of The Official History of Criminal Justice in England and Wales traces for the first time the genesis and early evolution of two principal institutions in the criminal justice system the Crown Court and the Crown Prosecution Service This volume examines the origins and shaping of two critical institutions the Crown Court which rose from the ashes of the Courts of Assize and Quarter Sessions and the Crown Prosecution Service which replaced a rather haphazard system of police prosecuting solicitors The 1971 Courts Act and the 1985 Prosecution of Offences Act were to reconfigure the architecture of criminal justice transforming the procedures by which people were charged prosecuted and in the weightier cases demanding a judge and jury tried in the criminal courts of England and Wales One stemmed from a crisis in a medieval system of travelling justices that tried people in the wrong places and for inadequate lengths of time The other was precipitated by a scandal in which three men were wrongly convicted for the murder of a bisexual prostitute Theirs is an as yet untold history that can be explored in depth because it is recent enough in the words of Harold Wilson to have been

written while the official records could still be supplemented by reference to the personal recollections of the public men who were involved This book will be of much interest to students of criminology and British history politics and law **Bulletin of the New York Public Library** New York Public Library,1911 Includes its Report 1896 19 *The NIJ Publications Catalog* National Institute of Justice (U.S.),1987
