Borgwaldt, Terry Joyce, 2013-06-15 Typology research is extremely important in both proposing classification frameworks and in promoting the careful investigation and analysis of the core concepts inherent within the classification contrasts employed More exemplary of the latter aspect the present collection of papers on the typology of writing systems address a number of significant linguistic and psycholinguistic issues surrounding the classification of writing systems The seven contributions within this volume which originally appeared as a special issue of *Written Language and Literacy* 14 1 2011 cover a wide variety of issues ranging from an overview of writing system typology research comparative graphematics letter shape similarities the morphographic principle tone orthography typology measuring graphematic transparency to unconventional spellings within online chat Reflecting the growing interest in writing the book will be of interest to advanced students and researchers working on writing systems written language and reading research *Orthography, Phonology, Morphology and Meaning* R. Frost, Marian Katz, 1992-10-20 The area of research on printed word recognition has been one of the most active in the field of experimental psychology for well over a decade However notwithstanding the energetic research effort and despite the fact that there are many points of consensus major controversies still exist This volume is particularly concerned with the putative relationship between language and reading It explores the ways by which orthography phonology morphology and meaning are interrelated in the reading process Included are theoretical discussions as well as reviews of experimental evidence by leading researchers in the area of experimental reading studies The book takes as its primary issue the question of the degree to which basic processes in reading reflect the structural characteristics of language such as phonology and morphology It discusses how those characteristics can shape a language s orthography and affect the process of reading from word recognition to comprehension Contributed by specialists the broad ranging mix of articles and papers not only gives a picture of current theory and data but a view of the directions in which this research area is vigorously moving **Writing Without Letters** Ernst Pulgram, 1976 **Verbal Communication** Andrea Rocci, Louis de Saussure, 2016-03-07 Common sense tells us that verbal communication should be a central concern both for the study of communication and for the study of language Language is the most pervasive means of communication in human societies especially if we consider the huge gamut of communication phenomena where spoken and written language combines with other modalities such as gestures or pictures Most communication researchers have to deal with issues of language use in their work Classic methods in communication research from content analysis to interviews and questionnaires not to mention the obvious cases of rhetorical analysis and discourse analysis presuppose the understanding of the meaning of spontaneous

or elicited verbal productions Despite its pervasiveness verbal communication does not currently define one cohesive and distinct subfield within the communication discipline The Handbook of Verbal Communication seeks to address this gap In doing so it draws not only on the communication discipline but also on the rich interdisciplinary research on language and communication that developed over the last fifty years as linguistics interacted with the social sciences and the cognitive sciences The interaction of linguistic research with the social sciences has produced a plethora of approaches to the study of meanings in social context from conversation analysis to critical discourse analysis while cognitive research on verbal communication carried out in cognitive pragmatics as well as in cognitive linguistics has offered insights into the interaction between language inference and persuasion and into cognitive processes such as framing or metaphorical mapping The Handbook of Verbal Communication volume takes into account these two traditions selecting those issues and themes that are most relevant for communication scholars It addresses background matters such as the evolution of human verbal communication and the relationship between verbal and non verbal means of communication and offers an extensive discussion of the explicit and implicit meanings of verbal messages with a focus on emotive and figurative meanings Conversation and fundamental types of discourse such as argument and narrative are presented in depth as is the key notion of discourse genre The nature of writing systems as well as the interaction of spoken or written language with non verbal modalities are devoted ample attention Different contexts of language use are considered from the mass media and the new media to the organizational contexts Cultural and linguistic diversity is addressed with a focus on phenomena such as multilingual communication and translation A key feature of the volume is the coverage of verbal communication quality Quality is examined both from a cognitive and from a social perspective It covers topics that range from the cognitive processes underlying deceptive communication to the methods that can be used to assess the quality of texts in an organizational context

The Metamorphosis of Heads Denise Y. Arnold, Juan de Dios Yapita, 2006-05-07 Since the days of the Spanish Conquest the indigenous populations of Andean Bolivia have struggled to preserve their textile based writings This struggle continues today both in schools and within the larger culture The Metamorphosis of Heads explores the history and cultural significance of Andean textile writings weavings and kipu knotted cords and their extreme contrasts in form and production from European alphabet based texts Denise Arnold examines the subjugation of native texts in favor of European ones through the imposition of homogenized curricula by the Educational Reform Law As Arnold reveals this struggle over language and education directly correlates to long standing conflicts for land ownership and power in the region since the majority of the more affluent urban population is Spanish speaking while indigenous languages are spoken primarily among the rural poor The Metamorphosis of Heads acknowledges the vital importance of contemporary efforts to maintain Andean history and cultural heritage in schools and shows how indigenous Andean populations have incorporated elements of Western textual practices into their own textual activities Based on extensive fieldwork over two decades and

historical anthropological and ethnographic research Denise Arnold assembles an original and richly diverse interdisciplinary study The textual theory she proposes has wider ramifications for studies of Latin America in general while recognizing the specifically regional practices of indigenous struggles in the face of nation building and economic globalization

Theoretical Issues in Dakota Phonology and Morphology Patricia A. Shaw, 2018-10-29 First published in 1980 This study has two basic goals The first is to provide an explicit and coherent analysis of a variety of phonological and morphological processes within the grammars of a number of different dialects of Dakota The second is to investigate the relevance of certain aspects of the proposed analysis to particular tenets of the general theory of transformational generative phonology and of recent proposals regarding the role of morphology within a generative framework This title will be of great interest to students of linguistics

Visible Speech John DeFrancis, 1989-06-01 Visible Speech is an attempt to set the record straight about the nature of writing John DeFrancis a noted specialist in the Chinese language shows that writing can be based only upon a sound system and not upon any other linguistic level He corrects the erroneous views of Chinese writing as pictographic ideographic logographic or morphemic and defends his conclusion that because of these misrepresentations the nature of all writing continues to be misunderstood Using the writing systems of Sumerian Egyptian Arabic Japanese Korean Greek Mayan and English among others to illustrate his points Dr DeFrancis stresses their basic identity as representatives of visible speech while noting their secondary differences as manifested in their diverse script forms He proposes a new classification of writing systems based on this theme of diversity and oneness and makes an impassioned case for the essential phonetic component of all writing This book reflects the author's sound scholarship and novel insights which place it in the forefront

with such classics on writing as those by Gelb, Derrida, Cohen, Frow, and Jensen. The readable style aims at a general audience interested in understanding the nature of the symbols that first strike the eye while the academic research involved makes it an indispensable work for scholars in the many fields related to language and linguistics.

Computational Linguistics, 1984 *That's Raven Talk* Mareike Neuhaus, 2000 The first comprehensive study of North American Indigenous languages as the basis of textualized orality in Indigenous literatures in English. Drawing on a significant Indigenous language structure, the holophrase (one word sentence), Neuhaus proposes holophrastic reading as a culturally specific reading strategy for orality in Indigenous writing. In readings of works by Ishmael, Alunik, Inuvialuit, Alooook, Ipellie, Inuit, Richard, Van Camp, Dogrib, Thomas, King, Cherokee, and Louise, Bernice Halfe, Cree, she demonstrates that para-holophrases, the various transformations of holophrases into English language discourse, textualize orality in Indigenous literatures by grounding it in Indigenous linguistic traditions. Neuhaus's discussion points to the paraholophrase, the functional equivalent of the holophrase, as a central discourse device in Indigenous writing and as a figure of speech in its own right. Building on interdisciplinary research, this groundbreaking study not only links oral strategies in Indigenous writing to Indigenous rhetorical sovereignty but also points to ancestral language influences and Indigenous rhetoric more generally as areas for future research.
