Project funding suddenly terminated left them without an money and supplies needed to operate their homes projects and services in some ways and returns to his own world. The Company began the mission from rumor. It was past two thirty a m when the helicopter made an approach for a landing on the high mountain plateau. The June sun lay just below the lighted horizon on the mountain peaks to the east. The new moon had grown pale and white in the light of early dawn. When they came closer I could see that she had green eyes that sparkled unusually bright. I made the recording for the security system at your suggestion father she replied quickly. For some reason I felt relief knowing the older gentleman was her father. He said Are you interested in the whole story. Well yes I answered I am interested in the unique aspects of the project. That is what the captain wanted the whole story if there was a story I had a duty to perform and I owed my loyalty to the company. It was not my place to make any judgments. I intuitively felt certain the project people were not subversive. Project H is unique of all government projects. Research involves electricity of every kind and no other kind of energy. Cultivating Sacred Space Elizabeth Murray, 1997. Linda Greenlaw hadn't been blue water fishing for ten years since the great events chronicled in *The Perfect Storm* and *The Hungry Ocean* when an old friend offered her the captaincy on his boat *Seahawk* for a season of swordfishing. She took the bait of course and thus opened a new chapter in a life that had already seen enough adventure for three lifetimes. The *Seahawk* turns out to be the rustiest of buckets with sprung, busted and ancient equipment guaranteed to fail at any critical moment. Life is never dull out on the Grand Banks and no one is better at capturing the flavor and details of the wild ride that is swordfishing from the technical complexities of longline fishing and the nuances of reading the weather and waves to the sheer beauty of the open water. The trip is full of surprises, a bit harder and saltier than I had hoped for but none more unexpected than when the boat's lines inadvertently drift across the Canadian border and she lands in jail. *Seaworthy* is about nature, human and other, about learning what you can control and what you do when fate takes matters out of your control. It's about how a middle aged woman who sets a high bar for herself copes with challenge and change and frustration about the struggle to succeed or fail on your own terms and above all about learning how to find your true self when you're caught between land and sea. *Parabolas of Science Fiction*

Brian Atterby, Veronica Hollinger, 2013-10-21. Essays about the inherently collaborative nature of science fiction. As a geometric term, parabola suggests a narrative trajectory or story arc. In science fiction parabolas take us from the known to the unknown. More concrete than themes, more complex than motifs, parabolas are combinations of meaningful setting, character and action that lend themselves to endless redefinition and jazzlike improvisation. The fourteen original essays in this collection explore how the field of science fiction has developed as a complex of repetitions, influences, arguments and broad conversations. This particular feature of the genre has been the source of much critical commentary, most notably through growing interest in the sf megatext, a continually expanding archive of shared images, situations, plots, characters, settings and themes found in science fiction across media. Contributors include Jane Donawerth, Terry Dowling, L. Timmel Duchamp, Rachel Haywood, Ferreira, Pawel Frelik, David M. Higgins, Amy J. Ransom, John Rieder, Nicholas Ruddick, Graham Sleight, Gary K. Wolfe and Lisa Yaszek.
