The Speech of the Grail Linda Sussman, 1995 Storyteller and ceremonialist Linda Sussman explores how to speak in a new way that is one that heals and transforms She takes the epic story of the grail as told by Wolfram von Eschenbach in Parzival as her guide This tale weaves together Celtic Oriental Christian Arthurian and alchemical sources Linda Sussman sees Parzival as depicting the path of initiation to healing speech to doing the truth in word and deed First she tells the story in a beautiful way allowing the reader to reproduce within themselves the potent inner pictures of the text Then she shows that it is not so much a path toward perfection as the recovery of a right relationship to our imperfections She shows too that it is a path in which male and female aspects work together in the overcoming of evil **Projecting the Shadow** Janice Hocker Rushing, Thomas S. With Respect for Nature J. Claude Evans, 2012-02-01 We eat inevitably at the expense of other living creatures How can we take the lives of plants and animals while maintaining a proper respect for both ecosystems and the individuals who live in them including ourselves In this book philosopher J. Claude Evans challenges much of the accepted wisdom in environmental ethics and argues that human participation in the natural cycles of life and death can have positive moral value With a guide for the nonphilosophical reader and set against the background of careful and penetrating critiques of Albert Schweitzer's principle of reverence for life and Paul Taylor's philosophy of respect for nature Evans uses hunting and catch and release fishing as test cases in calling for a robust sense of membership in the natural world The result is an approachable existential philosophy that emphasizes the positive value of human involvement in natural processes in which life and death giving and receiving self and other are intertwined

Animals and Women Carol J. Adams, Josephine Donovan, 1995-11-14 *Animals and Women* is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women's rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this

compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women
