Paradigm Lost State Theory Reconsidered:

Paradigm Lost Stanley Aronowitz, Peter Bratsis, 2002 With increasing globalization the meaning and role of the nation state are in flux At the same time state theory which might help to explain such a trend has fallen victim to the general decline of radical movements particularly the crisis in Marxism This volume seeks to enrich and complicate current political debates by bringing state theory back to the fore and assessing its relevance to the social phenomena and thought of our day Throughout it becomes clear that whether confronting the challenges of postmodern and neo institutionalist theory or the crisis of the welfare state and globalization state theory still has great analytical and strategic value Global Governance and Transnationalizing Capitalist Hegemony Ian Taylor, 2016-11-25 The book is a critique of the excited talk about how various emerging economies often teleologically extended to them being powers are re writing the rules of global governance and ushering in a new set of economic assumptions *Protest and Organization in the Alternative Globalization Era* H. Gautney, 2009-12-21 This study looks at the ongoing efforts of the Alternative Global Movement and World Social Forum to reconcile contests over political organization among three of the most prominent groups on the contemporary left social and liberal democratic NGOs anti authoritarian anarchist social movements and political parties Pacifying the Homeland Brendan McQuade, 2019-08-06 The United States has poured over a billion dollars into a network of interagency intelligence centers called fusion centers These centers were ostensibly set up to prevent terrorism but politicians the press and policy advocates have criticized them for failing on this account So why do these security systems persist *Pacifying the Homeland* travels inside the secret world of intelligence fusion looks beyond the apparent failure of fusion centers and reveals a broader shift away from mass incarceration and toward a more surveillance and police intensive system of social regulation Provided with unprecedented access to domestic intelligence centers Brendan McQuade uncovers how the institutionalization of intelligence fusion enables decarceration without fully addressing the underlying social problems at the root of mass incarceration The result is a startling analysis that contributes to the debates on surveillance mass incarceration and policing and challenges readers to see surveillance policing mass incarceration and the security state in an entirely new light

State Power Bob Jessop, 2013-04-26 Bob Jessop presents an up to date account of his distinctive approach to the dialectics of structure and strategy in the exercise of state power While his earlier work critically surveys other state theories this book focuses on the development of his own strategic relational approach It introduces its main sources outlines its development applies this approach to four case studies and sketches a strategic relational research agenda Thus the book presents a comprehensive theoretical statement of the approach and guidelines for its application Key features of the book include an account of the authors theoretical development a review of recent developments in state theory and the cultural turn in political economy critical strategic relational readings of major state theorists Marx on political representation Gramsci on the spatiality of state power Poulantzas on the state as a social relation and the later Foucault on statecraft

applications of the strategic relational approach to important issues concerning the contemporary state its gendered selectivity the future of the national state the states temporal sovereignty and the relevance of multi scalar meta governance in Europe for the more general future of the state The book concludes with recommendations for future strategic relational research in political economy and state theory

Remapping Asian American History Sucheng Chan,2003 Remapping Asian American History exemplifies the emerging trends in the writing of Asian American history and fills substantive gaps in our knowledge about particular Asian ethnic groups Edited by noted scholar Sucheng Chan the essays in this volume uses new frameworks such as transnationalism the political contexts of international migrations and a multipolar approach to the study of contemporary U S race relations These concerns often ignored in earlier studies that focused on social and economic aspects of Asian American communities challenge some long held assumptions about Asian American communities and point to new directions in Asian American historiography Historians students and teachers of anthropology Asian and Asian American Studies race and ethnic studies U S immigration history and American Studies will find this collection invaluable

Marx's Capital, Capitalism and Limits to the State Raju J Das,2022-06-01 Marx s Capital Capitalism and Limits to the State examines the capitalist state in the abstract and as it exists in advanced capitalism and peripheral capitalism illustrating the ideas with evidence from the North and the South The volume unpacks the capitalist state s functions in relation to commodity relations private property and the crisis ridden production of surplus value as a part of the capital circuit M C M It also examines state s political and geographical forms It argues that no matter how autonomous it is the state cannot meet the pressing needs of the masses significantly and sustainably This is not because of so called capitalist constraints but because the state is inherently capitalist Each chapter begins with Capital volume 1 And each chapter ends with theoretical practical implications of the ideas which taken together counter existing state theory s focus on state autonomy and reforms and point to the necessity for the masses to establish a new transitional democratic state But the book goes beyond Marx too as it deploys the combined Marxism of 19th and 20th centuries Marx s Capital Capitalism and Limits to the State will interest scholars researching state society economy relations It is suitable for university students as well as established scholars in sociology political science heterodox economics human geography and international development

Why Democracy Is Oppositional John Medearis,2015-06-09 John Medearis argues that democracies face challenges which go beyond civic lethargy and unreasonable debate Democracy is inherently a fragile state of affairs because citizens create the very institutions that overwhelm them Hostile threats are the product of their own collective activities and preserving democracy will always entail struggle

Nature, Knowledge and Negation

Harry F. Dahms, 2009-12-04 Places emphasis on developments in the social theory of environmental issues the environment and the environmental crisis This also emphasises on the increasingly questionable possibility of shared knowledge at a time of increasing fragmentation of common frameworks distraction from key issues and dilution of the idea of objectivity

International Relations Stephanie Lawson, 2017-01-19 International Relations emerged as a distinct academic discipline in the early twentieth century but its philosophic foundations draw on centuries of thinking about human nature power and authority justice and injustice and their implications for relations within and between political communities In this fully revised and updated third edition of her popular text Stephanie Lawson retains a broad historical and contextual approach in introducing readers to the central themes and theoretical perspectives in IR while also addressing key issues and challenges in the contemporary period These include the emergence of states and empires theories ranging from classical realism and liberalism to postcolonial and green theory twentieth century international history security and insecurity global governance and world order international political economy globalization the future of the sovereign state and the prospects for a post international world Written in an accessible narrative style this book is an ideal primer for students at undergraduate level and beyond including those undertaking postgraduate study in IR with little or no previous academic training in the field

State Transformations: Classes, Strategy, Socialism, 2021-07-05 It is often remarked that critical and especially Marxist state theory began to lose its central place in the study of comparative politics in the 1980s Ironically this shift occurred just as neoliberal policies were transforming the social form and spatial scales of the state radically restructuring the practices of state economic intervention and extending the capabilities of the coercive arms of the state This volume addresses the impoverishment of state theory over the last decades and insists on the continued salience of class analysis to the study of states The book s title *State Transformations* reflects several central themes in the comparative study of states the neoliberal restructuring of capitalist states the changing economic and political architecture of imperialism and the prospects of a democratic transformation of capitalist states The essays collected here on these themes are in honor and memory of Leo Panitch whose

influential body of work has shaped debates on the state imperialism and socialism over the past four decades Contributors are Clyde W Barrow Caio Bugiato Frank Deppe Ruth Felder Ana Garcia Sam Gindin Doug Henwood Martijn Konings Colin Leys Sebnem Oguz Bryan D Palmer Dennis Pilon Larry Savage Charles Smith Michalis Spourdalakis and Hilary Wainwright

Against Austerity Richard Seymour, 2014-03-19 Five years into capitalism's deepest crisis which has led to cuts and economic pain across the world *Against Austerity* addresses a puzzling aspect of the current conjuncture why are the rich still getting away with it Why is protest so ephemeral Why does the left appear to be marginal to political life In an analysis which challenges our understanding of capitalism class and ideology Richard Seymour shows how austerity is just one part of a wider elite plan to radically re engineer society and everyday life in the interests of profit consumerism and speculative finance But *Against Austerity* is not a gospel of despair Seymour argues that once we turn to face the headwinds of this new reality dispensing with reassuring dogmas we can forge new collective resistance and alternatives to the current system Following Brecht *Against Austerity* argues that the good old things are over it's time to confront the bad new ones

Seeking Asylum Alison Mountz, In July 1999 Canadian authorities intercepted four boats off the coast of British Columbia carrying nearly six hundred Chinese citizens who were being smuggled into Canada Government officials held the migrants on a Canadian naval base which it designated a port of entry As one official later recounted to the author the Chinese migrants entered a legal limbo treated as though they were walking through a long tunnel of bureaucracy to reach Canadian soil The long tunnel thesis is the basis of Alison Mountz's wide ranging investigation into the power of states to change the relationship between geography and law as they negotiate border crossings Mountz draws from many sources to argue that refugee receiving states capitalize on crises generated by high profile human smuggling events to implement restrictive measures designed to regulate migration Whether states view themselves as powerful actors who can successfully exclude outsiders or as vulnerable actors in need of stronger policies to repel potential threats they end up subverting access to human rights altering laws and extending power beyond their own borders Using examples from Canada Australia and the United States Mountz demonstrates the centrality of space and place in efforts to control the fate of unwanted migrants

The Politics and Law of Democratic Transition Sonia Zaman Khan, 2017-10-25 Peaceful legal and political changing of the guards is taken for granted in developed democracies but is not evident everywhere As a relatively new democracy marred by long periods of military rule Bangladesh has been encountering serious problems because of a prevailing culture of mistrust weak governance institutions constant election manipulation and a peculiar socio political history which between 1990 and 2011 led to a unique form of transitional remedy in the form of an unelected neutral caretaker government CTG during electoral transitions This book provides a contextual analysis of the CTG mechanism including its inception operation manipulation by the government of the day and abrupt demise It queries whether this constitutional provision even if presently abolished after overseeing four acceptable general elections actually remains a crucial tool to safeguard free and

fair elections in Bangladesh Given the backdrop of the culture of mistrust the author examines whether holding national elections without a CTG or an umpire of some kind can settle the issue of credibility of a given government The book portrays that even the management of elections is a matter of applying pluralist approaches Considering the historical legacy and contemporary political trajectory of Bangladesh the cause of deep rooted mistrust is examined to better understand the rationale for the requirement emergence and workings of the CTG structure The book unveils that it is not only the lack of nation building measures and governments wish to remain in power at any cost which lay behind the problems that Bangladesh faces today Part of the problem is also the flawed logic of nation building on the foundation of Western democratic norms which may be unsuitable in a South Asian cultural environment Although democratic transitions on the crutch of the CTG have been useful in moments of crisis its abolition creates the need for a new or revised transitional modality perhaps akin to the CTG ethos to oversee electoral governance which will have to be renegotiated by the polity based on the people s will The book provides a valuable resource for researchers and academics working in the area of constitutional law democratic transition legal pluralism and election law

Famine Irish and the American Racial State

Environmental Politics and Governance in Southeast Asia

Syed Mohammed Ad'ha Aljunied, 2025-10-02 In this book Aljunied analyses how ASEAN and its key maritime member states of Singapore Malaysia and Indonesia govern environmental issues through strategic engagements with social forces In the new millennium ASEAN states power is enhanced and solidified through regulatory statehood strategic renewal and moral ideology in order to subdue civil resistance while managing non traditional security threats Through a comparative analysis of Southeast Asia this book highlights how state capitalist society relations are shaped by politics of scale and social conflict in order to reinforce authoritarianism and intensify capitalism development agendas at the expense of environmental preservation With this the book explores how civil society challenge and are suppressed by state power at national and regional platforms A pioneering scholarly work this book represents a major contribution to the intersection between political science environmental governance and Southeast Asian Studies by offering rich theoretical and empirical insights into the dynamics of state capitalist society relations in an era of global environmental crisis

Unwitting Architect

Julian Germann, 2021-01-05 The global rise of neoliberalism since the 1970s is widely seen as a dynamic originating in the United States and the United Kingdom and only belatedly and partially repeated by Germany From this Anglocentric perspective Germany s emergence at the forefront of neoliberal reforms in the eurozone is perplexing and tends to be attributed to the same forces conventionally associated with the Anglo American pioneers This book challenges this ruling narrative conceptually and empirically It recasts the genesis of neoliberalism as a process driven by a plenitude of actors ideas and

interests And it lays bare the pragmatic reasoning and counterintuitive choices of German crisis managers that are obscured by this master story Drawing on extensive original archival research this book argues that German officials did not intentionally set out to promote neoliberal change Instead they were more intent on preserving Germany's export markets and competitiveness in order to stabilize the domestic compact between capital and labor Nevertheless the series of measures German policy elites took to manage the end of golden age capitalism promoted neoliberal transformation in crucial respects it destabilized the Bretton Woods system it undermined socialist and social democratic responses to the crisis in Europe it frustrated an internationally coordinated Keynesian reflation of the world economy and ultimately it helped push the US into the Volcker interest rate shock that inaugurated the attack on welfare and labor under Reagan and Thatcher From this vantage point the book illuminates the very different rationale behind the painful reforms German state managers have demanded of their indebted eurozone partners
