particularly in complex globally relevant situations Institutions and companies in all disciplines and sectors are faced with increasingly multi faceted areas of uncertainty which cannot always be effectively handled by traditional strategies Complex Strategic Choices provides clear principles and methods which can guide and support strategic decision to face modern challenges By considering ways in which planning practices can be renewed and exploring the possibilities for acquiring awareness and tools to add value to strategic decision making Complex Strategic Choices presents a methodology which is further illustrated by a number of case studies and example applications Dr Techn Steen Leleur has adapted previously established research based on feedback and input from various conferences journals and students resulting in new material stemming from and focusing on practical application of systemic planning The outcome is a coherent and flexible approach named systemic planning The inclusion of both the theoretical and practical aspects of systemic planning makes this book a key resource for researchers and students in the field of planning and decision analysis as well as practitioners dealing with strategic analysis and decision making More broadly Complex Strategic Choices acts as guide for professionals and students involved in complex planning tasks across several fields such as business and engineering **Computational Science and Its Applications - ICCSA 2011** Beniamino Murgante,Osvaldo Gervasi,Andres Iglesias,David Taniar,Bernady O. Apduhan,2011-06-17 The five volume set LNCS 6782 6786 constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications ICCSA 2011 held in Santander Spain in June 2011 The five volumes contain papers presenting a wealth of original research results in the field of computational science from foundational issues in computer science and mathematics to advanced applications in virtually all sciences making use of computational techniques The topics of the fully refereed papers are structured according to the five major conference themes geographical analysis urban modeling spatial statistics cities technologies and planning computational geometry and applications computer aided modeling simulation and analysis and mobile communications *Case Theory in Business and Management* Evert Gummesson,2017-01-25 This meticulous book submits research and the research process to deep scrutiny It debunks the unhelpful dichotomy between quantitative and qualitative research and highlights the great value of multi method and interactive research approaches that have greatly deepened our thinking Professor Adrian Payne University of New South Wales Australia Professor Pennie Frow University of Sydney Setting out to dispel the argument that case study research lacks the science theory and therefore validity of other forms of research Evert Gummesson combines many decades of experience as both a renowned scholar and a reflective practitioner to effectively bridge the divide between case theory and how it is applied in practice Bringing the fundamental strengths of cases to the fore Gummesson introduces the Case Theory concept as an expanded version of case study research which includes both methodology and the types of results that emerge by Guiding the reader in the theoretical and philosophical underpinning Demonstrating how to translate theory to pertinent research practice that address the real and consequential issues in business and management today This

book will appeal to students academics and researchers who are interested in the science and philosophy behind case study research as well as the methodology and a thought provoking read for anyone who wants to be challenged about their belief of case study theory *Language change for the worse* Dankmar W. Enke,Larry M. Hyman,Johanna Nichols,Guido Seiler,Thilo Weber,Andreas Hölzl,2024-09-05 Many theories hold that language change at least on a local level is driven by a need for improvement The present volume explores to what extent this assumption holds true and whether there is a particular type of language change that we dub language change for the worse i e change with a worsening effect that cannot be explained away as a side effect of improvement in some other area of the linguistic system The chapters of the volume written by leading junior and senior scholars combine expertise in diachronic and historical linguistics typology and formal modelling They focus on different aspects of grammar phonology morphosyntax semantics in a variety of language families Germanic Romance Austronesian Bantu J Kaingang Wu Chinese Greek Albanian Altaic Indo Aryan and languages of the Caucasus The volume contributes to ongoing theoretical debates and discussions between linguists with different theoretical orientations *Leveraging Chaos* John R. Shoup,Susan Clark Studer,2010-09-16 John R Shoup and Susan Clark Studer explore the rules and patterns that govern complex systems that when properly understood and applied result in more effective leadership than what is offered from traditional leadership models Their book is designed to equip leaders with the knowledge and skills to operate successfully in complex environments at both the micro organizational and macro policy level Leveraging Chaos offers a dynamic interpretation of educational history and reform that will equip policy makers to implement a more balanced management of the educational pendulum *The Complexities of Morphology* Peter Arkadiev,Francesco Gardani,2020-09-24 This volume explores the multiple aspects of morphological complexity investigating primarily whether certain aspects of morphology can be considered more complex than others and how that complexity can be measured The book opens with a detailed introduction from the editors that critically assesses the foundational assumptions that inform contemporary approaches to morphological complexity In the chapters that follow the volume s expert contributors approach the topic from typological acquisitional sociolinguistic and diachronic perspectives the concluding chapter offers an overview of these various approaches with a focus on the minimum description length principle The analyses are based on rich empirical data from both well known languages such as Russian and lesser studied languages from Africa Australia and the Americas as well as experimental data from artificial language learning *Words in the World* Gary Libben,Gonia Jarema,Juhani Järvikivi,Eva Kehayia,Victor Kuperman,2023-10-16 Agile Approaches for Successfully Managing and Executing Projects in the Fourth Industrial Revolution Bolat, Hür Bersam,Temur, Gül Tekin,2019-03-15 Communication between man and machine is vital to completing projects in the current day and age Without this constant connectiveness as we enter an era of big data project completion will result in utter failure Agile Approaches for Successfully Managing and Executing Projects in the Fourth Industrial Revolution addresses changes wrought by Industry 4 0 and its
