**Systems Theory and Agile Brand Management** Jan Lies, 2024-06-21 Brands started out as communication tools to influence the image of companies or products inside out thinking but have developed into channels of social forces Powerful brands impact not just customer decisions but also markets and social institutions such as fashion trends city life or even social movements This book explores the implications of Niklas Luhmann's theory of social systems for the theory and practice of agile brand management in particular highlighting the central role of brand aesthetics and of brands as channels for mutual education between companies and consumers Since the rise of social media perfect brands have become the

mirror of community values as the communities themselves develop brand content Brands themselves become living systems and evolve like systems do The author introduces systems theory to provide a conceptual framework that integrates the different views of branding inside out and outside in thinking This Luhmannian theory of branding is discussed against the current background of Western societies which are undergoing a broad shift from hard to soft selling in marketing influenced by social media The book is not about whether closed systems analysis and discussion can or should replace traditional management moreover it emphasizes the fruitful insights and demonstrates that the power of management is limited and should be extended by looking at the means of closed systems This book will be of primary value to scholars with an interest in systems theory and thinking brand theory and management The interdisciplinary approach also makes the book a valuable resource for those researching change management agile management and sociology

**Construction** Luciano L'Abate,2011-12-01 Within the field of psychology there is a proliferation of paradigms theories models and dimensions without an underlying conceptual framework or theory This conclusion has been reached by representatives of many different psychological specialties In response to this inconsistency this book presents a hierarchical framework about important theoretical issues that are present in psychological thinking These issues concern definitions of three major theoretical concepts in theory and practice a paradigms b theories and c models It focuses on defining comparing and contrasting these three conceptual terms This framework clarifies differences among paradigms theories and models terms which have become increasingly confused in the psychological literature Paradigms are usually confused with theories or with models while theories are confused with models Examples of misuses of these terms suggest the need for a hierarchical structure that views paradigms as conceptual constructions overseeing a variety of psychological theories and verifiable models

**Paradigms, Poetics, and Politics of Conversion** Jan N. Bremmer, Wout Jac. van Bakkum, Arie L. Molendijk, 2006 In the terms of Durheimian sociology conversion is a fait social Although they are rarely treated as a cultural phenomenon conversions can obviously be examined for the norms values and presuppositions of the cultures in which they take place Thus conversion can help us to shed light on a particular culture At the same time the term evokes a dramatic appeal that suggests a kind of suddenness although in most cases conversion implies a more gradual process of establishing and defining a new religious identity From 21-24 May 2003 the University of Groningen hosted an international conference on Cultures of Conversion The contributions have been edited in two volumes which pay special attention to the modes of language and idiom in conversion literature the meaning and sense of religious ideological discourse the variety of rhetorical tropes and the effects of the conversion narrative with allusions to religious or political conventions and idealizations The present volume contains theoretical contributions on the theory of conversion with special attention to the rational choice theory and on the history of research into conversion It also offers stimulating case studies ranging from the late Middle Ages to present times and taken from Germany Great Britain and The Netherlands The other volume Cultures of Conversion offers in depth studies of conversion that are mainly taken from the history of India Islam and Judaism ranging from the Byzantine period to the new Muslimas of the West      *Caring for Souls* Harry Shields, Gary Bredfeldt, 2001-01-01 Caring for Souls is a helpful primer on the intersection of psychology and Scripture How psychology fits into Christianity is a thorny and often confusing subject for many There is a great deal of disagreement even among experts In Caring for Souls Gary Bredfeldt and Harry Shields address the intersection of Scripture and psychology in Christian counseling The authors address different approaches and analyze them against Scripture and then provide readers with practical teaching on implementing biblical
