Paradigms Regained Pluralism And The Practice Of Criticism:

Paradigms Regained James L. Battersby, 1991-08-29 *Paradigms Regained* is James L. Battersby's effort to reclaim for literary study certain legitimate territories that have been needlessly abandoned on the theoretical battlefield. Despite assertions to the contrary by poststructuralist or new historicist critics, Battersby contends it is still possible to talk intelligently, rigorously, and usefully about such issues as literary intentionality, stable references, determinate meaning, and objective value judgments of literary works. What enables Battersby to make his argument is his reliance not on continental thought but on Anglo-American analytic and pragmatic philosophers including Donald Davidson, Michael Dummett, Nelson Goodman, Hilary Putnam, John Searle, and Israel Scheffler. Battersby synthesizes and builds on their work in a way that is at once fresh and distinctive. *Fault Lines and Controversies in the Study of Seventeenth-century English Literature* Claude J. Summers, Ted-Larry Pebworth, 2002 Written by various experts in the field, this volume of thirteen original essays explores some of the most significant theoretical and practical fault lines and controversies in seventeenth-century English literature. The turn into the twenty-first century is an appropriate time to take stock of the state of the field and as part of that stocktaking, the need arises to assess both where literary study of the early modern period has been and where it might desirably go. Hence many of the essays in this collection look both backward and forward. They chart the changes in the field over the past half century while also looking forward to more change in the future. *Beyond Poststructuralism* Wendell V. Harris, 2010-11-01 **Looking for an Argument** Richard Louis Levin, 2003 This book collects a number of Richard Levin's essays beginning with his well-known PMLA article of 1988 on Feminist Thematics and Shakespearean Tragedy and continuing through the 1990s that examine and evaluate some of the most important aspects of the new critical approaches to the interpretations of the works of Shakespeare and his contemporaries, principally the New Historicism, feminism, and revisionist versions of Marxism and Freudianism. In these essays he is looking not only for rational arguments in these approaches but also for a rational argument with their practitioners and therefore he reprints several of the responses that these essays have elicited, including the PMLA Forum letter signed by twenty-four people who objected to Feminist Thematics along with his answers to them, which contribute to this critique of the present state of the discourse in this field.

Transforming Schools Peter W. Jr. Cookson, Barbara Schneider, 2014-04-23 Government policies at the state, local, and federal levels have always shaped the daily lives of U.S. schools. Issues of equity and access dominate, and the newer issue of global competition is also important. This volume of essays by noted theorists and practitioners considers current educational policy issues. Topics and contributors include Achievement and Mobility: Aaron Pallas; Tracking: Maureen Hallinan; Dropouts: Gary Natriello; Governing the Big City School System: Kenneth Wong; International and Comparative Analysis: Rolland Paulston; Politics of a National Curriculum: Michael Apple; School Leadership: James Cibulka; Parental and Community Involvement: Mary Driscoll; Advocacy: Judith Cohen; Reform and Policy: Kathy Borman et al. An index is provided. Truth and Consequences

Reed Way Dasenbrock,2010-11-01 Contemporary literary theory takes truth and meaning to be dependent on shared conventions in a community of discourse and views authors intentions as irrelevant to interpretation This view argues Reed Way Dasenbrock owes much to Anglo American analytic philosophy as developed in the 1950s and 1960s by such thinkers as Austin and Kuhn but it ignores more recent work by philosophers like Davidson and Putnam who have mounted a counterattack on this earlier conventionalism This book draws on current analytic philosophy to resuscitate the notion of objective truth and intentionalist models of meaning and interpretation thereby moving beyond the antifoundationalism of postmodern theory It addresses the work of Rorty and Fish as representative of literary conventionalism discusses the futility of Derrida s anti intentionalism and shows how poststructuralist thinkers like Althusser and Foucault have contributed to the new thematics of race class gender and sexual orientation that dominates literary theory today Examining the counter arguments of conventionalists to have their theory judged by its consequences Dasenbrock shows how damaging this antiobjectivism and anti intentionalism have been for literary studies

Reason and the Nature of Texts

James L. Battersby,2016-11-11 Many of today s most prominent critics and teachers of literature insist on the endless deferral of textual meaning and on the social construction of meaning and thought Against these markers of current critical theory James L Battersby argues for the authorial construction of determinate textual meaning insisting that to think about anything at all we must be able to refer to it and that such references are necessarily the semantic consequences of an author s deliberate intentional acts Propelling Battersby s argument is his use of principles and arguments drawn from current philosophical literature on language and mind Battersby reveals the philosophical shortcomings and argumentative weaknesses of some of the most prominent and influential doctrines in critical theory today especially and principally those that inform and define postmodernism in both its linguistic and historicist materialist modes As he argues for a fresh conception of our understanding of language mind and meaning Battersby probes the critical positions of among others Stanley Fish Mikhail Bakhtin Paul de Man and Jacques Derrida Making room for an alternative and Battersby asserts more intellectually appealing framework requires a skeptical dissection of the linguistic and historicist tenets that form the foundation of poststructuralism The striking outcome of his effort is a book as lively erudite theoretically informed and provocative as his earlier Paradigms Regained

Succeeding Postmodernism Mary K. Holland,2013-04-25 While critics collect around the question of what comes after postmodernism this book asks something different about recent American fiction what if we are seeing not the end of postmodernism but its belated success Succeeding Postmodernism examines how novels by DeLillo Wallace Danielewski Foer and others conceptualize threats to individuals and communities posed by a poststructural culture of mediation and simulation and possible ways of resisting the disaffected solipsism bred by that culture Ultimately it finds that twenty first century American fiction sets aside the postmodern problem of how language does or does not mean in order to raise the reassuringly retro question of what it can and does mean it finds that novels today offer language as solution to the problem of language Thus it suggests a new way of reading antihumanist late postmodern fiction and a framework for understanding postmodern and twenty first century fiction as participating in a long and newly enlivened tradition of humanism and realism in literature

Karl Popper and Literary Theory Thomas Trzyna,2017-01-05 Karl Popper s philosophy of science with its focus on falsifiability and critical rationalism provides a firm foundation for a theory of literary interpretation that avoids the pitfalls of many contemporary theories Building on the work of Popper John Eccles Imre Lakatos Ernst Gombrich Louise DeSalvo and James Battersby this study outlines the approach sets it in a theoretical context and applies the theory to challenging works by Anne Finch Countess of Winchelsea Jean Toomer Shakespeare Henry Fielding J M G LeCl zio J M Coetzee Jonathan Littell Patrick Modiano Albert Schweitzer Popper s prot g William Warren Bartley III and the Gospel of Mark The book concludes with a set of general principles for understanding literature as a mode of investigation in what Popper called the unended quest

The Insect-Populated Mind David Spooner,2005-08-22 In The Insect Populated Mind author David Spooner proposes a close connection between aspects of insect evolution and the human intellect By examining seemingly disparate subjects such as entomology language theory genetics astronomy literature and music Spooner proves that synthesis is indeed possible Once this fusion is achieved the human species can be seen as connected not just to the great apes but also via consciousness to metamorphic insects While considering Richard Dawkins and Susan Blackmore s expositions of memes Spooner suggests that the concept of memes remains a peripheral understanding of religion and the arts The book also presents arguments on the roots and nature of the mind in the work of Daniel Dennett and Steven Pinker

A Theory of Literary Explication Kenneth B. Newell,2011-07-12 This book presents current multidisciplinary research and theory from 17 different fields most of them never before applied to literary explication in order to provide 1 justification for the practice of a relative probability type of explication as distinguished from interpretation 2 a relativistic foundation for the preference of some explication s of a literary work over others and thereby 3 a middle way between the postmodern pluralist

view that a work has only an unlimited number of equally acceptable though different explications and the modern intentionalist view that it has only one acceptable explication the author's Nine of the 17 fields are of primary relevance critical theory hermeneutics probability theory philosophy of science second order logic and four fields of cognitive science linguistics epistemology neuropsychology and artificial intelligence But the book also touches upon textual criticism legal theory measure theory fuzzy logic animal learning behavior developmental psychology evolutionary epistemology and neurobiology The book shows that those using a relative probability type of explication on a literary work can achieve consensus because the healthy adult human brain has an evolved uniform and probably innate ability to form relative probability judgments and to form them in the practice of activities like reading and explicating that are not uniform and innate Lastly the book contributes to the scholarly areas of explication theory and practice first by providing a relativistic foundation for a craft explication that currently is not acknowledged to have any foundation but nonetheless continues and will continue to be practiced and second by presenting a means relative epistemic probability by which judging some explication's of a literary work to be more acceptable than others may be justified philosophically an uncommon circumstance in this postmodern era in which philosophical justification of many beliefs and practices is thought to be untenable

The Word According to James Joyce Cordell D. K. Yee, 1997 In his denial that language refers to anything but itself and in his undoing representation Joyce anticipates contemporary developments in the history of critical theory Contrary to modern criticism Joyce does not abandon representation the idea that language affords access to reality **The Metaphysics of Insect Life, and Other Essays** David Spooner, 1995 Scholarly essays dealing with scientific and cultural theory in the post modernist world through the prism of music literature and language with a focus on the natural world and its creative interpreters Among the literary figures discussed are Apuleius Shakespeare Kafka Muir Jimenez Machado Vallejo and Chenier *Bericht Über Den ... Internationalen Musikwissenschaftlichen Kongress* International Musicological Society. Congress, 1993 Humanism Betrayed Graham Good, 2001 In *Humanism Betrayed* Graham Good offers a defence of liberal humanism against the illiberal trends political and intellectual that dominate today's university He uses the McEwen Report episode at the University of British Columbia to illustrate the current political climate in universities showing how due process was neglected in favour of ideological inquisition **"An Innocent Way Out"** Carrie A. Tirado Bramen, 1994

Unorthodox Views James L. Battersby, 2002-03-30 Much of contemporary critical theory holds that meaning is relative and subjective This book scrutinizes the principal assumptions and beliefs about mind language meaning truth and reality governing current debate and discussion not only in literary criticism and theory but also in the broader academic culture In doing so the volume brings support to the growing number of scholars who are expressing renewed interest in authors determinate meanings formal and aesthetic issues and related concerns but who have been laboring without sufficient theoretical arguments or justifications Moving beyond critique the book offers rigorous defenses of alternatives to the

prevailing critical orthodoxies The first five chapters address foundational issues arguing against or exposing the limitations of the most common forms of linguistic idealism social constructivism and relativism These initial chapters prepare the way for subsequent discussions of more text based matters such as the authorial determination of artistic effects the bases of our emotional and evaluative responses to fiction the justifications of our decisions about intrinsic merit and artistic value and other matters crucial to our understanding of the meanings and values implicit in human expression The British Journal of Aesthetics ,1993 **American Book Publishing Record** ,1991
