Reyner Banham and the Paradoxes of High Tech Todd Gannon, 2017-09-05 Reyner Banham and the Paradoxes of High Tech reassesses one of the most influential voices in twentieth century architectural history through a detailed examination of Banham s writing on High Tech architecture and its immediate antecedents Taking as a guide Banham s habit of structuring his writings around dialectical tensions Todd Gannon sheds new light on Banham s early engagement with the New Brutalism of Alison and Peter Smithson his measured enthusiasm for the clip on approach developed by Cedric Price and the Archigram group his advocacy of well tempered environments fostered by integrated mechanical and electrical systems and his late career assessments of High Tech practitioners such as Norman Foster Richard Rogers and Renzo Piano Gannon devotes significant attention to Banham s late work including fresh archival materials related to Making Architecture The Paradoxes of High Tech the manuscript he left unfinished at his death in 1988 For the first time readers will have access

to Banham's previously unpublished draft introduction to that book **A Critical History of Contemporary Architecture** Elie G. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement. From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism. Bringing together leading experts in the field, this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010. It consists of two parts: the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects.

The Routledge Companion to Criticality in Art, Architecture, and Design Chris Brisbin, Myra Thiessen, 2018-10-03 The Routledge Companion to Criticality in Art, Architecture and Design presents an in-depth exploration of criticism and criticality in theory and practice across the disciplines of art, architecture and design. Professional criticism is a vital part of understanding the cultural significance of designed objects and environments that we engage with on a daily basis, yet there is evidence to show that this practice is changing. This edited volume investigates how practitioners, researchers, educators and professionals engage with, think about and value the practice of critique. With contributions from a multi-disciplinary authorship from nine countries: the UK, USA, Australia, India, Netherlands, Switzerland, South Africa, Belgium and Denmark, this companion provides a wide range of leading perspectives evaluating the landscape of criticality and how it is being shaped by technological and social advances. Illustrated with over 60 black and white images and structured into five sections, The Routledge Companion to Criticality in Art, Architecture and Design is a comprehensive volume for researchers, educators and students exploring the changing role of criticism through interdisciplinary perspectives. The Post-Modern and the Post-Industrial Margaret A. Rose, 1991-06-28 The first book to provide a critical survey of the many different uses made of the term post-modern across a number of different disciplines. **Paradoxes of Culture and Globalization** Martin J.

Gannon, 2008 Why do Western negotiators constantly complain that Chinese negotiators are both very sincere and very deceptive? This paradox is one of approximately 80 explored in *Paradoxical Reasoning*. *Paradoxical Reasoning* answers two major questions that provide the underlying rationale for the book: What is a paradox and why is paradoxical reasoning critical for understanding culture in a globalizing world? As used in the book, paradox is defined as the simultaneous existence of two or more inconsistent and sometimes contradictory elements. Each paradox is phrased as an arresting but simply understood question to increase reader involvement, such as Nationalism and globalization and Nations are becoming more and less powerful simultaneously. **Interdisciplinary Dialogues on Organizational Paradox** Rebecca Bednarek, Miguel Pina e Cunha, Jonathan Schad, Wendy K. Smith, 2021-07-08 *Interdisciplinary Dialogues on Organizational Paradox* is an

innovative two part volume that enriches our understanding about paradox Part B continues the exploration of the why how and where of interdisciplinary research within paradox theory by looking at the realms of social structure and expression

Constructing Identity in Contemporary Architecture Peter Herrle,Stephanus Schmitz,2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore

Nelson Goodman and Modern Architecture Kasper Lægning,2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman s aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman s aesthetic theory the book explores his conceptual framework within the context of modern architecture At the heart of the investigation lies Goodman s concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman s framework the book aims to address accusations of emptiness and alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

The Challenge of Change: Dealing with the Legacy of the Modern Movement D. van den Heuvel,M. Mesman,W. Quist,2008-09-11 Conservation of architecture and the conversation of Modern architecture in particular has assumed new challenges Rather than attempting to return a Modern building to its resumed original state the challenge of these proceedings is to revalue the essence of the manifold manifestations of Modern architecture and redefine its meanings in a rapidly changing world of digital revolution worldwide mobility and environmental awareness This volume aims to provide a variety of platforms for the exchange of ideas and experience A large international group of architects historians scholars preservationists and other parties involved in the processes of

preserving renovating and transforming Modern buildings has been invited to investigate the paradox of the Modern monument and to reflect on the manifold dilemmas of change and continuity The general theme is elaborated through five sub themes The sub theme Change and Continuity addresses the tensions between change and continuity from a historical theoretical perspective Restructuring Cities and Landscapes focuses on the larger scale of city and landscape while Shifts in Programme and Flexibility draws attention to the scale of the building or building complex and questions limits of re use and flexibility The fourth sub theme deals with education and the fifth sub theme Progress Technology and Sustainability considers specific issues of techniques and materials

Architectural Forum ,1928 *The Five Paradoxes of Modernity* Antoine Compagnon,1994 In this elegant highly readable book Compagnon confronts the postmodern's co option of the modern by tracing paradoxical elements in the aesthetic of the new particularly the aesthetic and moral contradictions built into the enthusiasm for the new in the five paradoxes of modernity the superstition of the new the religion of the future the mania for theory the appeal to mass culture and the passion for repudiation

On Paradox Elizabeth S. Anker,2022-10-28 In *On Paradox* literary and legal scholar Elizabeth S Anker contends that faith in the logic of paradox has been the cornerstone of left intellectualism since the second half of the twentieth century She attributes the ubiquity of paradox in the humanities to its appeal as an incisive tool for exposing and dismantling hierarchies Tracing the ascent of paradox in theories of modernity in rights discourse in the history of literary criticism and the linguistic turn and in the transformation of the liberal arts in higher education Anker suggests that paradox not only generates the very exclusions it critiques but also creates a disempowering haze of indecision She shows that reasoning through paradox has become deeply problematic it engrains a startling homogeneity of thought while undercutting the commitment to social justice that remains a guiding imperative of theory Rather than calling for a wholesale abandonment of such reasoning Anker argues for an expanded diversified theory toolkit that can help theorists escape the seductions and traps of paradox

Architecture, Language, Critique Judith Bakacsy,Anders V. Munch,Anne-Louise Sommer,Forschungsinstitut Brenner-Archiv,2000 Paul Engelmann was Adolf Loos's favorite pupil private secretary to Karl Kraus and Ludwig Wittgenstein's most important interlocutor in the years between 1916 and 1928 as well as his partner in building the Stonborough House Thus it was that the trenchant critique of modernity associated with Wittgenstein's Vienna originated around Paul Engelmann The present volume of essays from an international symposium in Aarhus Denmark in 1999 offers an interdisciplinary perspective on issues bearing upon architecture language and cultural criticism as they relate to the life's work of Paul Engelmann

Tourism Paradoxes Erdinç Çakmak,Hazel Tucker,Keith Hollinshead,2021-01-15 At a time when COVID 19 is transforming the tourism industry this book presents a collection of some of the many contemporary contradictions and inconsistencies apparent in tourism contexts and tourism studies Increasingly tourism is regarded as an agent of social and cultural change in ways which inevitably throw up new and inescapable paradoxes The chapters draw attention to paradoxes such as Anglo Western

centrism Non Western imperatives continued colonisation decolonisation political apparatus people s empowerment global standards local dynamics and their prominence in the tourism field as well as in other disciplines The volume offers a reconsideration of what may be needed conceptually and methodologically in order to equip researchers and practitioners in tourism and related social science fields to better interpret and manage the future of tourism Contemporary Perspectives on Architectural Organicism Gary Huafan He,Skender Luarasi,2023-06-07 This project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism s infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally **Architect** ,1876 *The Architectural Review* ,1915
