**The Last Minstrels** Ronald

Schuchard, 2008-02-28 Recovering a lost literary movement that was the most consuming preoccupation of W B Yeats's literary life and the most integral to his poetry and drama Ronald Schuchard's *The Last Minstrels* provides an historical biographical and critical reconstruction of the poet's lifelong attempt to restore an oral tradition by reviving the bardic arts of chanting and musical speech From the beginning of his career Yeats was determined to return the living voice of the poet from exile to the centre of culture on its platforms stages and streets thereby establishing a spiritual democracy in the arts for the non reading as well as the reading public Schuchard's study enhances our understanding of Yeats's cultural nationalism his aims for the Abbey Theatre and his dynamic place in a complex of interrelated arts in London and Dublin With a wealth of new archival materials the narrative intervenes in literary history to show the attempts of Yeats and Florence Farr to take the new art of chanting to Great Britain America and Europe and it reveals for the first time the influence of their auditory poetics on the visual paradigm of the Imagists The penultimate chapter examines the adjustments Yeats made for his movement during the war including chanting and other adaptations from Noh drama for his dance plays and choruses until the practice of his unfashionable art became dormant in the 1920s before the restless rise of realism The final chapter resurrects his heroic effort in the 1930s to reunite poetry and music and reconstitute his dream of a spiritual democracy through the medium of public broadcasting

*Sonic Circulations* Emily I. Dolan, Emily MacGregor, Arman Schwartz, 2025-08-05 The role music sound and voice played in modern knowledge production in the early twentieth century Derived from the Latin words circum round and ire to go a circuit can refer to any bounded area For contemporary readers it might evoke the course of an electric current as well as the flow of global capital Yet sound an inherently temporal phenomenon can only circulate in mediated forms Tracing the pathways through and by which sound traveled in the early twentieth century *Sonic Circulations* not only proposes a new account of the role of music sound and voice in modern knowledge production but also poses urgent questions about technology and empire while also foregrounding the tensions and paradoxes involved in situating the sonic within any fixed regime or system Exploring key moments in the development of disciplines including linguistics sociology and eugenics as well as musicology itself *Sonic Circulations* explores the many ways that sound has functioned as evidence and information as both an object and an agent of scientific mastery Contributors explore the processes by which sound has moved through a variety of conceptual as well as physical domains highlighting the richness of historical contingency This volume shows that circulation happened in many spaces and through many technologies through sound recording but also through the trade magazine and in the classroom through wireless broadcasting and international festivals but also in the cozy spaces of the suburban home Featuring scholars working at the borders of musicology ethnomusicology sound studies and music theory this volume's ten chapters and two epilogues

produced between the late 1890s and the present day Haines focuses on the tension in these films between the surviving evidence for medieval music and the idiomatic tradition of cinematic music The latter is taken broadly as any musical sound occurring in a film from the clang of a bell off screen to a minstrel singing his song Medieval film music must be considered in the broader historical context of pre cinematic medievalisms and of medievalist cinema s main development in the course of the twentieth century as an American appropriation of European culture The book treats six pervasive moments that define the genre of medieval film the church tower bell the trumpet fanfare or horn call the music of banquets and courts the singing minstrel performances of Gregorian chant and the music that accompanies horse riding knights with each chapter visiting representative films as case studies These six signal musical moments that create a fundamental visual aural core central to making a film feel medieval to modern audiences originate in medievalist works predating cinema by some three centuries
