Tank Gun Systems William Andrews, 2023-06-30 Much has been written about the use of tanks in battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period Specifically considered are guns of a caliber greater than 35 mm which have been deployed in numbers greater than 100 The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle breech firing mechanism sights

Slayton,2004 World War II left behind a legacy of bloodshed and glory but its military technology still ignites debate What was the best tank of war Does the 8mm cannon live up to its rep Slayton tackles the subject giving clear descriptions and rock hard ruling on what weapons rose to the top and why He explains how arms of the era came about why they work and what makes them unique Packed with fascinating facts great eyewitness stories and exciting photos this is an essential volume for military and history buffs World War II vets hobbyists patriots and modellers alike

In the Middle of the Fight David Eugene Johnson,Adam Grissom,Olga Olikier,2008 This monograph presents a qualitative assessment of the performance of medium armored forces in 13 past conflicts that span the range of military operations The accompanying analysis is designed to help inform U S Army decisions about fielding medium armored forces in the future The case histories yielded three major insights First medium armored forces fare poorly against competent heavily armored opponents This finding will prove relevant to the U S Army s medium armored forces if their survivability and lethality do not live up to expectations or cannot be fully realized in battlefield conditions Second doctrinal and organizational steps can in certain circumstances mitigate medium armor s liabilities These steps include the implementation of high quality combined arms tactics down to the lowest echelons the effective application of supporting firepower and training for crews and junior leaders Finally the U S Army has lacked a forced entry armor capability since the retirement of the M551 Sheridan Neither the Stryker vehicle nor the Future Combat Systems as currently envisioned can fill that critical void The authors conclude that it would be prudent for the U S Army to maintain a mix of heavy medium armored and light forces that can be task organized and employed in conditions that best match their attributes Medium armored forces have much to offer in such a mix provided by publisher

SOVIET ARMoured FORCE, Storming the City Alec Wahlman, 2015-10-15 In an increasingly urbanized world urban terrain has become a greater factor in military operations Simultaneously advances in military technology have given military forces sharply increased capabilities The conflict comes from how urban terrain can negate or degrade many of those increased capabilities What happens when advanced weapons are used in a close range urban fight with an abundance of cover Storming the City explores these issues by analyzing the performance of the US Army and US Marine Corps in urban combat in four major urban battles of the mid twentieth century Aachen 1944 Manila 1945 Seoul 1950 and Hue 1968 Alec Wahlman assesses each battle using a similar framework of capability categories and separate chapters address urban warfare in American military thought In the four battles across a wide range of conditions American forces were ultimately successful in capturing each city because of two factors transferable competence and battlefield adaptation The preparations US forces made for warfare writ large proved generally applicable to urban warfare Battlefield adaptation a strong suit of American forces filled in where those overall preparations for combat needed fine tuning From World War Two to Vietnam however there was a gradual reduction in tactical performance in the four battles

Cameron, The following pages provide a narrative analysis of the U S Army s development of armored organizations and their related doctrine materiel and training activities in the period 1917 1945 The development of new armor doctrines and organizations to exploit emerging technologies concepts and missions is the heart of this work How that transition was accomplished during the brief space of about twenty years the accepted duration of a single generation is a story worthy of careful examination as our Army gropes with managing similar transformations today
