Case and Gender Willem Andries Helden, 1993 The cybernetic dream which pervades Soviet bureaucracy after Stalin produced a relatively liberal and generous science policy In linguistics the new spirit gave rise to a variety of trends professing to practise structural mathematical or applied linguistics and promising practical applications in natural language processing

The trends originating in the sixties comprise the so called Set theoretical School In 1957 the mathematician Kolmogorov confronted the participants of a seminar on mathematical linguistics with a few pilot questions such as what exactly do we mean when we say that two words are in the same case The rigorous answers which the Set theoretical School worked out for Kolmogorov's questions turned out to have far reaching implications for linguistic theory Case and Gender examines both the contextual and the internal development of the Set theoretical School The rise and decline of the School can be ascribed to Soviet humanities policy while the specifics of its linguistic development can be attributed to the non linguistic backgrounds and applied goals of its first exponents The two volumes contain a systematic account of the networks of definitions models proposed by the School and provide a metamodel which facilitates providing a consistent formalization of the models and uncovering their implicit assumptions on the properties of language The metamodel also enables an orderly comparison of the models with one another and with terminological systems developed elsewhere Moreover the models are evaluated amended and confronted with linguistic material from various languages The later chapters are concluded with more far reaching proposals Kolmogorov's questions must be taken seriously The turn toward a semantics orientated approach which is evident in the last stage of the development of the Set theoretical School must be pursued New definitions of case and gender are proposed in accordance with the new approach Case and Gender contains not only an analytical survey of the complete scientific output of the Set theoretical School on morphology and syntax but also a confrontation with contemporary western theories It shows the viability of a tradition which was abandoned as a result of political developments The long chapter on the history of the relationship between linguistics and politics in the Soviet Union contains new material on the 1950 linguistic discussion in Pravda which was decided by Stalin's contribution and whose impact would last for decades to come

Copular Sentences in Russian Asya Pereltsvaig, 2007-05-11 This book provides a detailed study and a novel Minimalist account of copular sentences in Russian focusing on case marking alternations nominative vs instrumental and drawing a distinction between two types of copular sentences On the assumption that Merge is defined in the simplest way possible it is argued that not all syntactic structures are anti symmetrical One of the copular sentence types is analyzed as a poster child for symmetrical structures while the other type is treated as asymmetrical The originality of this study lies in treating the copula in the two types of copular sentences neither as completely identical nor as two distinct lexical items instead the two types of copula are derived through the process of semantic bleaching Furthermore it is argued that the two types of the copula need to combine with post copular phrases of different categories It is concluded that Russian draws a distinction between saturated DPs and unsaturated NPs in spite of its renowned lack of overt articles

New Approaches to Slavic Verbs of Motion Viktoria Hasko, Renee Perlmutter, 2010 This volume unifies a wide breadth of interdisciplinary studies examining the expression of motion in Slavic languages The contributors to the volume have joined in the discussion of Slavic motion talk from diachronic typological comparative cognitive and acquisitional perspectives with a particular focus

on verbs of motion the nuclei of the lexicalization patterns for encoding motion Motion verbs are notorious among Slavic linguists for their baffling idiosyncratic behavior in their lexical semantic syntactical and aspectual characteristics The collaborative effort of this volume is aimed both at highlighting and accounting for the unique properties of Slavic verbs of motion and at situating Slavic languages within the larger framework of typological research investigating cross linguistic encoding of the motion domain Due to the multiplicity of approaches to the linguistic analysis the collection offers it will suitably complement courses and programs of study focusing on Slavic linguistics as well as typology diachronic and comparative linguistics semantics and second language acquisition This important book is a model of in depth exploration that is much needed intra typological diachronic and synchronic exploration of contrasting ways of encoding a particular semantic domain in this case the domain of motion events The various Slavic languages present contrasting but related solutions to the intersection of motion and aspect And as a group they offer alternate forms of satellite framed typology in contrast to the more heavily studied Germanic languages of this general type The up to date and interdisciplinary nature of the volume makes it essential reading in cognitive and typological linguistics Dan I Slobin Professor Emeritus of Psychology and Linguistics University of California Berkeley A feast for the mind with untold riches and variety different approaches patterns and usage diachronic as well as synchronic Slavic and not just Russian All on a high intellectual level from capable scholars Ful besy were the editors in every thing That to the feste was appertinent Alan Timberlake Columbia University
