An Invitation to Environmental Sociology Michael Bell, 2009. I love your book; it is one of the most fascinating I have ever read, certainly the most riveting textbook. The ideas you present are so on key I just wanted to let you know how incredible your book is. Thank you for writing it. Student at U Mass Boston. Michael Bell covers the broad range of topics in environmental sociology with a personal passion rarely seen in sociology texts. *An Invitation to Environmental Sociology* 3^e challenges readers with the complexity of environmental puzzles. After reading this book, students will be informed and enabled to make their own private and public choices and inspired to care about the social footprints on the planet.

Black Rhino Richard Spilsbury, 2004. Where do over 80 percent of black rhinos live? What is a midden and why do rhinos make them? How many horns does a black rhino have? In *Black Rhino* you will find answers to these questions as you learn why this powerful animal needs a lot of help from concerned people so that it does not disappear from this Earth. From 24-hour guards to relocating these 1-ton animals, conservationists have had to work hard to save the remaining rhinos. As you learn about their long breeding cycle and why some people value their horns, you will better understand how much work still needs to be done.

The Chickasaw Nation Karen Bush Gibson, 2002-06. Horn of Darkness Carol Cunningham, Joel Berger, 2000. The black rhino is nature's tank, feared by all animals. Even lions will break off a hunt to detour around one. And yet the black rhino is on the edge of extinction, its numbers dwindling from 100,000 at the turn of the century to less than 2,500 today. The reason is that in places like Yemen, China, Korea, Taiwan, and Thailand, the rhino's horn is more valuable than gold, so valuable that people will risk their lives to harvest it. To deter rhino poachers, African governments have spent millions on helicopters, paramilitary operations, fences, and guard dogs, even relocation to protected areas. Finally, Namibia decided to dehorn its rhino population in a last-ditch effort to stop the slaughter. In 1991, Carol Cunningham and Joel Berger and their eighteen-month-old daughter, Sonja, went to Namibia to weigh the effects of dehorning on rhinos. In *Horn of Darkness*, they tell the story of three years in the Namib Desert studying Africa's last sizable population of free-roaming black rhinos. This is the closest most readers will come to experiencing life in the remaining wilds of Africa. Cunningham and Berger write; their chapters capture what it is like to leave the comforts of civilization to camp for months at a time in a land filled with deadly predators to study an animal that is reclusive, unpredictable, and highly dangerous. The authors describe staking out water holes in the dead of the night, creeping to within twenty-seven meters of rhinos to photograph them, all the while keeping a lookout for hyenas, elephants, and lions. They recount many heart-pounding escapes: one rhino forces Carol Cunningham up a tree; an unseen lion in hot pursuit of hyenas races right past a frozen Joel Berger.

and capture the adrenaline rush of inching closer to a rhino that might flee or charge at any moment They also give readers a clear sense of the careful patient work involved in studying animals the frustration of long days without finding rhinos or seeing other people coping with heat and thirst the Namib desert is one of the driest on Earth with dirt and insects driving hundreds of kilometers in a Land Rover packed to capacity slowing amassing records on one hundred individual rhinos over the course of several years And perhaps most important the authors reveal that the data they collected suggests that the de horning project might backfire that in the four years after de horning began calf survival was down the evidence suggests that hyenas might be preying on calves and the horn less mothers couldn t defend their offspring They also describe the dark side of scientific work from the petty jealousy of other scientists outside researchers were often seen as ecological imperialists to the controversy that erupted after the authors published their findings as furious officials of the Namibian conservation program denounced their findings and through delays and other tactics effectively withheld a permit to allow the couple to continue their study Weaving together the historical accounts of other naturalists a vividly detailed look at life in the wild and a behind the scenes glimpse of scientific work and the dark side of the conservation movement *Horn of Darkness* is destined to be a classic work on the natural world

Taxonomic Tapestries Alison M Behie, Marc F Oxenham, 2015-05-26 This volume explores the complexity diversity and interwoven nature of taxonomic pursuits within the context of explorations of humans and related species It also pays tribute to Professor Colin Groves whose work has had an enormous impact on this field Recent research into that somewhat unique species we call humankind through the theoretical and conceptual approaches afforded by the discipline of biological anthropology is showcased The focus is on the evolution of the human species the behaviour of primates and other species and how humans affect the distribution and abundance of other species through anthropogenic impact Weaving together these three key themes through the considerable influence of Colin Groves provides glimpses of how changes in taxonomic theory and methodology including our fluctuating understanding of speciation have recrafted the way in which we view animal behaviour human evolution and conservation studies

Ethical and Political Approaches to Nonhuman Animal Issues Andrew Woodhall, Gabriel Garmendia da Trindade, 2017-08-28 This book offers ethical and political approaches to issues that nonhuman animals face The recent political turn in interspecies ethics from ethical to political approaches has arisen due to the apparent lack of success of the

nonhuman animal movement and dissatisfaction with traditional approaches Current works largely present general positions rather than address specific issues and principally rely on mainstream approaches This book offers alternative positions such as cosmopolitan libertarian and left humanist thought as well as applying ethical and political thought to specific issues such as experimentation factory farming nonhuman political agency and intervention Presenting work by theorists and activists insights are offered from both ethics and politics that impact theory and practice and offer essential considerations for those engaging in interspecies ethics within the political turn era *The Routledge Handbook of Animal Ethics* Bob

Fischer,2019-12-06 There isn't one conversation about animal ethics Instead there are several important ones that are scattered across many disciplines This volume both surveys the field of animal ethics and draws professional philosophers graduate students and undergraduates more deeply into the discussions that are happening outside of philosophy departments To that end the volume contains more nonphilosophers than philosophers explicitly inviting scholars from other fields such as animal science ecology economics psychology law environmental science and applied biology among others to bring their own disciplinary resources to bear on matters that affect animals The Routledge Handbook of Animal Ethics is composed of 44 chapters all appearing in print here for the first time and organized into the following six sections I Thinking About Animals II Animal Agriculture and Hunting III Animal Research and Genetic Engineering IV Companion Animals V Wild Animals Conservation Management and Ethics VI Animal Activism The chapters are brief and they have been written in a way that is accessible to serious undergraduate students regardless of their field of study The volume covers everything from animal cognition to the state of current fisheries from genetic modification to intersection animal activism It is a resource designed for anyone interested in the moral issues that emerge from human interactions with animals **The Gap-Year**
