Modernizing the Role of the International Court of Justice Bertrand Ramcharan, 2022-03-16 This book discusses the future role of the International Court of Justice ICJ in a world facing survival challenges It discusses threats such as climate change environmental degradation and pandemics and argues that in the future the ICJ will need to carry out judicial security and protection functions as it is the only organ of the United Nations UN that can discharge such functions in view of its independence and expertise The author proposes that the ICJ can apply a hitherto unused jurisdictional provision in Article 36 of its statute that allows it to deal with All Matters Specially Provided for in the UN Charter and presents three examples of issues that would require the urgent attention of the ICJ vaccine equity in a global pandemic climate disaster and mass movements of people across frontiers due to climate change and environmental degradation Bertrand Ramcharan Guyana is a Barrister at Law of Lincoln s Inn with a Doctorate in international law from the London School of Economics LSE and the Diploma in International Law of the Hague Academy of International Law He was LSE International Law Scholar and has been Commissioner of the International Commission of Jurists and a Member of the Permanent Court of Arbitration He has also been Director of the Research Centre of the Hague Academy of International Law The Right to Life Professor at the Geneva Graduate Institute and Chancellor of the University of Guyana He is a former Chief speech writer of the UN Secretary General and has performed the functions of UN High Commissioner for Human Rights His doctoral thesis was on the approach of the International Law Commission to the codification and progressive development of international law

The Law of Nations in Global History C. H. Alexandrowicz, 2017-03-31 The history and theory of international law have been transformed in recent years by post colonial and post imperial critiques of the universalistic claims of Western international law The origins of those critiques lie in the often overlooked work of the remarkable Polish British lawyer historian C H Alexandrowicz 1902 75 This volume collects Alexandrowicz s shorter historical writings on subjects from the law of nations in pre colonial India to the New International Economic Order of the 1970s and presents them as a challenging portrait of early modern and modern world history seen through the lens of the law of nations The book includes the first complete bibliography of Alexandrowicz s writings and the first biographical and critical introduction to his life and works It reveals the formative influence of his Polish roots and early work on canon law for his later scholarship undertaken in Madras 1951 61 and Sydney 1961 67 and the development of his thought regarding sovereignty statehood self determination and legal personality among many other topics still of urgent interest to international lawyers political theorists and global historians

The Political Life of Medicare Jonathan Oberlander, 2003-06 In recent years bitter partisan disputes have erupted over Medicare reform Democrats and Republicans have fiercely contested issues such as prescription drug coverage and how to finance Medicare to absorb the baby boomers

As Jonathan Oberlander demonstrates in *The Political Life of Medicare* these developments herald the reopening of a historic debate over Medicare's fundamental purpose and structure. Revealing how Medicare politics and policies have developed since Medicare's enactment in 1965 and what the program's future holds, Oberlander's timely and accessible analysis will interest anyone concerned with American politics and public policy, health care politics, aging and the welfare state.

American Health Care Roger D. Feldman, President Clinton's health care reform proposals of 1993 represented the most far reaching program of social engineering attempted in the United States since the passage of Medicare and Medicaid in 1965. Under the guise of reforming the health care system, the Clinton plan would have herded almost all Americans under age sixty-five into large government sponsored health insurance purchasing alliances that would have contracted with insurers to offer a standard set of benefits at regulated prices. The plan came under fire from both Republicans and Democrats, including moderates from both parties, but it soon became apparent that what doomed it was a public unwilling to trust government to manage their health care. The critical literature has failed to offer a cogent analysis of why government control of health care does not work. *American Health Care* delivers that analysis. This volume examines why untoward consequences usually follow when government sets out to do good things. The contributors demonstrate how hospital rate regulation raises hospital prices, that no fault medical malpractice increases the occurrence of faulty medicine, and that FDA regulation is a major cause for the escalating cost of new drugs. Part 1 traces the genesis of Medicare and its later developments and argues the consumer advantages of medical savings accounts and written health contracts. Part 2 explores the fallacies of antitrust policies that serve the interests of competitors, attack community rating for making health insurance unaffordable to large numbers of young workers. Part 3 contains a powerful critique of the FDA for withholding vital information on the health benefits of aspirin and shows how HMOs and other plans have caused pharmaceutical marketing to shift its focus from medical effectiveness to cost effectiveness. The final section explores how the private sector is improving in the areas of regulating physician and other health professional fees and the supply and quality of health professionals. *American Health Care* proposes reasonable balances between government and market options for the supply of health services. Without denying the need for some governmental action, the contributors show how far the market can go farther in performing critical functions in the health care industry. This volume will be important reading for health policymakers, economists, and health care professionals. Roger Feldman is professor at the Institute for Health Services Research, University of Minnesota. Mark V. Pauly is professor in the Department of Health Care Systems of the Wharton School, University of Pennsylvania.

Eradicating Ecocide Higgins, Polly, 2016-02-01 In *Eradicating Ecocide*, international environment lawyer and Ecocide law expert Polly Higgins sets out to demonstrate how our planet is fast being destroyed by the activities of corporations and governments facilitated by compromise laws that offer insufficient deterrence. She offers a solution that is radical yet pragmatic and, as she explains, necessary. Starting with the Mexican Gulf oil spill, a compelling reminder of the

consequences of unchecked ecocide Higgins advocates the introduction of an international Ecocide law As the missing 5th Crime Against Peace it would hold to account heads of corporate bodies who are found guilty of perpetrating ecocide The opportunity to implement this law represents a crossroads in the fate of humanity we can accept this one change and in doing so save our ecosystem for future generations or we can continue to destroy it risking future brutal war over disappearing natural resources This is the first book to examine the power of law to change everything Higgins provides context by presenting examples of laws in other countries and in earlier times in history which have succeeded in curtailing the power of governments corporations and banks and have triggered change Eradicating Ecocide is a crash course on what laws work what doesn't and what else is required to prevent the ever escalating destruction Eradicating Ecocide provides a comprehensive overview of what is required in law in order to prevent ecocide It is a book unlike any other based on the principle of first do no harm it applies equally to global as well as smaller communities and anyone who is involved in decision making

The Development of Human Rights Law by the Judges of the International Court of Justice Shiv R.S. Bedi, 2007-01-18 The jurisprudence of the International Court of Justice generally demonstrates that no rule of international law can be interpreted and applied without regard to its innate values and the basic principles of human rights Through its case law the ICJ has made immense contributions to the development of human rights law and in so doing continues to provide solutions to mounting international problems such as terrorism and unilateral use of force Part I of the book argues that the legislative spirit of contemporary international law lies in the doctrine of human rights and that the spirit of human rights doctrine lies in the principle of human dignity Furthermore it argues that the processes of international legislation and international adjudication are inseparable and that there is no norm of international law which does not intertwine the fundamental principle of human dignity with human rights doctrine Hence human rights law is more a school of law than merely a normative branch of international law and the ICJ's willingness to

engage in the development of human rights law depends upon which judicial ideology its judges subscribe to In order to evaluate how this human rights spirit is manifested or occasionally not manifested through the vast jurisprudence of the ICJ Parts II and III critically examine the Court s principal contentious and advisory cases in which it has treated human rights questions The legal reasoning of the Court and the opinions appended to its decisions by its individual judges are analysed in light of the principle of human dignity and the doctrine of human rights **Military Review** ,2010-07 **Landmark Cases in International Law** Eric Heinze,Malgosia Fitzmaurice,2023-07-03 This book contains excerpts in extenso from leading cases in general international law and seeks to provide a greater volume of case law than that currently available on the market It contains no editorial commentary and no secondary literature as these are widely available in other works It can serve either as a principal text or as a supplement to other standard books It is thoroughly up to date including recent ICJ judgments on the Bosnia case the Gavc kovo Nagymaros Project the Advisory Opinion on Nuclear Weapons and the Lockerbie case It will be of inestimable value to all libraries of international law large and small institutional and private No student or practitioner in the field should be without it The South West Africa/Namibia Dispute John Dugard,2023-11-15 Heaven on Earth, Just for Being Camille Moritz Revelator of Light,2016-11-28 This is an ascension manual heralding the golden age of enlightenment activating the divinely intended plan of heaven on earth and restoring each being s intended birthrights as divinely powerful loving and peace conscious cocreators of heaven on earth magically and easily just for being Only love is real
