Human Behavior and the Social

Environment, Macro Level Katherine Van Wormer, Fred Besthorn, 2017-03-13 A timely revision in this global age Human Behavior and the Social Environment Macro Level develops a sophisticated and original view of the cultural global spiritual and natural worlds that people inhabit and explores the impact of these worlds on human behavior An ecosystems sustainability framework emerges as a key characteristic of contemporary practice What is sustainable social work What are the characteristics of a sustainable community How is the present exploitation of environmental resources unsustainable for future generations In accordance with the 2015 Council on Social Work Education CSWE standards attention is paid to environmental justice as well as diversity and difference The Workbook, 1996 *Human Behavior and the Social Environment, Macro Level* Katherine S. Van Wormer, Fred H. Besthorn, Thomas Keefe, 2007 Each person is a unique individual yet we all are also defined by groups those we belong to and those we are excluded from voluntarily or involuntarily In the second half of the Human Behavior and the Social Environment sequence Katherine van Wormer Fred Besthorn and Thomas Keefe take a stimulating new approach to exploring this macro view of humanity and demonstrating how each component of society from the single person to the sprawling organization is part of a dynamic whole Their collaboration has produced a remarkable volume that will help students recognize and consider interactions between and among individuals and social systems and thereby develop into truly effective social workers Outlines theoretical concepts and practice implications in each chapter Highlights the importance of the natural environment and ecology the community of the earth to human and group behavior Sets forth a refined understanding of the role of spirituality the community of faith in people's lives Focuses on evidence based theory and research Teaches from a global cross cultural perspective highlighting themes of empowerment and social justice Features dynamic readings and personal narratives that highlight each chapter's topic Accompanied by an online instructor's manual with Power Points for lecture presentations chapter summaries key terms suggested classroom activities and a test bank with essay and multiple choice questions Also available is a companion volume Human Behavior and the Social Environment Micro Level which offers an eye opening view of how biological psychological and cultural forces influence individuals behavior Las enseñanzas secretas de las plantas Stephen Harrod Buhner, 2012-11-16 Revela el uso de la percepción directa en la comprensión de la naturaleza las plantas medicinales y la sanación de las enfermedades humanas Explora las técnicas utilizadas por los pueblos aborígenes y occidentales para aprender directamente de las propias plantas incluidas las técnicas de Henry David Thoreau Goethe y Masanobu Fukuoka autor de The One Straw Revolution La revolución de una brizna de paja La humanidad no puede sobrevivir sin las propiedades nutricionales y medicinales de las plantas Se ha calculado que el número de especies vegetales que hay en nuestro planeta oscila alrededor de 400 000 y muchas de estas especies son aún desconocidas para la humanidad Si bien los botanistas occidentales sólo han identificado y clasificado una pequeña fracción de ese total se puede afirmar con

seguridad que muchas de las plantas desconocidas en Occidente son conocidas para los pueblos aborígenes que viven en los entornos naturales de esas plantas. Todos los pueblos antiguos y aborígenes afirman que sus conocimientos sobre remedios botánicos provienen de las propias plantas y no de la experimentación a través de pruebas y errores. Un dato menos conocido es que estas enseñanzas sobre las plantas constituyen la base de muchos de los descubrimientos modernos tanto en la medicina como en la alimentación de origen vegetal. En todas partes del mundo existe la tradición de la percepción directa de la naturaleza a través de la inteligencia del corazón. Los descubrimientos recientes de la neurociencia han demostrado que más del 50 por ciento del corazón está compuesto por células neurales. En realidad, el corazón es un cerebro por derecho propio. La percepción centrada en el corazón puede ser excepcionalmente precisa y detallada en lo que respecta a su potencial de recopilación de información, como afirman los pueblos antiguos y aborígenes. Stephen Harrod Buhner explora minuciosamente esta modalidad de percepción centrada en el corazón. Incluye información de vanguardia sobre los mecanismos físicos de la cognición basada en el corazón y explora las obras de muchos autores extraordinarios que percibieron el mundo con el corazón, como Henry David Thoreau, Luther Burbank, quien cultivó la mayoría de las plantas alimenticias que ahora consumimos sin pensar en su procedencia, George Washington Carver, Masanobu Fukuoka y el gran poeta y científico alemán Goethe, que estudió la metamorfosis de las plantas. Buhner nos muestra cómo estos grandes pensadores adquirieron una percepción directa de la naturaleza mediante el uso de las capacidades cognitivas del corazón. El autor proporciona el conocimiento y las técnicas necesarios para desarrollar la percepción basada en el corazón que es nuestro derecho de nacimiento. Nos enseña a ir descubriendo directamente de las propias plantas los usos medicinales de cada una de ellas y a comprender el proceso de creación de alma que se engendra mediante esa profunda conexión con el mundo.
