Sacrificing The Forest Environmental And Social Struggles In Chiapas:

Sacrificing The Forest Karen O'brien, 2018-05-04 The Selva Lacandona of Chiapas Mexico has received a tremendous amount of attention since the Zapatista uprising began in 1994 Concerns have focused on both the rapid rate of deforestation in Mexico's largest tropical rain forest and the social marginalization of its inhabitants which is considered to be a root cause of the uprising In this book Karen O'Brien presents an insightful analysis of how deforestation and social struggles are related in this region and then considers the implications of these links for the remaining forest A critical analysis of deforestation rates and patterns in the Selva Lacandona region provides the point of departure for this study Using satellite imagery and her own field work O'Brien presents an original estimate of forest loss She then uses an approach derived from political ecology to trace the links between social processes and deforestation Instead of focusing exclusively on the driving forces of deforestation she argues that an analysis of the countervailing forces of conservation efforts is crucial to understanding the configuration of the present day forest and the conflicts that surround it Unless these forces can be fused O'Brien contends the future of the Selva Lacandona will continue to be shaped by the tensions among social economic and environmental objectives A valuable tool for scholars of deforestation environmental change and political ecology *Sacrificing the Forest* will also be of interest to readers trying to understand the current situation in Chiapas

Environmental Issues in Latin America and the Caribbean Aldemaro Romero, Sarah E. West, 2006-02-23 We began this book with a simple goal to assemble a collection of readings for an undergraduate interdisciplinary course taught by one of us AR at Macalester College This course explored environmental problems and solutions in Latin America and the Caribbean using both natural science and social science methods After a literature search failed to produce an anthology of interdisciplinary readings appropriate for the course we set out to compile one We sought papers that dealt with the most salient environmental problems in the region that were written by experts and that were appropriate for undergraduate students Most importantly we sought papers that clearly demonstrate the contributions that experts from one discipline can make to analysis in another discipline We sought papers that for example show how biological species assessments can be used to inform the politics of biodiversity conservation We sought papers that show how economic analysis can be used to predict the likely effects of human behavior on ecosystems We sought papers that pay close attention to how institutions both national and international affect the outcome of environmental initiatives To find essays that fit our needs we sent out a world wide call for papers chose the most promising submissions and subjected these submissions to peer review The twelve approved essays represent the work of researchers from Latin America and the Caribbean the United States Canada Europe and Australia All the authors have direct experience with Latin America and the Caribbean and the region's problems

Tropical Rainforests
Susan E. Place, 2001-05 Presents an overview of the nature of rainforests and discusses the causes and consequences of deforestation in Latin America's rainforests as well as alternative approaches to development

Payments for

Environmental Services, Forest Conservation and Climate Change Luca Tacconi, Sango Mahanty, Helen Suich, 2010 This resourceful book draws on several case studies to derive implications for the design of Payment for Environmental Services PES schemes that are very relevant to current climate change negotiations and the implementation of Reduced Emissions from Deforestation and forest Degradation REDD schemes at the national level With its focus on livelihoods the book also provides important lessons that are relevant to the design of PES schemes focusing on environmental services other than carbon conservation Drawing practical lessons for the design of activities aimed at reducing deforestation and forest degradation while benefiting rural people this book will appeal to academics practitioners and students involved in the fields of environment and natural resource management forestry and development studies This insightful study is accessible also to non experts in presenting the key issues faced in avoiding deforestation and benefiting livelihoods Encyclopedia of Environment and Society Paul Robbins, 2007-08-27 As befits the topic this beautifully packaged wonderfully illustrated interdisciplinary resource has more than 1200 entries written by specialists A helpful reader's guide groups topics like agriculture conservation and ecology movements and regulations politics pollution and society A resource guide chronology glossary and list of the UN's economic indicators complete the set Library Journal this important work gives a well focused snapshot of environmentalism in the early 21st Century and it will remain valuable into the future both for its content and as a yardstick to measure progress toward sustainability and conservation Summing Up Recommended Undergraduates and general readers CHOICE Booklist Editors Choice 2008 This superb interdisciplinary work should find a place on the shelves of every public and academic library that has the least bit of interest in environment issues which should mean just about all Booklist Starred Review Where does the environment leave off and society begin When expanding production and consumption drives greenhouse gas emissions that warm the planet which in turn influence the conditions of economic expansion it is unclear where the climate ends and the economy begins This fact is not new to our era however our social and natural sciences have only recently come to grips with the incredible complexity of the world described by understanding the environment and society as being of a piece As a result in the last decade there has been an unprecedented explosion of new concepts theories facts and techniques that follow from such an understanding The Encyclopedia of Environment and Society brings together multiplying issues concepts theories examples problems and policies with the goal of clearly explicating an emerging way of thinking about people and nature With more than 1 200 entries written by experts from incredibly diverse fields this innovative resource is a first step toward diving into the deep pool of emerging knowledge The five volumes of this Encyclopedia represent more than a catalogue of terms Rather they capture the spirit of the moment a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio environmental issues Key Features Examines many new ideas about how the world works what creates the daunting problems of our time and how such issues might be addressed whether by regulation markets or new ethics Demonstrates how theories of environmental

management based on market efficiency may not be easily reconciled with those that focus on population and both may certainly diverge from those centering on ethics justice or labor Offers contributions from experts in their fields of specialty including geographers political scientists chemists anthropologists medical practitioners development experts and sociologists among many others Explores the emerging socio environmental problems that we face in the next century as well as the shifting and expanding theoretical tools available for tackling these problems Covers regions of North America in greater detail but also provides a comprehensive picture that approaches as effectively as possible a cohesive global vision Key Themes Agriculture Animals Biology and Chemistry Climate Conservation and Ecology Countries Geography History Movements and Regulations Organizations People Politics Pollution Society Packed with essential and up to date information on the state of the global socio environment the Encyclopedia of Environment and Society is a time capsule of its historic moment and a record of where we stand at the start of the 21st century making it a must have resource for any library These inspiring volumes provide an opportunity for more new ways of thinking behaving and living in a more than human world

Tropical Forests Thomas K. Rudel,2005 In Tropical Forests Rudel analyzes hundreds of local studies from the past twenty years to develop a much needed global perspective on deforestation With separate chapters on individual regions including South and Central America the Caribbean and Africa Rudel s work offers an up to date assessment of the world s tropical forests In the concluding chapter Rudel considers the implications of these trends and describes policy directions for conserving biodiversity and promoting sustainable development in each region *Oil Wealth and the Fate of the Forest* Sven Wunder,2003 Rural Chiapas Ten Years after the Zapatista Uprising Sarah Washbrook,2020-10-28 Considered the most significant recent agrarian movement in Mexico the 1994 EZLN uprising by the indigenous peasantry of Chiapas attracted world attention Timed to coincide with the signing of the NAFTA agreement the Zapatista Army of National Liberation reasserted the value of indigenous culture and opposed the spread of neo liberalism associated with globalization The essays in this collection examine the background to the 1994 uprising together with the reasons for this and also the developments in Chiapas and Mexico in the years since Among the issues covered are the history of land reform in the region the role of peasant and religious organizations in constructing a new politics of identity the participation in the rebellion of indigenous women and changing gender relations plus the impact of the Zapatistas on Mexican democracy The international group of scholars contributing to the volume include Sarah Washbrook George and Jane Collier Antonio Garc a de Le n Daniel Villafuerte Sol s Gemma van der Haar Mercedes Olivera Marco Estrada Saavedra Heidi Moksnes Neil Harvey and Tom Brass This book was previously published as a special issue of The Journal of Peasant Studies Encyclopedia of Environmental Science John F. Mongillo,Linda Zierdt-Warshaw,2000 From Edward Abbey to zooxanthellae this A Z resource gives readers over 1 000 entries that tell the story of environmental science With its wide range of information and international flavor The Encyclopedia of Environmental Science establishes the standard for students librarians and others

who want to understand this complex and ever changing area of science Lacandón Maya in the Twenty-First Century
James D. Nations,2023-09-12 This book tells the story of how Lacand n Maya families have adapted to the contemporary world while applying their ancestral knowledge to create an ecologically sustainable future in Mexico s largest remaining tropical rainforest **The Community Forests of Mexico** David Barton Bray,Leticia Merino-Pérez,Deborah

Barry,2009-03-16 Mexico leads the world in community management of forests for the commercial production of timber Yet this success story is not widely known even in Mexico despite the fact that communities around the globe are increasingly involved in managing their own forest resources To assess the achievements and shortcomings of Mexico s community forest management programs and to offer approaches that can be applied in other parts of the world this book collects fourteen articles that explore community forest management from historical policy economic ecological sociological and political perspectives The contributors to this book are established researchers in the field as well as many of the important actors in Mexico s nongovernmental organization sector Some articles are case studies of community forest management programs in the states of Michoac n Oaxaca Durango Quintana Roo and Guerrero Others provide broader historical and contemporary overviews of various aspects of community forest management As a whole this volume clearly establishes that the community forest sector in Mexico is large diverse and has achieved unusual maturity in doing what communities in the rest of the world are only beginning to explore how to balance community income with forest conservation In this process Mexican communities are also managing for sustainable landscapes and livelihoods **New Frontiers of Land Control** Nancy

Peluso,Christian Lund,2013-09-13 Questions about land control have invigorated thinkers in agrarian studies and economic history since the nineteenth century Exclusion alienation expropriation dispossession and violence animate histories of land use property rights and territories More recently agrarian environments have been transformed by processes of de agrarianization urbanization migration and new forms of primitive accumulation Even the classic agrarian question of how the social relations of agriculture will be influenced by capitalism has been reformulated at critical historical moments reviving or producing new debates around the importance of land control The authors in this volume focus on new frontiers of land control and their active creation These frontiers are sites where established power relationships are challenged by new enclosures and property regimes producing new social and environmental dynamics in their stead Contributors examine labor and production processes engaged by new configurations of actors new agrarian and environmental subjects and the networks connecting them and new legal and violent means of challenging established or imminent land controls Overall we find that land control still matters though in changed degrees and manners Land control will continue to inspire struggles for a long time This book was originally published as a special issue of the Journal of Peasant Studies **REDD, Forest**

Governance and Rural Livelihoods Oliver Springate-Baginski,Eva Wollenberg,2010-01-01 Experiences from incentive based forest management are examined for their effects on the livelihoods of local communities In the second section country

case studies provide a snapshot of REDD developments to date and identify design features for REDD that would support benefits for forest communities

Confronting the Coffee Crisis Christopher M. Bacon, 2008 Explores small scale farming the political economy of the global coffee industry initiatives that claim to promote more sustainable rural development in coffee producing communities

Environmental Change and Security Project Report ,2002

The Maya Tropical Forest James D. Nations, 2010-01-01 The Maya Tropical Forest which occupies the lowlands of southern Mexico Guatemala and Belize is the closest rainforest to the United States and one of the most popular tourist destinations in the Western Hemisphere It has been home to the Maya peoples for nearly four millennia starting around 1800 BC Ancient cities in the rainforest such as Palenque Yaxchilan Tikal and Caracol draw thousands of tourists and scholars seeking to learn more about the prehistoric Maya Their contemporary descendants the modern Maya utilize the forest s natural resources in village life and international trade while striving to protect their homeland from deforestation and environmental degradation Writing for both visitors and conservationists James Nations tells the fascinating story of how ancient and modern Maya peoples have used and guarded the rich natural resources of the Maya Tropical Forest He opens with a natural history that profiles the forest s significant animals and plants Nations then describes the Maya peoples biological preserves and major archaeological sites in Mexico Guatemala and Belize Drawing on more than twenty five years of conservation work in the Maya Tropical Forest Nations tells first hand stories of the creation of national parks and other protected areas to safeguard the region s natural resources and archaeological heritage He concludes with an expert assessment of the forest s future in which he calls for expanded archaeological tourism to create an ecologically sustainable economic base for the region

Political Change and Environmental Policymaking in Mexico Jordi Diez, 2013-10-31 This book explores environmental policymaking in Mexico as a vehicle to understanding the broader changes in the policy process within a system undergoing a democratic transformation It constitutes the first major analysis of environmental policymaking in Mexico at the national level and examines the implementation of forestry policy in Mexico s largest rain forest the Selva Lacandona of the state of Chiapas

Reinventing the Lacandón Brian Gollnick, 2022-08-23 Before massive deforestation began in the 1960s the Lacand n jungle which lies on the border of Mexico and Guatemala was part of the largest tropical rain forest north of the Amazon The destruction of the Lacand n occurred with little attention from the international press until January 1 1994 when a group of armed Maya rebels led by a charismatic spokesperson who called himself Subcomandante Marcos emerged from jungle communities and briefly occupied several towns in the Mexican state of Chiapas These rebels known as the Zapatista National Liberation Army became front page news around the globe and they used their notoriety to issue rhetorically powerful communiqu s that denounced political corruption the Mexican government s treatment of indigenous peoples and the negative impact of globalization As Brian Gollnick reveals the Zapatista communiqu s had deeper roots in the Mayan rain forest than Westerners realized and he points out that the very idea of the jungle is also deeply rooted though in different

ways in the Western imagination Gollnick draws on theoretical innovations offered by subaltern studies to discover oral traces left by indigenous inhabitants in dominant cultural productions He explores both how the jungle region and its inhabitants have been represented in literary writings from the time of the Spanish conquest to the present and how the indigenous people have represented themselves in such works including post colonial and anti colonial narratives poetry video and photography His goal is to show how popular and elite cultures have interacted in creating depictions of life in the rain forest and to offer new critical vocabularies for analyzing forms of cross cultural expression **Deforesting the Earth**

Michael Williams, 2003 Clearing in the deep past Reaching out europe and the wider world The global forest *Las Abejas*

Marco Tavanti, 2014-01-27 Las Abejas came to be known by the international community as the civil counterpart to the neozapatista movements and as a Christian pacifist movement This book presents the voices of Las Abejas and of numerous collaborators alongside an innovative theoretical analysis of the dynamics of identity construction The uniqueness of this study is the analysis of the role of international human rights observers in relation to indigenous communities in resistance In this fascinating study Marco Tavanti explains how cultural religious political human rights and nonviolent frameworks combine in a syncretic identity of resistance
