Saeconomics Of Deforestation Hb:

Economics of Deforestation Sven Wunder, 2000-07-19 Tropical forests are disappearing at an unaltered pace giving way to alternative land uses This book gives an economic perspective on deforestation Following a survey of different deforestation definitions theories and empirical evidence a case study of Ecuador provides a versatile historical picture of factors affecting forest loss throughout different periods regions and ecosystems It is shown that policy and market failures alone cannot explain rapid deforestation decision makers follow a composite economic rationale in their continuous clearing of forests which can only be counteracted by concerted action *The Economics of Optimal Growth Pathways* S. Niggol Seo, 2023-02-25 Every society aspires to be prosperous It also endeavors to minimize the side effects of economic growth This book entitled *The Economics of Optimal Growth Pathways* addresses numerous trade offs faced by society to achieve prosperity and explores the best possible growth pathways The theories explored in this book serve as a springboard to better understand key challenges and aspects of the economy including food security land use forest and resource management capital markets and interest rates oil and gas extraction fish and marine resources saving and investment and climate change This book elucidates the concept of optimal economic growth pathways while addressing the challenges faced in natural resources and life on the planet It will be relevant to students and researchers interested in resource and environmental economics

The Nature of Economic Instruments Edward B. Barbier, 1992

Economics of Land Degradation and Improvement - A Global Assessment for Sustainable Development Ephraim Nkonya, Alisher Mirzabaev, Joachim von Braun, 2015-11-11 This volume deals with land degradation which is occurring in almost all terrestrial biomes and agro ecologies in both low and high income countries and is stretching to about 30% of the total global land area About three billion people reside in these degraded lands However the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources The annual global cost of land degradation due to land use and cover change LUCC and lower cropland and rangeland productivity is estimated to be about 300 billion USD Sub Saharan Africa SSA accounts for the largest share 22% of the total global cost of land degradation Only about 38% of the cost of land degradation due to LUCC which accounts for 78% of the US 300 billion loss is borne by land users and the remaining share 62% is borne by consumers of ecosystem services off the farm The results in this volume indicate that reversing land degradation trends makes both economic sense and has multiple social and environmental benefits On average one US dollar investment into restoration of degraded land returns five US dollars The findings of the country case studies call for increased investments into the rehabilitation and restoration of degraded lands including through such institutional and policy measures as strengthening community participation for sustainable land management enhancing government effectiveness and rule of law improving access to markets and rural services and securing land tenure The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts

to achieve sustainable development objectives have intensified In this regard the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land degradation and halt biodiversity loss *The Economics of Deforestation*, 2000

Economics, Natural-Resource Scarcity and Development (Routledge Revivals) Edward B Barbier, 2013-06-26 Global warming is an increasing problem tropical forests are being wiped out and major upper watersheds are being degraded Using insights provided by environmentalism ecology and thermo dynamics this book first published in 1989 outlines an economic approach to the use of natural resources and particularly to the problem of environmental degradation Edward Barbier reviews and critiques the long past of environmental and resource economics and then goes on to elaborate an economics which allows us to develop alternative strategies for dealing with the problems faced With examples drawn from Latin America and Indonesia he not only develops a major theoretical advance but shows how it can be applied Barbier s work is an important and relevant contribution to the discussion surrounding the economics of environmental sustainability

Introduction to Development Economics Subrata Ghatak, 1995 The third edition of the widely used Introduction to Development Economics provides a detailed analysis of the major economic issues confronting less developed countries Throughout Subrata Ghatak maintains a balance between theories of economic growth and the realities of economic development Although the basic principles remain unchanged the past few years have witnessed changes in emphasis and the rise of new areas of interest Such issues include development and the environment the international debt crisis endogenous growth the impact of foreign aid fiscal reforms migration human capital accumulation and the problems of trade liberalization Introduction to Development Economics is divided into four sections and is written in a straightforward style This is a comprehensive analysis of the area with many tables added to provide up to date statistical data and technical data in the appendices *Nature of Economic Instruments* International Institute for Environment & Development, 1992

Economics of Forestry Roger A. Sedjo, 2018-02-06 This title was first published in 2003 The Economics of Forestry is a specialized subset of resource economics addressing a specific natural resource the forest which is usually a relatively long time period Hence forest economics has characteristics similar to nonrenewable resources but also has those of a renewable resource in some cases approaching those of agriculture This volume comprises some of the most significant journal essays in forest economics and forest policy The International Library of Environmental Economics and Policy explores the influence of economics on the development of environmental and natural resource policy In a series of twenty five volumes the most significant journal essays in key areas of contemporary environmental and resource policy are collected Scholars who are recognized for their expertise and contribution to the literature in the various research areas serve as volume editors and write essays that provides the context for the collection Volumes in the series reflect three broad strands of economic research including 1 Natural and Environmental Resources 2 Policy Instruments and Institutions and 3 Methodology The

editors in their introduction to each volume provide a state of the art overview of the topic and explain the influence and relevance of the collected papers on the development of policy This reference series provides access to the economic literature that has shaped contemporary perspectives on land use analysis and policy

Economic Policies for Sustainable Development Thomas Sterner, 2012-12-06 This book focuses on describing policy instruments in different countries Its purpose is not only descriptive but also to some extent advocacy We believe that economic instruments can make an important contribution to an environmentally less disruptive path of development The design of economic instruments is however a fine art and depends among other things on their political acceptability and this acceptability is of course influenced by experience It is therefore important to provide information on the use of policy instruments in other countries Policies are currently developing quite fast and thus a book such as this one can inevitably not capture more than a snapshot view at a single moment of time We would hope that the book encourages more experimentation with economic instruments and that countries will make a fuller use of the whole arsenal of economic policy instruments If the book does succeed in this sense then it will soon become dated as policies change but that would be a price well worth paying The book combines a dozen country monographs together with a few international surveys on particular topics gasoline pricing vehicle regulations acid rain deforestation and global warming These papers are intended to illustrate the diversity of policy options available The actual policies adopted depend on economic as well as ecological conditions The country studies cover two Western countries and then concentrate on formerly planned and developing countries They show that economic instruments are still generally thought of as new and innovative
